Subject: ITU Centres of Excellence - Training Catalogue 2021 for the Asia and the Pacific region

Dear Sir/Madam,

The Centres of Excellence (CoE) programme of the International Telecommunication Union (ITU) aims to support capacity development in the field of information and communication technologies (ICTs). It offers continuous education to ICT professionals and executives in the public and private spheres through online and face-to-face programmes. The Centres of Excellence, established in all ITU regions with the support from multilateral and regional organizations, serve as regional focal points for professional development, research, and knowledge sharing as well as provide specialist training services to external clients. In this respect, all those who are interested in developing their capacities and skills in the field of ICT and digital development are invited to visit the ITU Academy online training catalogue at <https://academy.itu.int/training-courses/full-catalogue>.

I am pleased to inform you that the online training catalogue 2021 of the ITU Centres of Excellence for the Asia and the Pacific region is now available. It can be accessed via the aforementioned link by filtering this particular region, as well as on the ITU Office for Asia and the Pacific website at <https://www.itu.int/itu-d/asp>. I invite you to share these links within your institution as well as with all stakeholders who might be interested in participating in training courses in the field of ICTs.

Training courses for the Asia and the Pacific region are delivered in six priority areas: Wireless & Fixed Broadband, Cybersecurity, Internet of Things, Conformance and Interoperability, ICT Applications and Spectrum Management. Please note that training courses will be delivered mainly online due to the current Covid-19 pandemic and that dates may be subject to change. Participants who successfully pass the course evaluation will receive an ITU certificate.

Courses are provided by six ITU Centres of Excellence in the Asia and the Pacific region as follows:
Advanced Level Telecoms Training Centre (ALTTC), India

- China Academy of Information and Communications Technology (CAICT), China
- State Radio Monitoring Centre (SRMC), China
- IoT Academy, Iran
- National Information Society Agency (NIA), Republic of Korea
- Wireless Communication Centre, Universiti Teknologi Malaysia (UTM), Malaysia

Course registration deadlines are available in the respective training course description and payment details are specified in the training course outlines, both available in the ITU Academy portal.

Mr. Sean Sharidz Doral, ITU Programme Officer, ITU Regional Office for Asia and the Pacific (email: sean.doral@itu.int) is at your full disposal should you require any additional information.

I look forward to the active participation of the representatives of your institution in the training courses offered in 2021.

Yours faithfully,

[Original signed]

Doreen Bogdan-Martin

Director
