DAVID JENSEN

David Jensen is the coordinator of Digital Transformations programme at the United Nations Environment Programme (UNEP). In this capacity, he is responsible for co-developing the new digital transformation strategy and for scaling up the use of digital technologies to accelerate action in addressing climate action, nature protection and pollution prevention. He is also currently serving as UNEP's focal point in the Coalition for Digital Environmental Sustainability (CODES) within the Secretary General's Digital Cooperation Roadmap. David was one of the senior contributors to the CODES Action Plan for a Sustainable Planet in the Digital Age.

David has been advising the UN Science Policy Business Forum on digitalizing sustainability since 2018 and was the co-author of a discussion paper entitled The Case for a Digital Ecosystem for the Environment. He also co-wrote a series of Medium articles on a Digital Ecosystem for the Planet (1, 2, 3) as well as an input on Environmental Digital Public Goods as part of the SG's Digital Cooperation Roadmap. Within the digital space, David has co-founded numerous platforms including CODES, STRATA, MapX, Earthschool, the UN Biodiversity Lab, and the Environmental Peacebuilding Platform.
