

Roxana WIDMER-ILIESCU has worked for the International Telecommunication Union (ITU) for the past 25 years, contributing to the overarching goal of Digital Inclusion by focusing on people with specific needs or in vulnerable situations such as women and girls, children and youth, persons with disabilities, older persons, and Indigenous people. To ensure an all-inclusive and intersectional approach to the work in digital inclusion, she promotes Information and Communication Technologies ICTs/ digital accessibility, the universal design of technology, as a critical enabler to guarantee not only equal but also equitable inclusion in digital societies, economies and environments of all people regardless of their age, gender, physical ability to use the technology, level of education or geographical location. As Senior Coordinator for Digital Inclusion and ITU-D Focal Point for [ICT/digital accessibility](#), she provides ITU members with specialized advice on developing digitally inclusive policies and strategies, and she leads the development of key [ITU-D tools and resources](#) intended to support ITU members and is involved stakeholders' efforts in implementing an inclusive digital transformation ensuring that no one is left behind, and thus, contributing in building a digitally inclusive world for all.
