

# Introduction of KT Smart City

Smart City Business Team | October 2018

## 01 KT's Smart City Framework

KT, based on strengths on IoT, Cloud, Big Data, and AI, uses network and platform to solve issues arising from cities and maximize city value

## 02 Network - Backbone for Smart City Services

A variety of value added services can be delivered via 5G to NB-IoT network

### 5G Network

5G

- ✓ Data traffic acceptance (1,000 times more than 4G)
- ✓ Applying & verifying 5G tech at PyeongChang Olympic

*Innovative*

### Location-base Infra

- ✓ Public Wifi, LTE, Beacon infra
- ✓ More than 310,000 location-base Infra countrywide

*Accurate*

### NB-IoT

- ✓ Low power consumption, cost efficiency, & outdoor coverage based on global standard IoT Network

*Economic*

### Wired/Wireless Network

- ✓ Biggest service provider for wired/wireless network

*Trustworthy*

# 03 KT's Smart Services

KT has various smart city services in the area of traffic, safety, administration, environment, energy etc., that can be customized for each customer's needs

The collage features several service cards, including:

- Traffic:** 스마트 교통신호제어 (Smart Traffic Signal Control)
- Safety:** 스마트파킹 (주차관리시스템) (Smart Parking (Parking Management System)), 어린이안심/U안심 서비스 (Children's Safety/U-Safety Service)
- Administration:** 세이프메이트 (범죄예방) (Safe Mate (Crime Prevention)), 세이프메이트 (화재예방) (Safe Mate (Fire Prevention)), 수도권 원격점검서비스 (Seoul Area Remote Inspection Service)
- Environment:** 스마트 환경 지킴이 (Air Map) (Smart Environment Guardian (Air Map)), 통합환경감시 (Integrated Environment Monitoring)
- Energy:** 1-1 GiGA energy manager (1-1 GiGA energy manager)
- Welfare:** 삼성 트래커 'Connect Tag' (Samsung Tracker 'Connect Tag')

Traffic

Safety

Admini-  
stration

Environ-  
ment

Energy

Welfare

**2 차별화 포인트**

- 정확하고 편리한 위치확인 : WPS & 알뜰폰 관리 등
- 삼성전자 브랜드 & 최고수준의 방수방진
- 저렴한 이용요금(9,900원/100MB, 12개월 선불 등)

**3 Reference**

- 세종시 사범서비스 예정 : 지메노인(100명)

