

RESOLUTION 427 (WRC-19)

Updating provisions related to aeronautical services in the Radio Regulations

The World Radiocommunication Conference (Sharm el-Sheikh, 2019),

considering

- a) that provisions contained in the Radio Regulations should be continually assessed and reviewed to reflect the current utilization of various radio applications;
- b) that some modes of operation of aeronautical radio applications employed in the past are no longer in use, due to the introduction of new aviation technologies;
- c) that some provisions of the Radio Regulations refer to outdated types of equipment,

recognizing

that the Radio Regulations may not fully reflect current aeronautical operational practices as defined by the International Civil Aviation Organization (ICAO),

resolves to invite the ITU Radiocommunication Sector

to study the Articles, limited to Chapters IV, V, VI and VIII of Volume I, of the Radio Regulations and their associated Appendices, as appropriate, in order to identify outdated aeronautical provisions with respect to ICAO standards and recommended practices and to develop examples of regulatory texts for updating these provisions, while ensuring that potential changes to such provisions will not impact any other systems or services operating in accordance with the Radio Regulations,

invites administrations and Sector Members

to participate actively in the studies by submitting contributions to the ITU Radiocommunication Sector (ITU-R),

instructs the Director of the Radiocommunication Bureau

to include in the Report of the Director to WRC-23 the progress on the ITU-R studies referred to in *resolves to invite the ITU Radiocommunication Sector*,

instructs the Secretary-General

to bring this Resolution to the attention of ICAO.
