Note by the Secretariat

PLENIPOTENTIARY CONFERENCE RESOLUTIONS 71, 151, 191, 200

Summary

This document presents the following PP Resolution related to the strategic and financial plans elaboration and implementation:

- Resolution 71 (Rev. Dubai, 2018) “Strategic plan for the Union for 2020-2023”
- Resolution 151 (Rev. Dubai, 2018) “Improvement of results-based management in ITU”
- Resolution 191 (Rev. Dubai, 2018) “Strategy for the coordination of efforts among the three Sectors of the Union”
- Resolution 200 (Rev. Dubai, 2018) “Connect 2030 Agenda for global telecommunication/information and communication technology, including broadband, for sustainable development”

Action required

This report is transmitted to the CWG-SFP **for information**.

RESOLUTION 71 (REV. DUBAI, 2018)

Strategic plan for the Union for 2020-2023

The Plenipotentiary Conference of the International Telecommunication Union (Dubai, 2018),

considering

- a) the provisions of the ITU Constitution and ITU Convention relating to strategic policies and plans;
- b) Article 19 of the Convention, on the participation of Sector Members in the Union's activities;
- c) Resolution 70 (Rev. Dubai, 2018) of this conference, which resolves to incorporate the gender perspective in the implementation of the strategic and financial plans for 2020-2023 as well as in the operational plans of the Sectors and the General Secretariat;
- d) Resolution 72 (Rev. Busan, 2014) of the Plenipotentiary Conference, which underlines the importance of linking strategic, financial and operational plans as a basis for measuring progress in achieving the objectives and goals of ITU,

welcoming

United Nations General Assembly (UNGA) Resolutions 71/243 of 21 December 2016, on the quadrennial comprehensive policy review of operational activities for development of the United Nations system, and 72/279 of 31 May 2018, on the repositioning of the United Nations development system in the context of the quadrennial comprehensive policy review of operational activities for development of the United Nations system,

noting

- a) the challenges faced by the Union in achieving its purposes in the constantly changing telecommunication/information and communication technology (ICT) environment as well as the context for the development and implementation of the strategic plan, as outlined in Annex 2 to this resolution;

b) the glossary of terms presented in Annex 3 to this resolution,
recognizing

a) the experience gained in implementing the previous strategic plans for the Union;

b) the recommendations of the report by the United Nations Joint Inspection Unit (JIU) on strategic planning in the United Nations system, published in 2012;

c) the recommendations relevant to strategic planning and risk management in the JIU report on review of management and administration in ITU, published in 2016;

d) that the effective linkage between the strategic plan and the financial plan, which is detailed in Annex 1 to Decision 5 (Rev. Dubai, 2018) of this conference, can be achieved through reallocation of the resources of the financial plan to the various Sectors, and then to the goals and objectives of the strategic plan, as presented in the appendix to Annex 1 to this resolution,

resolves

to adopt the strategic plan contained in Annex 1 to this resolution,

instructs the Secretary-General and the Directors of the Bureaux

1 to develop and implement an ITU results framework for the strategic plan of the Union, following the principles of results-based management and results-based budgeting;

2 to coordinate the implementation of the strategic plan, ensuring coherence between the strategic plan, the financial plan, the operational plans and the biennial budgets;

3 to report annually to the ITU Council on the implementation of the strategic plan and on the performance of the Union towards the achievement of its goals and objectives;

4 to recommend to the Council adjustments to the plan in the light of changes in the telecommunication/ICT environment and/or as a result of the performance evaluation and the risk-management framework, in particular by:

- i) making all modifications necessary to ensure that the strategic plan facilitates the accomplishment of ITU's goals and objectives, taking account of proposals by the Sector advisory groups, decisions by conferences and by assemblies of the Sectors and changes in the strategic focus of the Union's activities, within the financial limits established by the Plenipotentiary Conference;
 - ii) ensuring the linkage between the strategic, financial and operational plans in ITU, and developing the corresponding human resources strategic plan;
- 5 to distribute these reports to all Member States, after consideration by the Council, urging them to circulate the reports to Sector Members, as well as to those entities and organizations referred to in No. 235 of the Convention which have participated in these activities;
- 6 to continue to engage with the United Nations Secretary-General, other United Nations development system entities and Member States with a view to supporting full implementation of UNGA Resolutions 71/243 and 72/279,

instructs the ITU Council

- 1 to oversee the development and implementation of the ITU results framework, including the adoption of the related indicators to better measure the effectiveness and efficiency of the implementation of the strategic plan of the Union;
- 2 to oversee the development and implementation of the strategic plan, and when necessary adjust the strategic plan, on the basis of the Secretary-General's reports;
- 3 to present an assessment of the results of the strategic plan to the next plenipotentiary conference, along with a proposed strategic plan for the next period;
- 4 to take appropriate action to support the implementation of UNGA Resolutions 71/243 and 72/279;

5 to ensure that the rolling operational plans from the General Secretariat and the three Sectors approved annually by the Council are fully aligned and compliant with this resolution and its annexes and with the financial plan for the Union approved in Decision 5 (Rev. Dubai, 2018) of this conference,

invites the Member States

to contribute national and regional insights on policy, regulatory and operational matters to the strategic planning process undertaken by the Union in the period before the next plenipotentiary conference, in order to:

- strengthen the effectiveness of the Union in fulfilling its purposes as set out in the instruments of the Union, by cooperating in the implementation of the strategic plan;
- assist the Union in meeting the changing expectations of all its constituents as national structures for the provision of telecommunication/ICT services continue to evolve,

invites Sector Members

to communicate their views on the strategic plan of the Union through their relevant Sectors and the corresponding advisory groups.

