

## Radiocommunication Bureau (BR)

Administrative Circular  
**CACE/729**

5 June 2015

**To Administrations of Member States of the ITU, Radiocommunication Sector Members and ITU-R Associates participating in the work of Radiocommunication Study Group 7**

Subject: **Radiocommunication Study Group 7 (Science services)**

- **Proposed adoption of 2 draft new ITU-R Recommendations and 1 draft revised ITU-R Recommendation and their simultaneous approval by correspondence in accordance with § 10.3 of Resolution ITU-R 1-6 (Procedure for the simultaneous adoption and approval by correspondence)**
- **Proposed approval of suppression of 1 ITU-R Question**

At the meeting of Radiocommunication Study Group 7, held on 26 May 2015, the Study Group decided to seek adoption of 2 draft new ITU-R Recommendations and 1 draft revised ITU-R Recommendations by correspondence (§ 10.2.3 of Resolution ITU-R 1-6) and further decided to apply the procedure for simultaneous adoption and approval by correspondence (PSAA), (§ 10.3 of Resolution ITU-R 1-6). The titles and summaries of the draft Recommendations are given in Annex 1. Furthermore, the Study Group proposed approval of suppression of 1 ITU-R Question mentioned in Annex 2.

The consideration period shall extend for 2 months ending on 5 August 2015. If within this period no objections are received from Member States, the draft Recommendations shall be considered to be adopted by Study Group 7. Furthermore, since the PSAA procedure has been followed, the draft Recommendations shall also be considered as approved.

Any Member State who objects to the adoption of a draft Recommendation or approval of the suppression of a Recommendation/Question is requested to inform the Director and the Chairman of the Study Group of the reasons for the objection.

After the above-mentioned deadline, the results of the PSAA procedure will be announced in an Administrative Circular and the approved Recommendations will be published as soon as practicable (see <http://www.itu.int/pub/R-REC>).

Any ITU member organization aware of a patent held by itself or others which may fully or partly cover elements of the draft Recommendation(s) mentioned in this letter is requested to disclose such information to the Secretariat as soon as possible. The Common Patent Policy for ITU-T/ITU-R/ISO/IEC is available at <http://www.itu.int/en/ITU-T/ipr/Pages/policy.aspx>.

François Rancy  
Director

**Annex 1:** Titles and summaries of the draft Recommendations

**Annex 2:** Question proposed for suppression

**Documents:** Documents [7/113\(Rev.1\)](#), [7/114\(Rev.1\)](#) and [7/120\(Rev.1\)](#)

These documents are available in electronic format at:  
<http://www.itu.int/md/R12-SG07-C/en>

**Distribution:**

- Administrations of Member States of the ITU and Radiocommunication Sector Members participating in the work of Radiocommunication Study Group 7
- ITU-R Associates participating in the work of Radiocommunication Study Group 7
- Chairmen and Vice-Chairmen of Radiocommunication Study Groups and the Special Committee on Regulatory/Procedural Matters
- Chairman and Vice-Chairmen of the Conference Preparatory Meeting
- Members of the Radio Regulations Board
- Secretary-General of the ITU, Director of the Telecommunication Standardization Bureau, Director of the Telecommunication Development Bureau

## Annex 1

### Titles and summaries of the draft Recommendations

Draft new Recommendation ITU-R SA.[SRS-AIRCRAFT 2 GHz]

Doc. 7/113(Rev.1)

#### **Protection of SRS earth stations from mobile (aircraft) stations in the 2 200-2 290 MHz band**

This recommendation gives the required coordination distance of 880 km between space research earth stations and transmitting mobile (aircraft) stations to protect the space research earth stations in the 2 200-2 290 MHz band.

Draft new Recommendation ITU-R SA.[SRS/FSS 37GHz]

Doc. 7/114(Rev.1)

#### **Frequency sharing between SRS and FSS (space-to-Earth) systems in the 37.5-38 GHz band**

This recommendation covers the frequency sharing between the space research service and the fixed-satellite service in the 37.5-38 GHz band (space-to-Earth). It gives e.i.r.p. and pfd limits for the space-VLBI (SVLBI) and lunar systems of SRS, and the Geostationary Orbit (GSO) and Highly inclined Elliptical Orbit (HEO) systems of FSS.

Draft revision of Recommendation ITU-R TF.1153-3

Doc. 7/120(Rev.1)

#### **The operational use of two-way satellite time and frequency transfer employing pseudorandom noise codes**

This update is intended to adapt the document to increased demands on time transfer accuracy by proposing the use of more accurate relations in calculating correction terms in TWSTFT data evaluation.

## Annex 2

### Question proposed for suppression

Question No.	Title
149-1/7	Frequency utilization on the far side of the Moon
