

EDUARDO REGE

Eduardo Rege has served, since 2005, as a Telecommunications Regulation Specialist at the Brazilian National Telecommunications Agency (Anatel), where he plays a national coordination role in the Anti-Piracy Action Plan (PACP), a strategic initiative focused on combating the commercialization and use of illegal and non-compliant equipment. His responsibilities include coordinating nationwide enforcement and regulatory intelligence activities, overseeing operations involving digital platforms, distribution centers, law enforcement agencies, and customs authorities, as well as developing and applying technological tools based on automation, data analytics, and artificial intelligence to monitor and mitigate risks.

He has also contributed to technical studies and institutional publications on anti-piracy, supporting the improvement of public policies, regulatory compliance initiatives, and national cooperation on information and communications technology (ICT) security matters.

He holds a postgraduate degree in Telecommunications Regulation from Instituto Nacional de Telecomunicações (INATEL), and a degree in Eletric Engineering from Universidade Federal de Goiás (UFG).