*(Minneapolis, 1998) – (Rev. Marrakesh, 2002) – (Rev. Antalya, 2006) –
(Rev. Guadalajara, 2010) – (Rev. Busan, 2014) – (Rev. Dubai, 2018)*

ANNEX 1 TO RESOLUTION 71 (REV. DUBAI, 2018)

ITU strategic plan for 2020-2023

1 ITU strategic framework 2020-2023

<div>← RBM planning</div> <div>Implementation →</div>	Vision & mission	<p>Vision is the better world ITU wants to see.</p> <p>Mission refers to the main overall purposes of the Union, as per the basic instruments of ITU.</p>
	Strategic goals & targets	<p>Strategic goals refer to the Union's high-level targets to which the objectives contribute, directly or indirectly. They relate to the whole of ITU.</p> <p>Targets are the expected results during the period of the strategic plan; they provide an indication as to whether the goal is being achieved. Targets may not always be achieved, for reasons that may be beyond the control of the Union.</p>
	Objectives & outcomes	<p>Objectives refer to the specific aims of the Sectoral and inter-Sectoral activities in a given period.</p> <p>Outcomes provide an indication as to whether the objective is being achieved. Outcomes are usually partly, but not entirely, within the organization's control.</p>
	Outputs	<p>Outputs are the final tangible results, deliverables, products and services achieved by the Union in the implementation of the operational plans.</p>
	Activities	<p>Activities are various actions/services for transforming resources (inputs) into outputs. Activities may be grouped into processes.</p>

Values: ITU's shared and common beliefs that drive its priorities and guide all decision-making processes

1.1 Vision

"An **information society**, empowered by the **interconnected world**, where **telecommunications/information and communication technologies** enable and accelerate **social, economic** and **environmentally** sustainable **growth** and **development** for everyone"

1.2 Mission

"To **promote, facilitate** and **foster affordable** and **universal access** to **telecommunication/information and communication technology networks, services** and **applications** and their **use** for **social, economic** and **environmentally sustainable growth** and **development**"

1.3 Values

The Union recognizes that achieving its mission requires that it build and maintain **trust** among its membership and inspire the **confidence** of the public at large. This applies to both what the Union does and how it is done.

The Union is committed to continuously building and safeguarding that trust by ensuring that its actions are guided by the following values:

Efficiency: Focusing on the purposes of the Union, making decisions on the basis of appropriate studies, evidence and experience, taking effective action and monitoring outputs, avoiding internal ITU duplication.

Transparency and **accountability:** By enhancing transparency and accountability processes for better decisions, actions, results and management of resources, ITU communicates and demonstrates progress towards the achievement of its goals.

Openness: Being aware of and responsive to the needs of all its membership, as well as the activities and expectations of intergovernmental organizations, the private sector, civil society, the technical community and academia.

Universality and neutrality: As a United Nations specialized agency, ITU reaches, covers and represents all parts of the world. Within the remit of the basic instruments of the Union, its operations and activities reflect the express will of its membership preferably by consensus. The Union also recognizes the overarching pre-eminence of human rights, including the right to freedom of opinion and expression, which includes the freedom to seek, receive and impart information and ideas through any media and regardless of frontiers, and the right to not be subjected to arbitrary interference in privacy.

People-centred, service-oriented and results-based: Being people-centred, ITU is focused on people in order to deliver results that matter to each and every individual. Being service-oriented, ITU is committed to further delivering high-quality services and maximizing satisfaction of beneficiaries and stakeholders. Being results-based, ITU aims for tangible results and to maximize the impact of its work.

The Union expects all of its staff to adhere faithfully to the Standards of Conduct for the International Civil Service and the ITU Code of Ethics. It also expects that any partner will uphold the highest standards of ethical behaviour.

1.4 Strategic goals

The strategic goals of the Union are listed hereafter and support ITU's role in facilitating progress towards the implementation of the World Summit on the Information Society (WSIS) action lines and the 2030 Agenda for Sustainable Development.

Goal 1 – Growth: Enable and foster access to and increased use of telecommunications/ICT in support of the digital economy and society

Recognizing the role of telecommunications/ICTs as a key enabler for social, economic and environmentally sustainable development, ITU will work to enable and foster access to, and increase the use of, telecommunications/ICTs, foster the development of telecommunications/ICTs in the support of the digital economy and help developing countries make their transition to the digital economy. Growth in the use of telecommunications/ICTs has a positive impact on short- and long-term socio-economic development as well as on the growth of the digital economy towards building an inclusive information society. The Union is committed to working together and collaborating with all stakeholders in the telecommunication/ICT environment in order to achieve this goal.

Goal 2 – Inclusiveness: Bridge the digital divide and provide broadband access for all

Being committed to ensuring that everyone without exception benefits from telecommunications/ICTs, ITU will work to bridge the digital divide for an inclusive information society and enable the provision of broadband access for all, leaving no one offline. Bridging the digital divide focuses on global telecommunication/ICT inclusiveness, fostering telecommunication/ICT access, accessibility, affordability and use in all countries and regions and for all peoples, including women and girls, youth and marginal and vulnerable populations, people from lower socio-economic groups, indigenous peoples, older persons and persons with disabilities.

Goal 3 – Sustainability: Manage emerging risks, challenges and opportunities resulting from the rapid growth of telecommunications/ICT

To promote the beneficial use of telecommunications/ICTs, ITU recognizes the need to manage emerging risks, challenges and opportunities from the rapid growth of telecommunications/ICTs. The Union focuses on enhancing the quality, reliability, sustainability and resilience of networks and systems as well as building confidence and security in the use of telecommunications/ICTs. Accordingly, the Union will work to make it possible to seize opportunities presented by telecommunications/ICTs while working towards minimizing the negative impact of undesired collaterals.

Goal 4 – Innovation: Enable innovation in telecommunications/ICT in support of the digital transformation of society

The Union recognizes the crucial role of telecommunications/ICTs in the digital transformation of society. The Union seeks to contribute to the development of an environment that is conducive to innovation, where advances in new technologies become a key driver for the implementation of the WSIS action lines and the 2030 Agenda for Sustainable Development.

Goal 5 – Partnership: Strengthen cooperation among the ITU membership and all other stakeholders in support of all ITU strategic goals

In order to facilitate the achievement of the above strategic goals, the Union recognizes the need to foster engagement and cooperation among governments, the private sector, civil society, intergovernmental and international organizations, and the academic and technical communities. The Union also recognizes the need to contribute to the global partnership to strengthen the role of telecommunication/ICTs as means of implementation of the WSIS action lines and the 2030 Agenda for Sustainable Development.

