

MISIÓN PERMANENTE DE MÉXICO

OGE02962

Ginebra, a 11 de junio de 2008

Señor Secretario General,

Tengo el honor de hacer referencia a su atenta comunicación CL-66 del 27 de febrero de 2008, con la que transmitió cuestionario preparado por el Grupo de Trabajo del Consejo de la Unión Internacional de Telecomunicaciones (UIT) encargado de desarrollar y conducir consultas abiertas sobre la incorporación de actores relevantes en las actividades de la UIT relacionadas con la Cumbre Mundial de la Sociedad de la Información.

Al respecto, me complace hacerle llegar, de manera adjunta, las respuestas de la Coordinación del Sistema Nacional e-México al cuestionario de referencia.

Hago propicia la oportunidad para reiterar a usted las seguridades de mi más atenta y distinguida consideración.

OPEN CONSULTATION ON THE INCLUSION
OF THE RELEVANT STAKEHOLDERS IN THE
ACTIVITIES OF THE ITU RELATED TO THE
WSIS

RESOLUTION 141 (WG-STUDY)

Name: Alejandro Hernández Pulido

Title/Position: e-Mexico System Coordinator

Country: Mexico

e-mail: ahernanp@sct.gob.mx

Answers:

- a) We think that the ITU Members States should reserve to themselves the activities of the Union core competences as the radio spectrum management and the standards development and also has to promote the building of an inclusive Information Society.
- b) Yes, there it's enough information that can be access by all stakeholders about the WSIS and all its process.
- c) All the definitions had to be constructed so that all stakeholders can understand them.
- d) We promote the development of financial mechanisms, as the voluntary "Digital Fund", so that diverse stakeholders can have access to the WSIS and ITU activities.
- e) One of the greatest challenges of the ITU in accordance with the WSIS is to continue developing comparable statistical indicators of the international community.

- f) All the stakeholders might contribute with information and knowledge so the development of the WSIS in the world could be enhanced.
- g) It's very important to find experimented world consultants on Information and Knowledge Society, all over the world, so the less experimented countries could use them to implant WSIS.
- h) 3 challenges to the stakeholders that are trying to get involved on to WSIS could be:
 - a. Obtain money from different funds or donations to access the WSIS,
 - b. Involve the different actors of their countries to implant the WSIS,
 - c. Find the ways to adopt the technology in their people to arrive to Universal Access.
- i) The WSIS has to promote all their instruments all around the world so stakeholders that don't know the existent mechanisms should use them. Another idea is the use of evangelists; they could promote the WSIS and their instruments all around the world.
- j) As we said all over these document three instruments that WSIS and ITU should use are:
 - a. Money from the Digital Fund,
 - b. Society and Knowledge experts world Consultants,
 - c. Evangelists to promote the WSIS.
