Circular Letter
CR/253

31 March 2006

To Administrations of Member States of the ITU¹

Subject: Publication of the results of the second synthesis for the draft Plan

References: Resolution COM5/1 of the first session of the Regional Radiocommunication Conference for the planning of digital terrestrial broadcasting service in parts of Regions 1 and 3, in the frequency bands 174-230 MHz and 470-862 MHz, Geneva, 2004 (RRC-04)

BR Circular Letter CR/241 of 29 July 2005
BR Circular Letter CR/246 and its Addenda 1 and 2 of 20 October 2005,
1 November 2005 and 1 March 2006, respectively
Report of the first meeting of the IPG (Document IPG-1/51)
Report of the second meeting of the IPG (CA/158 of 28 March 2006)

To the Director General

Dear Sir/Madam,

1 In accordance with the schedule of the intersessional activities, indicated in Annex 2 to Resolution COM5/1, and the relevant conclusions of the Intersessional Planning Group (IPG) and its Working Party (WPIPG) from their respective meetings (4-7 July 2005 and 28-29 September 2005, respectively), the Planning Exercise Team (PXT) produced the first synthesis of the draft Plan, using the inventory of digital requirements and administrative declarations submitted by the Member States in response to the BR Circular Letter CR/241² and the other input data compiled by the Bureau from the relevant databases (the updated versions of the ST61 and GE89 Plans, the MIFR and the updated RCC List). In summary, 109 Member States from the planning area and one observer (the Palestinian Authority) submitted requirements for the preparation of the draft Plan. In addition, and based on the indications from three Member States, the Bureau generated

¹ This Circular Letter is primarily addressed to the Member States of Region 1 (except Mongolia) and to the Islamic Republic of Iran. It is for information only for other Member States.

² As advised by the IPG-1, the PXT generated requirements for those administrations that did not submit any requirement either for the first planning exercise or for the draft Plan.

requirements for one administration (AGL, by converting their eligible analogue assignments into digital requirements) and did not generate any requirements for two Member States, which so requested explicitly (ISL and SEY). Based on the indication in § 6.2 of the Report from RRC-04, the Bureau reused the requirements from one administration (MWI), which were submitted for the purpose of conducting the first planning exercise. Finally, and based on the conclusions from IPG-1 and WPIPG, the PXT generated requirements for six Member States (GNE, LBR, RRW, SOM, SRL and STP), which did not submit any requirements, by converting their eligible analogue assignments into digital requirements.

2 For the first synthesis associated with the draft Plan, some 81 Member States submitted more than 1.4 million administrative declarations by 27 January 2006, in the format described in Circular Letter CR/246 and its Addendum 1, and approximately 1 million of these administrative declarations were used for the first synthesis of the draft Plan. The other input data (notably on the existing and planned analogue broadcasting assignments and on the existing and planned assignments of other primary services) have been retrieved by the Bureau, using the general indications in § 1.7 of the Report, as well as the specific indications from the administrations concerning the inclusion or exclusion of some categories of assignments from the eligible assignments. Detailed statistics on the input data used for the first planning exercise (i.e., the inventory of digital requirements, data for existing and planned analogue broadcasting assignments, data for existing and planned assignments of other primary services, as well as data on administrative declarations) are provided in [Document IPG-2/12](#) and its Addenda 1 and 2. These data are also available for consultations at the URL http://www.itu.int/ITU-R/conferences/rrc/rrc-04/intersession/draft_plan/index.html, under Section “Data”.

3 The results of the first synthesis of the draft Plan have been made available to the membership in time for the second meeting of the IPG on the ITU web site. They were subsequently distributed to the participants in the IPG-2 meeting (see [Document IPG-2/19](#), its Addendum 1 and its Corrigendum 1). After their review by the IPG-2, a revised version was posted on the ITU web site on 7 March 2006 (see entries referred to as “Correction 2006/03/07” under Section “Results” at the URL http://www.itu.int/ITU-R/conferences/rrc/rrc-04/intersession/draft_plan/index.html).

4 In accordance with the conclusions from IPG-1 and WPIPG, subsequently reconfirmed by IPG-2, the Bureau collected additional administrative declarations from administrations, which were submitted by 20 March 2006, and conducted the second synthesis of the draft Plan. The summary results of the second synthesis of the draft Plan are given in the three Annexes to this Circular letter and the detailed results in the two attached CD-ROMs. These results and other relevant information for the second synthesis of the draft Plan are also available for download at http://www.itu.int/ITU-R/conferences/rrc/rrc-04/intersession/draft_plan2/index.html.