1.5 Targets

Targets represent the effect and long-term impact of ITU's work and provide an indication of progress towards achievement of the strategic goals. The Union will work collaboratively with the full range of other organizations and entities around the world committed to advancing the use of telecommunications/ICTs. The purpose of such targets is to provide the direction where the Union should focus its attention and to materialize the ITU vision for an interconnected world for 2020-2023. The following targets for each of the ITU's strategic goals reflect criteria that are specific, measurable, action-oriented, realistic, relevant, time-bound and traceable.

Table 1: Targets

Target

Goal 1: Growth

Target 1.1: By 2023, 65% of households worldwide with access to the Internet

Target 1.2: By 2023, 70% of individuals worldwide will be using the Internet

Target 1.3: By 2023, Internet access should be 25% more affordable (baseline year 2017)

Target 1.4: By 2023, all countries adopt a digital agenda/strategy

Target 1.5: By 2023, increase the number of broadband subscriptions by 50%

Target 1.6: By 2023, 40% of countries to have more than half of broadband subscriptions over 10 Mbit/s

Target 1.7: By 2023, 40% of the population should be interacting with government services online

Goal 2: Inclusiveness

Target 2.1: By 2023, in the developing world, 60% of households should have access to the Internet

Target 2.2: By 2023, in the least developed countries, 30% of households should have access to the Internet

Target 2.3: By 2023, in the developing world, 60% of individuals will be using the Internet

Target 2.4: By 2023, in the least developed countries, 30% of individuals will be using the Internet

Target 2.5: By 2023, the affordability gap between developed and developing countries should be reduced by 25% (baseline year 2017)

Target 2.6: By 2023, broadband services should cost no more than 3% of average monthly income in developing countries

Target 2.7: By 2023, 96% of the world population covered by broadband services

Target 2.8: By 2023, gender equality in Internet usage and mobile phone ownership should be achieved

Target 2.9: By 2023, enabling environments ensuring accessible telecommunications/ICTs for persons with disabilities should be established in all countries

Target 2.10: By 2023, improve by 40% the proportion of youth/adults with telecommunication/ICT skills

Goal 3: Sustainability

Target 3.1: By 2023, improve cybersecurity preparedness of countries, with key capabilities: presence of strategy, national computer incident/emergency response teams and legislation

Target 3.2: By 2023, increase the global e-waste recycling rate to 30%

Target 3.3: By 2023, raise the percentage of countries with an e-waste legislation to 50%

Target 3.4: By 2023, net telecommunication/ICT-enabled greenhouse gas abatement should have increased by 30% compared to the 2015 baseline

Target 3.5: By 2023, all countries should have a national emergency telecommunication plan as part of their national and local disaster risk reduction strategies

Goal 4: Innovation

Target 4.1: By 2023, all countries should have policies/strategies fostering telecommunication/ICT-centric innovation

Goal 5: Partnership

Target 5.1: By 2023, increased effective partnerships with stakeholders and cooperation with other organizations and entities in the telecommunication/ICT environment

1.6 Strategic risk management

Bearing in mind the prevailing challenges, evolutions and transformations that have the most potential to impact on ITU activities during the period of the strategic plan, the list of top-level strategic risks presented in Table 2 below has been identified, analysed and evaluated. These risks have been considered when planning the strategy for 2020-2023, and the corresponding mitigation measures have been identified as necessary. It should be emphasized that the strategic risks are not meant to represent deficiencies of ITU's operations. They represent forward-looking uncertainties that may affect efforts to fulfil the mission of the Union during the period of the strategic plan.

ITU has identified, analysed and assessed these strategic risks. Apart from the strategic planning processes, setting the overall framework on how to mitigate these risks, operational mitigation measures will be defined and implemented through the operational planning process of the Union.

Table 2: Strategic risks and mitigation strategies

Risk	Mitigation strategy
<p>1 Diminishing relevance and ability to demonstrate clear added value</p> <ul style="list-style-type: none"> – Risk of duplication of efforts and inconsistencies inside the organization that affects our ability to demonstrate added value – Risk of conflicting efforts, inconsistencies and competition with other relevant organizations and bodies that leads to misperception of ITU's mandate, mission and role 	<ul style="list-style-type: none"> – Risk avoidance: By clear mandates of each structure and role in the Union – Risk limitation: Improve the cooperation framework – Risk avoidance: Identify and concentrate on areas with clear added value – Risk transfer: By establishing long-term partnerships – Risk limitation: By an appropriate and consistent communication strategy (internal and external)

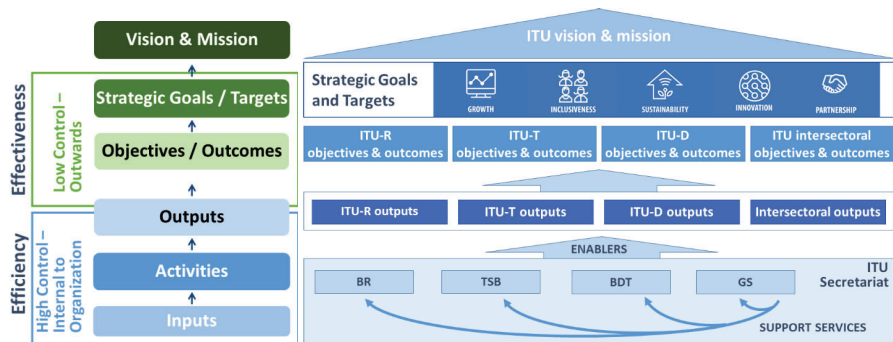

Risk	Mitigation strategy
2 Spreading too thin – Risk of mission dilution and losing sight of the organization’s core mandate	– Risk avoidance: By prioritizing, focusing and building on the strengths of the Union – Risk limitation: By ensuring consistency of ITU activities / working outside silos
3 Failure to respond quickly to emerging needs and innovate sufficiently while still providing high-quality deliverables – Risk of unresponsiveness, leading to disengagement of the membership and other stakeholders – Risk of being left behind – Risk of lower quality deliverables	– Risk avoidance: Plan for the future while being agile, responsive and innovative , focus on purposes of the Union – Risk limitation: Define, promote and implement a fit-for-purpose organizational culture – Risk transfer: proactively engage stakeholders
4 Concerns regarding trust and confidence – Risk of rising concerns related to trust on the part of the membership and stakeholders – Risk of rising concerns on confidence within membership	– Risk avoidance: Adopt and implement common values – all actions guided by the adopted values – Risk limitation: Engage with the membership and other stakeholders, improve communication and transparency, commit to the values , and promote ownership of strategic initiatives; ensure adherence to the core mission and goals and organizational procedures

