

Proposal Summary

Title	Inclusion of fixed broadband subscription by speed
Abstract	It is proposed to include fixed broadband subscription by speed >10Mbps per fixed broadband subscription in the pillar of meaningful connectivity as meaningful connectivity requires high quality infrastructure that is not only in place and functioning but allows for a fast and reliable connection.
Type (choose one)	Indicator
Contact Point	Rajeev Yadav, Director(ERU)
Affiliation	Department of Telecommunication, Government of India

Justification / Background

To include the indicator 'Fixed broadband subscription by speed greater than 10Mbps as % of fixed broadband subscriptions' under meaningful connectivity pillar of IDI owing the following reasons:

1. With high speed citizens get to enjoy an enriching and productive online experience.
2. Data is available for 154 countries in ITU Database for this indicator.

Indicator Criteria

Only relevant for indicator proposals. Subject to change based on sub-group activity.

Relevance	Relevant to Meaningful connectivity pillar.
Availability	Data is available for 159 countries in ITU Database for this indicator.
Reliability	Data is collected by ITU on annual basis.