5 With the publication of the results of the second synthesis of the draft Plan, all the intersessional activities referred to in Resolution COM5/1 are now complete. As indicated in Annex 2 to Resolution COM5/1, administrations are expected to analyse these results with a view to taking them into consideration in their preparations for the second session of the RRC. Administrations may wish to take into account the relevant IPG recommendations in this respect, as indicated in Annex 1 (including its Appendix 1) to the IPG-2 Report.

6 The Bureau remains at the disposal of your Administration for any clarification you may require with respect to the subjects covered in this Circular Letter.

Yours faithfully,

V. Timofeev
Director, Radiocommunication Bureau

Annexes: 3
2 CD-ROMs (only for Member States in the planning area)

– Members of the Radio Regulations Board

ANNEX 1

Second synthesis of the draft Plan: general description and statistics

1 Introduction

The PXT conducted the second synthesis of the draft Plan using the indications in the Report from the RRC-04 and the conclusions of IPG in this respect. As was the case with the first planning exercise and with the first synthesis of the draft plan, the PXT conducted four study cases, which are described hereunder.

1.1 Study case 1 - the draft Plan

This case represents the draft Plan as defined by the RRC-04. For the conduct of this study case, the Bureau included all analogue television assignments in the reference situation, in accordance with the indications from the administrations concerned, and all complying frequency assignments to primary services other than broadcasting.

1.2 Study case 2 – AIOX

For the conduct of this study case, the Bureau included all analogue television assignments in the reference situation, in accordance with the indications from the administrations concerned. The assignments to primary services other than broadcasting in the reference situation were excluded when conducting this study case.

1.3 Study case 3 - AXOI

For the conduct of this study case, the Bureau included all complying frequency assignments to primary services other than broadcasting, in accordance with the indications from the administrations concerned. The analogue television assignments in the reference situation were excluded when conducting this study case.

1.4 Study case 4 - AOXO

For the conduct of this study case, the Bureau excluded all analogue television assignments in the reference situation and all assignments to primary services other than broadcasting in the reference situation.

2 Synthesis configuration for the different study cases

In accordance with the instructions from IPG-1, the PXT investigated methods for applying the principle of equitable access to plan synthesis (in terms of number of satisfied requirements per administration) and in particular methods that would avoid the situation where some administrations had none of their requirements satisfied. Such a method has been proposed and the relevant software was developed. In applying this approach, it is necessary to set a target of the maximum equal number of requirements that should be assigned with a frequency, where such requirements would be considered at the level where a linked set of requirements is considered as one requirement. The following table provides the target of the maximum equal number of

requirements that were set and those values that were achieved for the second synthesis of the draft Plan:

	Case study 1		Case study 2		Case study 3		Case study 4	
Band	VHF	UHF	VHF	UHF	VHF	UHF	VHF	UHF
Target	0	2	0	2	3	21	3	21
Achieved	0**	2	0**	2	3	21*	3	21*

*Post synthesis has optimised this value even further.

** After the analysis process no channels were available for the synthesis due to the constraints imposed by the existing and planned assignments (assignments to analogue television and/or other primary services).

3 Summary of the results

3.1 Results for Band III

	Case study 1			Case study 2			Case study 3			Case study 4		
	T-DAB	DVB-T	Total									
Yes	5353	4056	9409	5365	4073	9438	6692	4622	11314	6673	4629	11302
No	4477	3494	7971	4465	3477	7942	3138	2928	6066	3157	2921	6078
Total	9830	7550	17380	9830	7550	17380	9830	7550	17380	9830	7550	17380

Key: Yes = number of requirements with a channel or frequency block assigned

No = number of requirements without a channel or frequency block assigned

Detail results for Band III, concerning each administration on the different options, are given in Annex 2.

3.2 Results for Bands IV and V

	Case study 1	Case study 2	Case study 3	Case study 4
Yes	38090	38317	42629	42823
No	17759	17532	13220	13026
Total:	55849	55849	55849	55849

Key: Yes = number of requirements with a channel or frequency block assigned

No = number of requirements without a channel or frequency block assigned

Detail results for Bands IV and V, concerning each administration on the different options, are given in Annex 3.

ANNEX 2

Results for Band III (T-DAB and DVB-T) concerning each administration on the different options
