

PÉRICLES TELES

Péricles Teles is an electrical engineer with more than 20 years of experience in the telecommunications sector, with a career spanning conformity assessment, certification, regulatory compliance, business development and institutional relations.

He currently works at **Moderna Tecnologia**, where he is responsible for customer and project operations related to telecommunications certification, as well as institutional relations within the Brazilian regulatory and conformity assessment ecosystem.

Throughout his career, Péricles has held leadership and specialist positions in certification and regulatory compliance, including activities involving Brazilian and international markets. His professional background combines technical, regulatory and business perspectives, with a particular focus on supporting companies in navigating conformity assessment and market access requirements.

He holds an MBA in Business Management, a postgraduate degree in Strategic Marketing, and a degree in Electronics and Telecommunications Engineering from INATEL.