Risk	Mitigation strategy
5 Inadequate internal structures, tools, methodology and processes – Risk of structures, methods and tools becoming inadequate, failing to be effective	– Risk limitation: Optimize internal structures, improve tools, methodologies and processes – Risk transfer: Initiate processes for quality control – Risk limitation: Improve internal and external communication
6 Insufficient funding – Risk of reduced financial contributions and sources of revenue	– Risk limitation: Identify and explore new markets and players; prioritization of core activities – Risk limitation: Ensure effective financial planning – Risk limitation: Membership engagement strategies – Risk transfer: Increase the relevance of ITU activities

2 ITU results framework

ITU will implement the strategic goals of the Union for 2020-2023 through a number of objectives to be attained in this period. Each Sector will contribute to the overarching goals of the Union in the context of its specific remit, through implementation of the Sector-specific objectives and the overarching inter-Sectoral objectives. The ITU Council will ensure efficient coordination and oversight of this work.

The enablers support the overall objectives and strategic goals of the Union. The activities and support services of the General Secretariat and the Bureaux provide these enablers to the work of the Sectors and the whole Union.

ITU-R objectives:

- R.1 Spectrum/orbit regulation and management: Meet, in a rational, equitable, efficient, economical and timely way, the ITU membership's requirements for radio-frequency spectrum and satellite-orbit resources, while avoiding harmful interference
- R.2 Radiocommunication standards: Provide for worldwide connectivity and interoperability, improved performance, quality, affordability and timeliness of service and overall system economy in radiocommunications, including through the development of international standards
- R.3 Knowledge-sharing: Foster the acquisition and sharing of knowledge and know-how on radiocommunications

ITU-T objectives:

- T.1 Development of standards: Develop non-discriminatory international standards (ITU-T recommendations), in a timely manner, and foster interoperability and improved performance of equipment, networks, services and applications

- T.2 Bridging the standards gap: Promote the active participation of the membership, in particular developing countries, in the definition and adoption of non-discriminatory international standards (ITU-T recommendations) with a view to bridging the standardization gap
- T.3 Telecommunication resources: Ensure effective allocation and management of international telecommunication numbering, naming, addressing and identification resources in accordance with ITU-T recommendations and procedures
- T.4 Knowledge-sharing: Foster the acquisition, awareness and sharing of knowledge and know-how on the standardization activities of ITU-T
- T.5 Cooperation with standardization bodies: Extend and facilitate cooperation with international, regional and national standardization bodies

ITU-D objectives:

- D.1 Coordination: Foster international cooperation and agreement on telecommunication/ICT development issues
- D.2 Modern and secure telecommunication/ICT infrastructure: Foster the development of infrastructure and services, including building confidence and security in the use of telecommunications/ICTs
- D.3 Enabling environment: Foster an enabling policy and regulatory environment conducive to sustainable telecommunication/ICT development
- D.4 Inclusive information society: Foster the development and use of telecommunications/ICTs and applications to empower people and societies for sustainable development

Inter-Sectoral objectives:

- I.1 Collaboration: Foster closer collaboration among all stakeholders in the telecommunication/ICT ecosystem
- I.2 Emerging telecommunication/ICT trends: Enhance identification, awareness and analysis of digital transformation and emerging trends in the telecommunication/ICT environment
- I.3 Telecommunication/ICT accessibility): Enhance telecommunication/ICT accessibility for persons with disabilities and persons with specific needs
- I.4 Gender equality and inclusion: Enhance the use of telecommunications/ICTs for gender equality and inclusion and empowerment of women and girls
- I.5 Environmental sustainability: Leverage telecommunications/ICTs to reduce the environmental footprint
- I.6 Reducing overlap and duplication: Reduce the areas of overlap and duplication and foster closer and more transparent coordination among the General Secretariat and ITU Sectors, taking into account the Union's budgetary provisions and the expertise and mandate of each Sector

Table 3: Linkage of ITU objectives with the strategic goals¹:

2.1 Objectives, outcomes and outputs/enablers

Table 4: ITU-R objectives, outcomes and outputs

R.1 Spectrum/orbit regulation and management: Meet, in a rational, equitable, efficient, economical and timely way, the ITU membership's requirements for radio-frequency spectrum and satellite-orbit resources, while avoiding harmful interference

Outcomes

- R.1-a: Increased number of countries having satellite networks and earth stations recorded in the Master International Frequency Register (MIFR)
- R.1-b: Increased number of countries having terrestrial frequency assignments recorded in the MIFR
- R.1-c: Increased percentage of assignments recorded in the MIFR with a favourable finding
- R.1-d: Increased percentage of countries which have completed the transition to digital terrestrial television broadcasting
- R.1-e: Increased percentage of spectrum assigned to satellite networks which is free from harmful interference
- R.1-f: Increased percentage of assignments to terrestrial services recorded in the MIFR which are free from harmful interference

Outputs

- R.1-1: Final acts of world radiocommunication conferences, updated Radio Regulations
- R.1-2: Final acts of regional radiocommunication conferences, regional agreements
- R.1-3: Rules of Procedure and other decisions of the Radio Regulations Board (RRB)
- R.1-4: Publication of space notices and other related activities
- R.1-5: Publication of terrestrial notices and other related activities

R.2 Radiocommunication standards: Provide for worldwide connectivity and interoperability, improved performance, quality, affordability and timeliness of service and overall system economy in radiocommunications, including through the development of international standards

