

Yhuko OGATA

Melody International Ltd. Founder, President & CEO

Overview

Her involvement with e-Health is a regional EMR network project by the government in 2000. As a result, in 2002, she launched Japan's first perinatal EMR business, which gained a large market share and contributed to the digitization of perinatal medical care in Japan. In 2015 she founded Melody International with a corporate mission of "providing safe and secure childbirth for every mother in the world". She develops and promotes remote mobile fetal monitoring devices and perinatal e-Health platforms. She presented her work at ITU in 2015 and in 2018.
