

EVELYN KIMORI

PR & Science Communications Lead
Lamu Marine Conservation Trust (LaMCoT)

Evelyn Kimori is a scientist with a storyteller's soul, dedicated to bridging complex marine science and public engagement. She serves as PR & Science Communications Lead at the Lamu Marine Conservation Trust (LaMCoT), where she translates ocean data into conservation action across the Lamu Archipelago; a UNESCO World Heritage Site in coastal Kenya. With combined seven years of experience spanning industrial quality control, content management, and science communication, Evelyn brings a uniquely multi-disciplinary lens to coastal resilience. She is currently pursuing an MSc in Chemistry at Pwani University, researching coral skeletons as archives of climate and pollution change. A trained open-water diver and advocate for the blue economy, she is committed to surfacing the stories hidden beneath the waves.
