

GAO SHUANG

CNNIC

Gao Shuang is an Analyst at the China Internet Network Information Center (CNNIC). She has over a decade of dedicated research experience specializing in statistical survey methodology, digital divide research, information accessibility, and Internet governance. Ms. Gao has long overseen survey sampling design and quantitative data analytics for the Statistical Report on China's Internet Development, while leading numerous national and ministerial-level research projects. Ms. Gao actively participates in ITU-D initiatives, including WTIS, EGTI, and EGH, and is responsible for calculating and submitting China's core ICT indicators officially adopted by the ITU. She has also led nationwide ICT skills survey projects.
