

Maximiliano Marichal Abiuso

Project Officer and Statistician in the ICT Data and Analytics Division, BDT

Maximiliano Marichal Abiuso is a Project Officer and Statistician in the ICT Data and Analytics Division of the International Telecommunication Union (ITU), where he contributes to promoting and measuring Universal and Meaningful Connectivity.

Before joining ITU, he worked as a statistician in the United Nations Statistics Division, as part of the Data for Now initiative, supporting the development and use of innovative data sources and methods to improve the availability and use of information for sustainable development. Previously, he worked on initiatives aimed at strengthening statistical capacity at the Inter-American Development Bank, where he managed technical cooperation projects and supported regional initiatives on official statistics, digital government, and public policy. He also worked for several years at the National Statistical Office of Uruguay, where he contributed to the design, production, and analysis of sociodemographic statistics and household surveys.

Mr. Marichal Abiuso holds a postgraduate diploma in International Studies from the Universidad de la República, Uruguay, and a bachelor's degree in Development Studies from the same university.
