

Proposal Summary

Title	Inclusion of fixed broadband subscription by speed
Abstract	It is proposed to include fixed broadband subscription by speed >10Mbps/20Mbps/100Mbps per fixed broadband subscription in the pillar of meaningful connectivity as meaningful connectivity requires high quality infrastructure .
Type (choose one)	Indicator
Contact Point	Zhenganqi
Affiliation	China Ministry of Industry and Information Technology

The reasons for proposing this addition are as follows:

1. There is no mobile network indicator to measure infrastructure quality in the present version.
2. It should be reflected that the accelerated upgrade of fixed broadband to high-speed fiber broadband.

Indicator Criteria

Only relevant for indicator proposals. Subject to change based on sub-group activity.

Relevance	Relevant to Meaningful connectivity pillar.
Availability	Data is available for 154 countries in ITU Database for this indicator.
Reliability	Data is collected by ITU on annual basis.
