#### Abstract

ANNEX 2

Suggested presentation of reply to Question 5: What frequencies/channels are currently used or intended to be used by digital terrestrial television broadcasting in your country? Please distinguish between those in use and those intended to be used. If allotments/SFNs are in use, a sketch map of frequency allocations could be included, with an accompanying table of allocations, as shown in Annex 2. Otherwise, it might be possible to show main transmitters and channels, grouped in layers, in a table. Please indicate how many digital television assignments/allotments use channels in the frequency sub-band $694-790 \mathrm{MHz}$ (as indicated in Resolution 232 (WRC-12)), and how many are in the remaining part of the UHF band.