Outcomes

R.2-a: Increased mobile-broadband access and use, including in frequency bands identified for international mobile telecommunications (IMT)

R.2-b: Reduced mobile-broadband price basket, as a percentage of gross national income (GNI) per capita

R.2-c: Increased number of fixed links and increased amount of traffic handled by the fixed service (Tbit/s)

R.2-d: Increased number of households with digital terrestrial television reception

R.2-e: Increased number of satellite transponders (equivalent 36 MHz) on communication satellites in operation and corresponding capacity (Tbit/s); number of VSAT terminals; number of households with satellite television reception

R.2-f: Increased number of devices with radionavigation-satellite reception

R.2-g: Increased number of satellites having Earth exploration payloads in operation, corresponding quantity and resolution of transmitted images and data volume downloaded (Tbytes)

Outputs

R.2-1: Decisions of the Radiocommunication Assembly, ITU-R resolutions

R.2-2: ITU-R recommendations, reports (including the CPM report) and handbooks

R.2-3: Advice from the Radiocommunication Advisory Group

R.3 Knowledge sharing: Foster the acquisition and sharing of knowledge and know-how on radiocommunications

Outcomes

R.3-a: Increased knowledge and know-how on the Radio Regulations, Rules of Procedure, regional agreements, recommendations and best practices on spectrum use

R.3-b: Increased participation in ITU-R activities (including through remote participation), in particular by developing countries

Outputs

R.3-1: ITU-R publications

R.3-2: Assistance to members, in particular developing countries and least developed countries

R.3-3: Liaison/support to development activities

R.3-4: Seminars, workshops and other events

Table 5: Enablers for ITU-R

Supported objective(s)		BR activities	Contribution to the outcomes of the Sector	Results
R.1, R.3	R.2,	Efficient processing of frequency assignment notices	Increased certainty for planning new radiocommunication networks	Reduced processing time for publication of notices Processing time within regulatory limits
		Development, maintenance and improvement of ITU-R software, databases and online tools Technical, regulatory, administrative, outreach and logistical activities in support of ITU-R objectives	Increased reliability, efficiency and transparency in the application of the Radio Regulations	New and improved ITU-R software, databases and online tools Efficient and timely delivery of ITU-R outputs and support to ITU-R objectives BR contributions to ITU-R meetings, conferences and events

Table 6: ITU-T objectives, outcomes and outputs**T.1 Development of standards: Develop non-discriminatory international standards (ITU-T recommendations), in a timely manner, and foster interoperability and improved performance of equipment, networks, services and applications***Outcomes*

- T.1-a: Increased utilization of ITU-T recommendations
- T.1-b: Improved conformance to ITU-T recommendations
- T.1-c: Enhanced standards in new technologies and services

Outputs

- T.1-1: Resolutions, recommendations and opinions of the World Telecommunication Standardization Assembly (WTSA)
- T.1-2: WTSA regional consultation sessions
- T.1-3: Advice and decisions of the Telecommunication Standardization Advisory Group (TSAG)
- T.1-4: ITU-T recommendations and related results of ITU-T study groups
- T.1-5: ITU-T general assistance and cooperation
- T.1-6: Conformity database
- T.1-7: Interoperability test centres and events
- T.1-8: Development of test suites

T.2 Bridging the standards gap: Promote the active participation of the membership, in particular developing countries, in the definition and adoption of non-discriminatory international standards (ITU-T recommendations) with a view to bridging the standardization gap*Outcomes*

- T.2-a: Increased participation in the ITU-T standardization process, including attendance of meetings, submission of contributions, taking leadership positions and hosting of meetings/workshops, especially from developing countries
- T.2-b: Increase in the ITU-T membership, including Sector Members, Associates and Academia

Outputs

- T.2-1: Bridging the standardization gap
- T.2-2: Workshops and seminars, including offline and online training activities, complementing the capacity-building work on bridging the standardization gap
- T.2-3: Outreach and promotion

T.3 Telecommunication resources: Ensure effective allocation and management of international telecommunication numbering, naming, addressing and identification resources in accordance with ITU-T recommendations and procedures

Outcomes

T.3-a: Timely and accurate allocation of international telecommunication numbering, naming, addressing and identification resources, as specified in the relevant recommendations

Outputs

T.3-1: Relevant TSB databases

T.3-2: Allocation and management of international telecommunication numbering, naming, addressing and identification resources in accordance with ITU-T recommendations and procedures

T.4 Knowledge-sharing: Foster the acquisition, awareness and sharing of knowledge and know-how on the standardization activities of ITU-T

Outcomes

T.4-a: Increased knowledge on ITU-T standards and on best practices in their implementation

T.4-b: Increased participation in ITU-T's standardization activities and increased awareness of the relevance of ITU-T standards

T.4-c: Increased Sector visibility

Outputs

T.4-1: ITU-T publications

T.4-2: Database publications

T.4-3: Outreach and promotion

T.4-4: ITU Operational Bulletin

T.5 Cooperation with standardization bodies: Extend and facilitate cooperation with international, regional and national standardization bodies

Outcomes

T.5-a: Increased communications with other standards organizations

T.5-b: Decreased number of conflicting standards

T.5-c: Increased number of memoranda of understanding/collaboration agreements with other organizations

T.5-d: Increased number of ITU-T A.4, A.5 and A.6 qualified organizations

T.5-e: Increased number of workshops/events organized jointly with other organizations

Outputs

T.5-1: Memoranda of understanding (MoUs) and collaboration agreements

T.5-2: ITU-T A.4/A.5/A.6 qualifications

T.5-3: Jointly organized workshops/events

Table 7: Enablers for ITU-T

Supported ITU-T objective(s)	TSB activities	Contribution to the outcomes of the Sector	Results
T.1	<ul style="list-style-type: none"> – Timely and efficient provisioning of documents (WTSA resolutions, recommendations, opinions, ITU-T recommendations, study group related documents, reports) – Secretariat support and organization and logistical support for meetings – Advisory services – TSB EWM services and information services – Operation and maintenance of C&I databases; logistical support for interoperability/testing events, testbeds 	<ul style="list-style-type: none"> – Increased quality of ITU-T recommendations 	<ul style="list-style-type: none"> – Timely up-to-date information for delegates and the standards community about ITU-T's products and services

