

HENRY TAN

Deputy Director, Cybersecurity Engineering Centre

Henry began his career 2005 with T-Systems International as a security evaluator specialising in ISO/IEC15408, also known as Common Criteria. He later joined the Ministry of Home Affairs in 2009 where he headed the Standards and Evaluation group, responsible for the security testing of devices used within the Ministry. He joined the Cyber Security Agency of Singapore (CSA) in 2014, where he is responsible for several key initiatives such as the Singapore Common Criteria Scheme and the Cybersecurity Labelling Scheme (CLS) for consumer connected device and for medical devices.

Henry also represents Singapore in ISO/IEC JTC 1/SC 27/WG 3 and WG4, in contributing towards the development of standards relating to security evaluation and IoT, with the aim to reduce fragmentation and avoid duplicative testing across borders.
