

HIDEO IMANAKA

Moderator

A Ph.D. in electrical engineering from Mie University in 2001. He joined Telecommunication Network Laboratories, NTT, in 1987. In 2004, he started international standardization activities in ITU-T and the APT standardization program (ASTAP) in NTT Service Integration Laboratories. He was in charge of standardization strategy planning of the entire NTT Group in NTT Research and Development Planning Department from 2010 to 2015. Since joining NTT Advanced Technology Corporation (NTT-AT) in 2015, he has been engaged in standardization consulting. He was the rapporteur of Question 1 of SG13 from 2006 to 2010 for the Next-Generation Network and Internet Protocol television standardization work in ITU-T, the chairman of the Internet of Things (IoT) working group in ASTAP from 2012 to 2016 for IoT and smart grid standardization work, and the vice-chairman of Focus Group on IMT-2020 in 2015 for pre-standardization of 5G (fifth-generation mobile communication) networks. He is currently the rapporteur of Question 8 of SG16 in ITU-T for standardization of Immersive Live Experience and the vice-rapporteur of Question 3 of SG1 in ITU-D for international deployment of emergency telecommunications and disaster relief solutions. He is also the vice-chair of ITU-D SG2, the co-chair of Working Party 3 of SG16, the vice-chair of ITU Focus Group on metaverse, the chair of WG5 of FG-MV.