- | | | | |
|------------|--|---|---|
| T.2 | <ul style="list-style-type: none"> – Organization of BSG hands-on training sessions; fellowship financial support; logistical support of regional groups – Organization of workshops – Announcements (ITU newsblog, promotional activities) – Account management of ITU-T memberships, retention of current members and proactive acquisition of new members | <ul style="list-style-type: none"> – Increased ITU-T membership and participation in the standardization process | <ul style="list-style-type: none"> – Active participation of delegates and organizations that have so far only participated passively in ITU-T activities, or not at all |
| T.3 | <ul style="list-style-type: none"> – Processing and publication of international numbering, addressing, naming and identification applications/resources | <ul style="list-style-type: none"> – Timeliness and accuracy in the allocation of the resources | <ul style="list-style-type: none"> – Timely availability of numbering information facilitates management of networks |
| T.4 | <ul style="list-style-type: none"> – ITU-T publication services – Development and maintenance of ITU-T databases – Outreach and promotion service (ITU newsblog, social media, web) – Organization of workshops, CTO group meetings, Kaleidoscope, sessions at ITU Telecom, WSIS, etc. | <ul style="list-style-type: none"> – Increased knowledge and awareness on ITU-T standards, increased participation in ITU-T activities and increased Sector visibility | <ul style="list-style-type: none"> – Timely availability of publications (documents; databases) and easy-to-use services enhances the delegate experience |

T.5

- Maintenance and management of MoUs; establishment of new MoUs
- Maintenance and management of A.4/A.5/A.6 database
- Logistical support for jointly organized workshops and events
- Support services for various collaboration activities (WSC, GSC, CITS, FIGI, WSIS, U4SSC ...)
- Increased cooperation with other organizations
- Collaboration activities

Table 8: ITU-D objectives, outcomes and outputs

D.1 Coordination: Foster international cooperation and agreement on telecommunication/ICT development issues

<i>Outcomes</i>	<i>Outputs²</i>
D.1-a: Enhanced review and increased level of agreement on the draft ITU-D contribution to the draft ITU strategic plan, the World Telecommunication Development Conference (WTDC) Declaration, and the WTDC action plan	D.1-1: World Telecommunication Development Conference (WTDC) and WTDC final report
D.1-b: Assessment of the implementation of the WTDC action plan and of the WSIS Plan of Action	D.1-2: Regional preparatory meetings (RPMs) and final report of the RPMs
D.1-c: Enhanced knowledge-sharing, dialogue and partnership among the ITU membership on telecommunication/ICT issues	D.1-3: Telecommunication Development Advisory Group (TDAG) and TDAG reports for the Director of BDT and for WTDC
D.1-d: Enhanced process and implementation of telecommunication/ICT development projects and regional initiatives	D.1-4: Study groups and guidelines, recommendations and reports of study groups
	D.1-5: Platforms for regional coordination, including regional development forums (RDFs)
D.1.e: Facilitation of agreement to cooperate on telecommunication/ICT development programmes between Member States, and between Member States and other stakeholders in the ICT ecosystem, based on requests from ITU Member States involved	D.1-6: Implemented telecommunication/ICT development projects and services related to regional initiatives.

² Within the context of the outputs of the ITU-D contribution to the ITU strategic plan, "products and services" refers to activities within the mandate of ITU-D as defined by Article 21 of the ITU Constitution, including, among others, capacity building and dissemination of ITU expertise and knowledge

D.2 Modern and secure telecommunication/ICT Infrastructure: Foster the development of infrastructure and services, including building confidence and security in the use of telecommunications/ICTs

Outcomes

D.2-a: Enhanced capacity of the ITU membership to make available resilient telecommunication/ICT infrastructure and services

D.2-b: Strengthened capacity of Member States to effectively share information, find solutions, and respond to threats to cybersecurity, and to develop and implement national strategies and capabilities, including capacity building, encouraging national, regional and international cooperation towards enhanced engagement among Member States and relevant players

D.2-c: Strengthened capacity of Member States to use telecommunications/ICTs for disaster risk reduction and management, to ensure availability of emergency telecommunications, and support cooperation in this area

Outputs

D.2-1: Products and services on telecommunication/ICT infrastructure and services, wireless and fixed broadband, connecting rural and remote areas, improving international connectivity, bridging the digital standardization gap, conformance and interoperability, spectrum management and monitoring, the effective and efficient management and proper use of telecommunication resources, within the mandate of ITU, and the transition to digital broadcasting, such as assessment studies, publications, workshops, guidelines, and best practices

D.2-2: Products and services for building confidence and security in the use of telecommunications/ICTs, such as reports and publications, and for contributing to the implementation of national and global initiatives

D.2-3: Products and services on disaster risk reduction and management and emergency telecommunications, including assistance to enable Member States to address all phases of disaster management, such as early warning, response, relief and restoration of telecommunication networks

D.3 Enabling Environment: Foster an enabling policy and regulatory environment conducive to sustainable telecommunication/ICT development

Outcomes

D.3-a: Strengthened capacity of Member States to enhance their policy, legal and regulatory frameworks conducive to development of telecommunications/ICTs

D.3-b: Strengthened capacity of Member States to produce high-quality, internationally comparable telecommunication/ICT statistics which reflect developments and trends in telecommunications/ICTs, based on agreed standards and methodologies

D.3-c: Improved human and institutional capacity of the ITU membership to tap into the full potential of telecommunications/ICTs

D.3-d: Strengthened capacity of the ITU membership to integrate telecommunication/ICT innovation and digitalization in national development agendas and to develop strategies to promote innovation initiatives, including through public, private and public-private partnerships

Outputs

D.3-1: Products and services on telecommunication/ICT policy and regulation for better international coordination and coherence, such as assessment studies and other publications, and other platforms to exchange information

D.3-2: Products and services on telecommunication/ICT and digitalization statistics and data analysis, such as research reports, collection, harmonization and dissemination of high-quality, internationally comparable statistical data, and forums of discussion