**4 타깃 고객**

- 키즈(6~9세) 자녀를 둔 부모, 실버고객, 반려동물 보유가구

**5 협력사 현황**

협력사명	협력분야
삼성전자	단말 제조

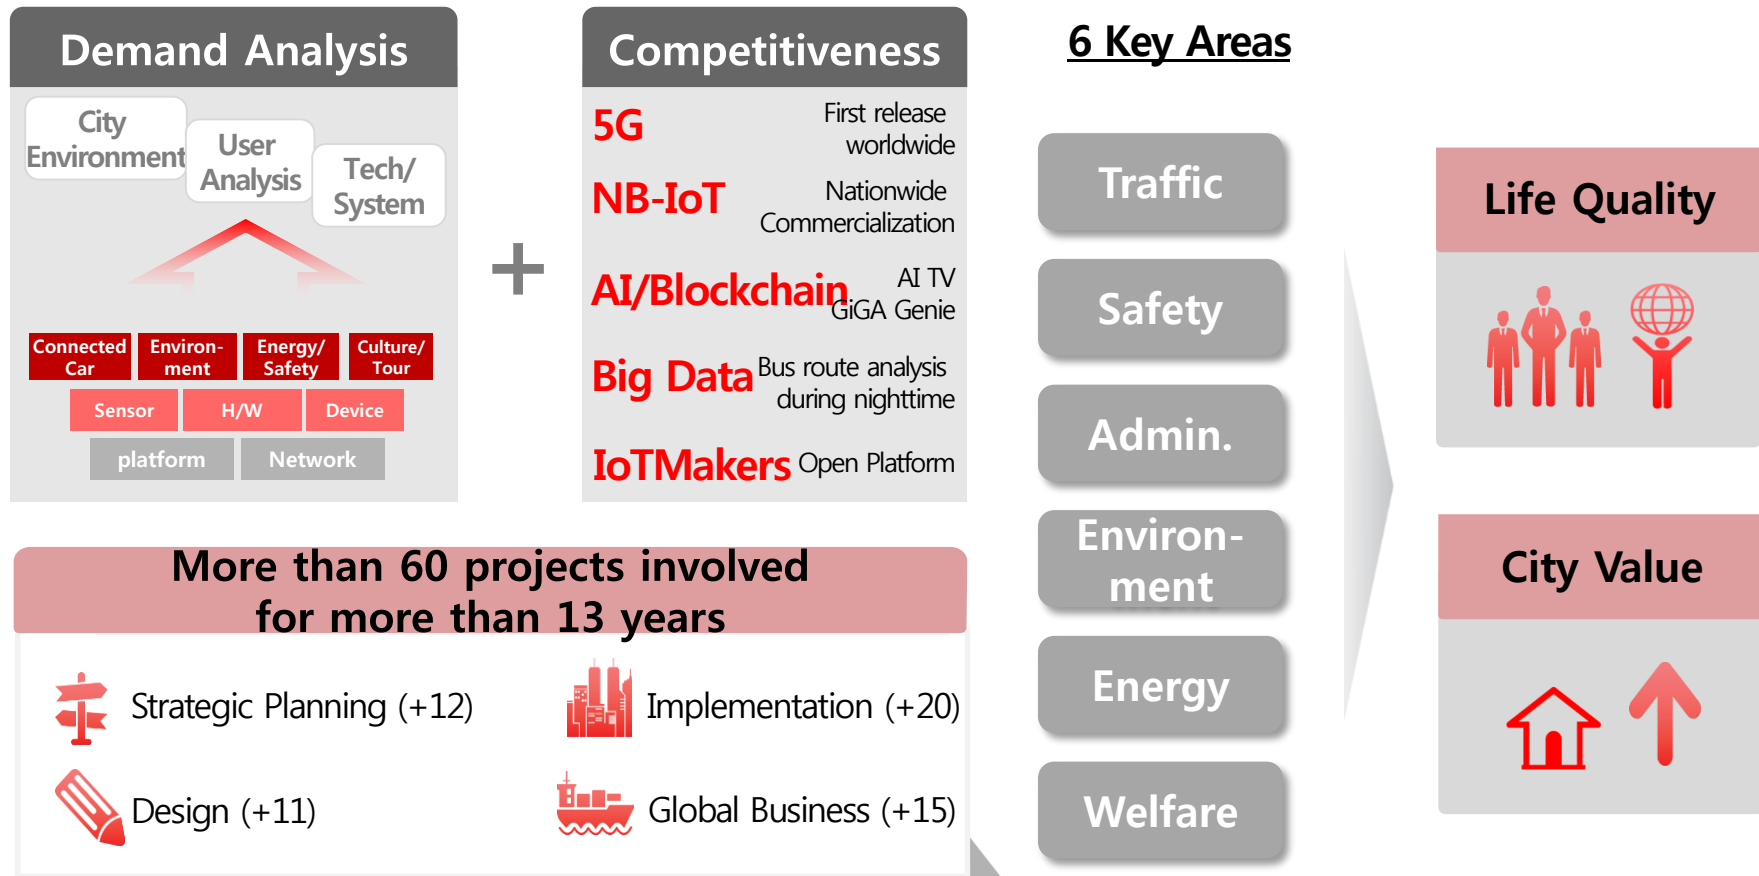

**6 서비스 가격(B2C 기준)**

구분	가격 (부가세 포함, B2B의 경우 별도 협의)
요금	\$9,900원
제공 데이터	100MB
NB-IoT 99	12개월 선불

담당 : IoT사업전략담당 NB-IoT사업 TF 상재성

## 04 **KT's Plan for Smart City Business**

KT aims to improve life quality and city value with proven capabilities and differentiated competitiveness

## 05 KT's Smart City References

With various experiences in Smart City development and more than **60 Smart City references**, KT is actively expanding its smart city expertise globally as well as domestically

