

Radiocommunication Bureau (BR)

13 March 2014

Circular Letter
CR/361

To Administrations of Member States of the ITU

Subject: Web-based distribution of the BR IFIC (Terrestrial Services)

The BR International Frequency Information Circular (BR IFIC) – Terrestrial Services - is a service publication currently in DVD-ROM. It contains particulars of frequency allotments and assignments to terrestrial services and is published by the Radiocommunication Bureau (Bureau) in the six official languages of the ITU, once every two weeks.

The purpose of this Circular Letter is to provide information and guidance to administrations on a new complementary service based on web interface and on-line distribution of the BR IFIC (Terrestrial services) in ISO format.

After successful testing and in addition to the DVD-ROM format, the Bureau is pleased to provide to administrations and all other users (subscribers) *a secure web-based distribution* of the BR IFIC (Terrestrial services) in a compressed ISO image file format.

This new form of distribution will allow administrations and all other users to have access to the BR IFIC (Terrestrial services) publications and data after download, without any delay, on the BR IFIC publication date and to offer a secure local reproduction of the BR IFIC (Terrestrial services) DVD-ROM.

The data inside the ISO image will be the exact copy of the BR IFIC (Terrestrial services) on DVD-ROM and structured according to the file system used on the original DVD-ROM.

Administrations and all other users are informed that, in case of any regulatory dispute, the original BR IFIC (Terrestrial services) on DVD-ROM shall prevail against the downloaded version of the BR IFIC (Terrestrial services) in ISO format and a local copy of the DVD-ROM created from this ISO file.

This new web-based service in ISO format is offered from the ITU Electronic Bookshop at: <http://www.itu.int/pub/R-SP-LN/en> as of the date of the publication of the present Circular Letter.

This is a complementary service to the current publication and distribution of the BR IFIC (Terrestrial Services) on DVD-ROM (Publication Notice No. **282-14**, edition 2014). In this regard, the rules and rates applied are those of the current BR IFIC (Terrestrial Services) on DVD-ROM.

Administrations and all other users wishing to have on-line access to the BR IFIC (Terrestrial services) in ISO format are requested to contact the ITU Sales and marketing division (contact: Mr. Dale Madsen, telephone +41 22 730 5659, fax +41 22 730 5194, www.itu.int/publications or e-mail: sales@itu.int) for the necessary registration form for eventual ITU Electronic Bookshop access. The registration form will also be sent with a future edition of the BR IFIC (Terrestrial services) DVD-ROM.

Administrations and all other users are also reminded that the Bureau maintains a support website – with wizards, useful information and “frequently asked questions” – that is designed to assist all users with the utilization of the new BR IFIC (Terrestrial services) in ISO format at: <http://www.itu.int/pub/R-SP-LN/en>.

A similar approach is being implemented with the BR IFIC (Space Services). Administrations will be informed through a separate Circular Letter (CR/360).

The Bureau remains at the disposal of your Administration via the brmail@itu.int address for any clarification you may require with respect to the subjects covered in this Circular Letter.

François Rancy
Director

Distribution:

- Administrations of Member States of ITU
- Members of the Radio Regulations Board