D.3-3: Products and services on capacity building and human skills development, including those on international Internet governance, such as online platforms, distance and face-to-face training programmes to enhance practical skills and shared material, taking into account partnerships with telecommunication/ICT education stakeholders

D.3-4: Products and services on telecommunication/ICT innovation, such as knowledge-sharing and assistance, upon request, on developing a national innovation agenda; mechanisms for partnerships; development of projects, studies and telecommunication/ICT innovation policies

D.4 Inclusive information society: Foster the development and use of telecommunications/ICTs and applications to empower people and societies for sustainable development

Outcomes

D.4-a: Improved access to and use of telecommunications/ICTs in least developed countries (LDCs), small island developing states (SIDS) and landlocked developing countries (LLDCs), and countries with economies in transition

D.4-b: Improved capacity of the ITU membership to accelerate economic and social development by leveraging and using new technologies and telecommunication/ICT services and applications

D.4-c: Strengthened capacity of the ITU membership to develop strategies, policies and practices for digital inclusion, in particular for the empowerment of women and girls, persons with disabilities and other persons with specific needs

D.4-d: Enhanced capacity of the ITU membership to develop telecommunication/ICT strategies and solutions on climate-change adaptation and mitigation and the use of green/renewable energy

Outputs

D.4-1: Products and services on concentrated assistance to LDCs, SIDS and LLDCs and countries with economies in transition, to foster the availability and affordability of telecommunications/ICTs

D.4-2: Products and services on telecommunication/ICT policies supporting the development of the digital economy, ICT applications and new technologies, such as information sharing and support for their deployment, assessment studies and toolkits

D.4-3: Products and services on digital inclusion for girls and women and people with specific needs (elderly, youth, children and indigenous people, among others), such as awareness-raising on digital inclusion strategies, policies and practices, development of digital skills, toolkits and guidelines and forums of discussion to share practices and strategies

D.4-4: Products and services on ICT climate-change adaptation and mitigation, such as promotion of strategies and dissemination of best practices on mapping vulnerable areas and developing information systems, metrics, and e-waste management

Table 9: Enablers for ITU-D

Supported objective(s)	BDT activities	Contribution to the outcomes of the Sector	Results
D.1, D.2, D.3, D.4	1) Development and implementation of efficient strategies in telecommunication/ICT development towards achieving WSIS action lines and Sustainable Development Goals (SDGs), including communication and promotion activities	<ul style="list-style-type: none">– Increased understanding and sharing of the ITU-D objectives and outputs– Increased guidance for ITU-D activities– Increased clarity of the programme of activities	<ul style="list-style-type: none">– Measurable progress towards ITU's role in achieving WSIS action lines and SDGs– Increased level of international cooperation in the area of telecommunication/ICT development– Increased level of satisfaction of Member States with services and products provided by BDT
	2) Efficient administration of and support to telecommunication/ICT development activities through coordination of and collaboration among services, finance and budget administration, event organization support and IT support	<ul style="list-style-type: none">– Clear and coordinated scheduling of events– Provision of necessary financial, IT and manpower support within available resource limits– Provision of reliable support to events	<ul style="list-style-type: none">– Enhanced coordination and collaboration in organizing events and implementing activities– Efficient use of financial resources– Timely and efficient organization of events– Increased quality and coordination of BDT's reporting to Member States

- | | | |
|--|---|--|
| 3) Efficient organization of and support to activities on telecommunication/ICT infrastructure, ICT applications and cybersecurity | <ul style="list-style-type: none"> – Identification of priorities and needs of Member States – Development of relevant products and services and their timely delivery to end users – Effective involvement of all relevant stakeholders in the development and delivery of products and services to Member States | <ul style="list-style-type: none"> – Increased quality and enhanced accessibility of products, services and expertise developed and delivered by BDT in the areas of telecommunication/ICT infrastructure, ICT applications, and cybersecurity – Increased level of satisfaction of Member States – Tangible improvements in ITU Member States as a result of BDT's activities in the areas of telecommunication/ICT infrastructure, ICT applications and cybersecurity – Enhanced role of telecommunications/ICTs in the social and economic development of Member States |
| 4) Efficient organization of and support to activities on projects and knowledge management through capacity building, project support, ICT data and statistics, and emergency telecommunication support | <ul style="list-style-type: none"> – Identification of priorities and needs of Member States – Development of relevant products and services and their timely delivery to end users – Effective involvement of all relevant stakeholders in the development and delivery of products and services to Member States | <ul style="list-style-type: none"> – Increased quality and enhanced accessibility of products, services, and expertise developed and delivered by BDT in the areas of projects and knowledge management – Increased level of satisfaction of Member States – Tangible improvements in ITU Member States as a result of BDT's activities in the areas of projects and knowledge management – Successful mitigation of emergency telecommunication risks |

- | | | |
|---|---|--|
| 5) Efficient organization of and support to innovation and partnership activities through partnership building, innovation, and study group coordination services | <ul style="list-style-type: none"> - Identification of priorities and needs of Member States - Development of relevant products and services and their timely delivery to end users - Effective involvement of all relevant stakeholders in the development and delivery of products and services to Member States | <ul style="list-style-type: none"> - Increased quality and enhanced accessibility of products, services, and expertise developed and delivered by BDT in the areas of partnership building and innovation - Increased level of satisfaction of Member States - Wider participation of stakeholders and partners in the development of telecommunications/ICTs in developing countries - Increased level of resources from donors for the benefit of Member States' efforts to develop their telecommunication/ICTs |
| 6) Efficient delivery and coordination of activities in telecommunication/ICT development through regional and area office activities | <ul style="list-style-type: none"> - Increased ITU outreach in various regions and areas of the world | <ul style="list-style-type: none"> - Effective and efficient delivery of products, services, information and expertise of BDT and ITU to Member States - Increased level of satisfaction of Member States with services and products provided by BDT |

Table 10: Inter-Sectoral objectives, outcomes and outputs**I.1 Collaboration: Foster closer collaboration among all stakeholders in the telecommunication/ICT ecosystem***Outcomes*

