

RESOLUTION ITU-R 50-2

Role of the Radiocommunication Sector in the ongoing development of IMT

(2000-2007-2012)

The Radiocommunication Assembly,

considering

- a) that the scope of ITU as a whole, and of the standardization activities within ITU in particular, is very important to the expanding wireless industry;
- b) that ongoing enhancements to the IMT specifications have been and will continue to be accommodated;
- c) that the implementation of IMT systems is expanding and that these systems are being continuously developed in line with user and technology trends;
- d) that the ITU Handbook on deployment of IMT-2000 systems was jointly prepared by the three Sectors,

noting

- a) Resolution ITU-R 6, on liaison and collaboration with the ITU Telecommunication Standardization Sector;
- b) Resolution ITU-R 9, on liaison and collaboration with other recognized external organizations,

resolves

- 1 that a roadmap for ITU-R activities on IMT should be developed by the relevant Radiocommunication Study Group to ensure that this work is progressed effectively and efficiently with organizations external to ITU;
- 2 that the effective coordination currently established between ITU-T and ITU-R for IMT, Mobile Telecommunication Networks and Next Generation Networks activities should be continued;
- 3 that work carried out by the Radiocommunication Sector on IMT should be communicated to the Director of BDT,

invites

- 1 the Telecommunication Standardization Sector to develop a complementary roadmap for all ITU-T IMT activities, and to coordinate it with ITU-R to ensure full alignment and harmonization of the work programmes of both ITU-T and ITU-R,

instructs the Director of the Radiocommunication Bureau

- 1 to bring this Resolution to the attention of the Telecommunication Standardization Advisory Group and World Telecommunication Standardization Assembly for their consideration and possible action;
- 2 to report to the next Radiocommunication Assembly on the results of implementing this Resolution.
