

AHMATH BAMBA MBACKE

University of Dakar, Senegal

Ahmath Bamba MBACKE is a lecturer and researcher active in Senegal's digital sector. He has been in ESP since 2006, working in the Department of Computer Engineering and the Laboratory of Computer Science, Telecommunications, and Applications (LITA). His experience extends well beyond his teaching and scientific activities:

- IT Consultant for the IFC of the World Bank Group, assisting with the assessment of the private sector and the identification of promising digital market sectors in 2020,
- Innovation Coach for approximately fifteen innovation projects that have won national and international awards,
- Member of the consultation/drafting committee for the national AI strategy in 2023,
- Expert trainer in Digital Transformation for government officials in 2023
- Member of the technical committee for the GaindeSAT-1A nanosatellite project

He is currently:

- President of the Senegalese Chapter of the Internet Society,
- National contact point for the Horizon Europe program
- Representative of the W3C Advisory Committee in Senegal
