ROLAND YAW KUDOZIA

Roland Yaw Kudozia holds a doctorate in Computer Science and a Master of science in technology and Innovation with a specialisation in Electronic Security and Risk Management. He holds a Bachelor of Engineering in Electronics and Communication Engineering. Roland has twenty-two years of experience as a practising telecom engineer. He worked with Ghana Telecommunications Co Ltd (Vodafone Ghana) as a core network engineer, Huawei Technologies (Ghana) S.A. Limited as a Senior Core network engineer, and now with National Communication as Head of Licensing at the Regulatory Administration Division. He is also responsible for the NCA Type Approval Labs and facilitates the ITU C & I Training Programme for the Africa Region. He is also an expert in telephone number management. He is a member of the African Organisation for Standardisation (ARSO) Consumer Committee and a coordinator for Ghana's national sub-committee responsible for the development and adoption of Telecommunications and Information Communication and Technology (ICT) standards.

Roland is responsible for drafting Ghana's Type Approval Regulations and Guidelines, designing Type Approval Management System and Number Management System, drafting licenses and developing a regulatory framework for new electronic communication services.
