

Thiago Aguiar Soares is a Senior Radiocommunication Engineer in the Radiocommunication Bureau of the International Telecommunication Union (ITU). He works on technical and regulatory matters related to terrestrial broadcasting services, contributes to the activities of ITU-R Study Groups, and supports the modernization of regulatory processes through digital tools and artificial intelligence.

He has 20 years of experience in spectrum management, broadcasting and telecommunications regulation. Before joining ITU, he worked at Brazil's National Telecommunications Agency (Anatel) and held senior leadership roles at Brazil's Ministry of Communications. He brings extensive international experience, having served as Chair of ITU-R Study Group 6, participated actively in World Radiocommunication Conferences, and contributed to regional telecommunications activities within CITELE and MERCOSUR. His expertise includes spectrum policy, frequency planning, digital broadcasting, international negotiations, digital transformation and AI applications. He holds a B.Sc. and an M.Sc. in Electrical Engineering from the University of Brasília, Brazil.
