Ms. Ria Sen

Ria Sen is a London School of Economics Master of Science programme alumna. She serves as Global Preparedness Officer, Emergency Telecommunications Cluster, at the United Nations World Food Programme based in Rome. Her functions cover enhancing readiness and capacity of national governments to prepare for disasters, with reference to the telecommunications sector. Prior to WFP, Ria has worked on innovation, technology, climate resilience, and DRR portfolios with UNDP, UNDRR, UNESCAP, and the European Commission, serving in countries from Belgium to Fiji. In the academic arena, Ria has delivered guest lectures on artificial intelligence and tech applications for disaster/climate risk management across the EU, USA, and Asia. A keen linguist, she speaks five languages. She is a Global Panelist for the Massachusetts Institute of Technology (MIT) *Tech Review* publication, and Advisor at the *Harvard Business Review*.
