# *Global Status of the Implementation of Digital Terrestrial Broadcast*

ITU-BDT-FNS

# Digital Switch Over (DSO) & Analogue Switch Off (ASO)

⇒ 198 Records as of 7/07/2026; 2 countries have updated their DSO/ASO)

=> To enable ITU administrations and to benefit from the state of the art DTT technologies (technical, policy, economic aspects including capacity building) and information on the digital Terrestrial Television broadcasting transition.

=> It is very important now to address the question of how to allocate the ‘digital dividend’ resulting from the spectrum efficiencies gained by this process in the frequency bands currently allocated to broadcasting.

# Key challenges : Credentials & Policy

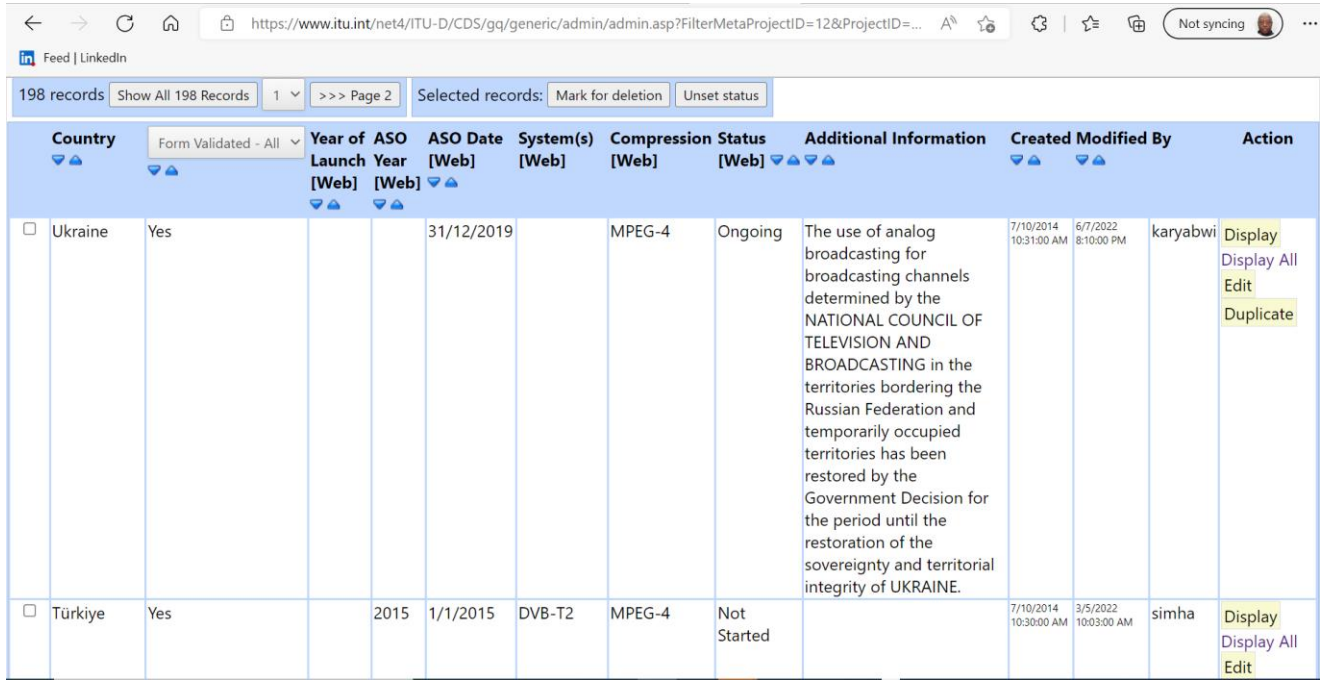

Official communication Administration:

Focal Point Credentials / Policy and Responsibilities

- UKRAINE

"The use of analog broadcasting for broadcasting channels determined by the NATIONAL COUNCIL OF TELEVISION AND BROADCASTING in the territories bordering the Russian Federation and temporarily occupied territories has been restored by the Government Decision for the period until the restoration of the sovereignty and territorial integrity of UKRAINE."
