

MOURAD BELMIRISSI

Mourad Belmrissi's experience in ICT regulatory testing spans over 20 years including engagement with test houses, phone and tablet manufacturers and T&M solution supplier. Before joining R&S as technical sales manager in October 2012, Mourad managed the Motorola ADR lab for conformance and carrier approval for the global handset business. Joining a startup called Ubidyne in the beginning of 2009, Mourad was responsible for field testing of active antenna systems in China and US by leading several field trials in both continents with major MNOs. Mourad's telecommunication experience includes also a role as co-founder of the Nokia TCC branch in Ulm/Germany where he ended in late 2012 as head of type approval and carrier approval testing responsible for global lab strategy inside TCC Nokia. Currently, Mourad leads the technical sales activities for R&S in Middle east and Africa region with focus on test and measurement. Dealing with many players from the ICT in a fast-moving technological landscape helps Mourad to deeply understand the aspects of the business and technical challenges in our industry.
