

Mr Bassirou BODIAN

Physics Teacher

CEM Ouakam 2

Dakar

Senegal

Mr Bodian was the in-school leader of the Senegal MoE pilot project for Connected Classrooms.

The project demonstrated that, by utilising a combination of web caching, synchronised offline activities, and lite teacher capacity-building interventions, it was possible to extract Effective Access for whole-class activities from an existing 4G internet connection.

Led by Mr Bodian, within just two weeks the teaching team had renewed their enthusiasm for, and boosted their skills in using, the previously under-utilised IT Lab, capturing the success of the project in a remarkably affirming video.