### Global References

**15**  
CASES

#### Malaysia

Nusajaya ICT Master Plan ('11)

#### The Philippines

Aseana City Public Safety & Security Design & Construction ('13)

#### Qatar

Qatar Smart City Demo Lab 1<sup>st</sup> & 2<sup>nd</sup> ('13-15)

### Domestic References

**48**  
CASES

#### South Korea

Dongtan U-City Design & Construction ('05)  
Gwanggyo U-City Design & Construction ('09)  
Sihwa MTV U-City Construction ('12-16)  
Songdo Smart City Consulting & Design ('13)

# 1. Songdo Smart City

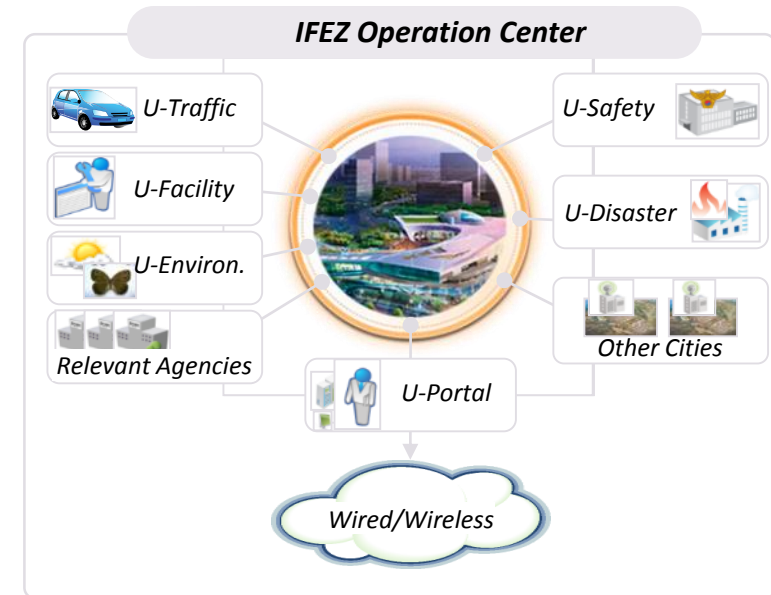

## Songdo, a leading Smart City

Separate ICT Planning, Design, Implementation and Operation subjects has been implemented for developing Songdo smart city

- Total area : 5,340 Ha (53.4 km<sup>2</sup>)
- Population : 130,000
- Budget : 7,670M US\$
- Implementation of U-Public service with IOC (Integrated Operation Center)

### Major ICT Projects for Songdo

\* ISP : ICT Strategy Planning

## 2. Pankyo Smart City

## Pankyo, Autonomous Vehicle Cluster

KT is building the world first autonomous vehicle cluster in the tech savvy startup district in Pankyo and targeting to complete the project by 2019.

### Pankyo Autonomous Vehicle Cluster Construction Project

#### 경기도 '판교제로시티 자율주행 실증단지 조성사업', 국토부 업무계획에 포함

한국경제신문  
2017.1.15

경기도가 자율주행차 대중화를 위해 추진하는 '판교제로시티 자율주행 실증단지 조성사업'이 빠르게 추진될 전망이다. 국토교통부가 올해 업무 계획에 오는 12월까지 판교제로시티 자율주행 셔틀 서비스 개시 계획을 담았기 때문이다.

5일 도에 따르면 국토부 업무계획에 판교제로시티 내에 일반인들이 탑승할 수 있는 자율주행 셔틀 서비스를 도입하는 경기도 자율주행 셔틀 서비스 도입 계획이 담겼다.

