

GREGOIRE MASTRANGELO

Gregoire Mastrangelo is Head of Insights, Analytics & Artificial Intelligence at the International Olympic Committee (IOC), where he leads the organisation's global analytics competency centre and co-leads its AI stream. He contributes to shaping and implementing the IOC's approach to data and artificial intelligence across the organisation and the wider Olympic Movement.

Over the course of his career, Gregoire has held senior international leadership roles in insights, strategy, data and technology. His experience spans global organisations and entrepreneurial ventures, including the development of data and analytics capabilities and the translation of emerging technologies into practical organisational value. His work today focuses on responsible AI adoption, governance and the organisational transformation required to move from ambition to implementation.