To test and verify self-driving technology for local and global companies

To apply KT's IoT platform with proven references and construct IoT services

To construct big data system based on KT's analysis on the traffic data

# 3. Jeju C-ITS Project

# Jeju, Cooperative-Intelligent Transport Systems(C-ITS)

## Area Coverage

### | Network of Major Roads in Jeju, 300km |

## Details

### Building Center System

- H/W, N/W System
- Integrated Operation Device & Program for the Center & Display Board
- Creating Highly Precise Map
- Supporting promotion & public relations

### On-site Support Equipment

- Vehicle Device, Road Station
- Sudden Detector / Pedestrian Detector
- CCTV, Weather Data Collection Equipment
- National Police Agency Standard Signal Controller
- Parking Information System, e-Call Device

### Jeju C-ITS Services

- 15 C-ITS Service
- Building Testbed for Self-cooperative driving

### Special Proposal

- LTE Network Exclusive for C-ITS
- Very Precise Measurement Solution
- Public Demonstration for Self-driving Bus
- Providing Jeju Special Tour Information
- Monitoring the area in which accidents can happen

# 4. Air Map Korea

# KT Air Map Korea (Smart Air)

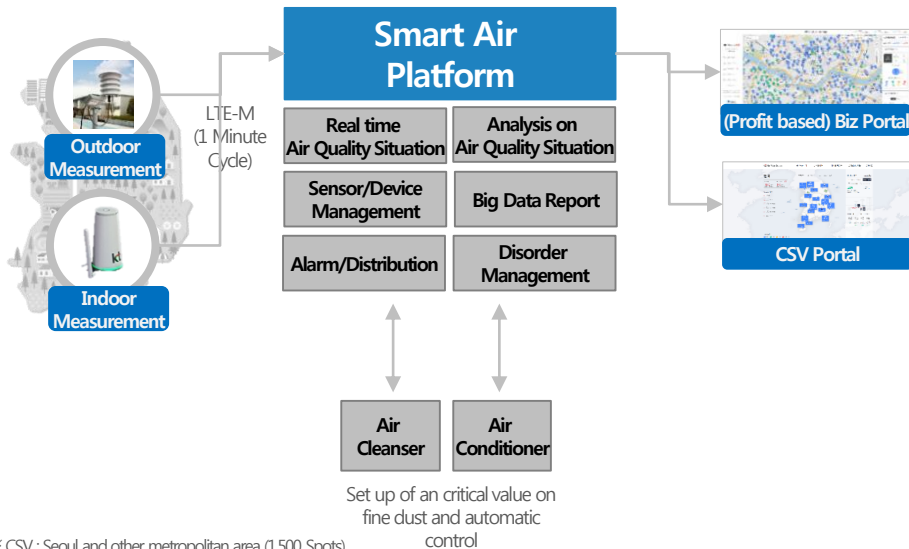

## Air Map Solution

Q

- How come level of fine dust is bad every day?
- Want to go work out but can I?
- What is the current level of fine dust in my town?
- What is the cause of the fine dust and where does it come from?

### Service

Providing integrated services :  
Collection and analysis on an enormous amount of real time data about air quality and automatic control over air conditioner

※ CSV : Seoul and other metropolitan area (1,500 Spots)  
 ※ Biz : On-site installation (184 Spots)

## Key Points of KT's Air Map Solution

### Other Observation Network

**Connecting to the limited number of sensors**

Operating 380 monitoring station

**One Hour**

Not reflecting the changes in air quality which changes every moment

**Sensor Measurement**

Not providing analytics and forecast

**Not connected to air conditioning device**

### KT Smart Air

**Accepting Massive Things**

Air quality sensor spotted at 1500(CSV) & 184(Biz) locations and expandable to include air cleanser

**One Minute**

Providing Air Map service based on real time live data

**Sensor Measurement + Big Data Analysis**

Providing additional report on Big Data analysis

**Connecting to Air Cleanser/Conditioner**

Automatic control based on the measured value

VS

## Expected Outcome

**Preoccupancy on the B2B Air Quality Service**

Providing the air quality service (The first & the most)

Already providing the service to the 9 different entities(Business, local government, etc.)

**Expanding to various business by establishing Open API**

Incorporating with existing KT services including AI and advancing the solution to the next level

Processing/advancing collected data so that it can be applied to the navigation/infotainment, air conditioning facility

**Improving air quality based on Integrated Weather data & automatic control**

Optimized control on air conditioner based on data collected from sensor

Expanding analytics to provide integrated information

PEOPLE. TECHNOLOGY.