I.1-a: Increased collaboration among relevant stakeholders

I.1-b: Increased synergies from partnerships on telecommunications/ICTs

I.1-c: Increased recognition of telecommunications/ICTs as a cross-cutting enabler for implementing the WSIS action lines and the 2030 Agenda for Sustainable Development

I.1-d: Enhanced support to the ITU membership in developing and delivering ICT products and services

Outputs

I.1-1: Inter-Sectoral world conferences, forums, events and platforms for high-level debate

I.1-2: Knowledge-sharing, networking and partnerships

I.1-3: Memoranda of understanding (MoUs)

I.1-4: Reports and other inputs to UN inter-agency, multilateral and intergovernmental processes

I.1-5: Establishment of support services for the ITU membership in ITU activities and events

I.2 Emerging telecommunication/ICT trends: Enhance identification, awareness and analysis of digital transformation and emerging trends in the telecommunication/ICT environment*Outcomes*

I.2-a: Identification, awareness and analysis of digital transformation and emerging trends in telecommunications/ICTs

Outputs

I.2-1: Inter-Sectoral initiatives and reports on relevant emerging telecommunication/ICT trends and other similar initiatives

I.2-2: ITU News digital format

I.2-3: Platforms to exchange information about new trends

I.3 Telecommunication/ICT accessibility: Enhance telecommunication/ICT accessibility for persons with disabilities and persons with specific needs

Outcomes

I.3-a: Increased availability and compliance of telecommunication/ICT equipment, services and applications with universal design principles

I.3-b: Increased engagement of organizations of persons with disabilities and persons with specific needs in the work of the Union

I.3-c: Increased awareness, including multilateral and intergovernmental recognition, of the need to enhance access to telecommunications/ICTs for persons with disabilities and persons with specific needs

Outputs

I.3-1: Reports, guidelines, standards and checklists relating to accessibility of telecommunications/ICTs

I.3-2: Mobilization of resources and technical expertise, for example, through promoting greater participation in international and regional meetings by persons with disabilities and persons with specific needs

I.3-3: Further development and implementation of the ITU Accessibility Policy and related plans

I.3-4: Advocacy, both at UN level and at regional and national levels

I.4 Gender equality and inclusion: Enhance the use of telecommunications/ICTs for gender equality and inclusion and empowerment of women and girls

Outcomes

I.4-a: Enhanced access to and use of telecommunications/ICTs to promote the empowerment of women

I.4-b: Enhanced participation of women at all levels of decision-making in the work of the Union and the telecommunication/ICT sector

I.4-c: Increased engagement with other UN organizations and stakeholders involved in using telecommunications/ICTs to promote the empowerment of women

I.4-d: Full implementation of the UN system-wide strategy on gender parity within ITU's remit

Outputs

I.4-1: Toolkits, assessment tools and guidelines for policy development and skills development and other practices for implementation

I.4-2: Networks, collaboration, initiatives and partnerships

I.4-3: Advocacy, both at UN level and at regional and national levels

I.4-4: Support the EQUALS partnership

I.5 Environmental sustainability: Leverage telecommunications/ICTs to reduce the environmental footprint

Outcomes

- I.5-a: Improved efficiency of environmental policies and standards
- I.5-b: Reduced energy consumption from telecommunication/ICT applications
- I.5-c: Increasing amount of recycled e-waste
- I.5-d: Improved solutions for smart sustainable cities

Outputs

- I.5-1: Energy efficiency policies and standards
- I.5-2: Safety and environmental performance of ICT equipment and facilities (e-waste management)
- I.5-3: Global platform for smart sustainable cities, including development of KPIs

I.6 Reducing overlap and duplication: Reduce the areas of overlap and duplication and foster closer and more transparent coordination among the General Secretariat and ITU Sectors, taking into account the Union's budgetary provisions and the expertise and mandate of each Sector

Outcomes

- I.6-a: Closer and more transparent collaboration among the ITU Sectors, the General Secretariat and the three Bureaux
- I.6-b: Reducing the areas of overlap and duplication among the ITU Sectors and the work of the General Secretariat and the three Bureaux
- I.6-c: Savings through avoidance of areas of overlap

Outputs

- I.6-1: Process to identify and eliminate all forms and instances of duplication of functions and activities between all ITU structural bodies, optimizing, inter alia, management methods, logistics, coordination and support by the secretariat
- I.6-2: Implement the concept of "One ITU", harmonizing, to the extent feasible, procedures across Sectors and regional offices/the regional presence in the implementation of goals and objectives of the ITU and Sectors

Table 11: General Secretariat enablers/support services

Supported objective(s)	GS activities	Contribution to the outcomes	Results
All	Management of the Union	<ul style="list-style-type: none"> – Effective and efficient governance of the organization – Effective coordination among the Sectors of the Union 	<ul style="list-style-type: none"> – Improved internal coordination – Management of the strategic risks of the organization – Decisions of the governing bodies being implemented – Development, implementation and monitoring of the strategic and operational Plans – Level of implementation of accepted recommendations – Application of efficiency measures – Overall quality of support services provided
All	Event management services (including translation and interpretation)	<ul style="list-style-type: none"> – Efficient and accessible ITU conferences, meetings, events and workshops 	<ul style="list-style-type: none"> – High quality of services provided for ITU events (availability of documents, courtesy and professionalism of ITU's conference service staff, quality of interpretation, quality of documents, quality of conference premises and facilities) – Improved financial efficiency

All	Publication services	<ul style="list-style-type: none"> – Ensuring the quality, availability and cost effectiveness of ITU publications 	<ul style="list-style-type: none"> – High quality of ITU publications – Expeditious publishing process – Improved financial efficiency
All	ICT services	<ul style="list-style-type: none"> – Reliable, efficient and accessible ICT infrastructures and services 	<ul style="list-style-type: none"> – Users satisfied with the ICT services provided by ITU – Availability and functionality of ICT services (high availability, IT safety and security, library and archive services, delivery of promised services on a timely basis, help provided in using technology effectively, introduction of new and innovative ICT services, ICT services valuable to ITU staff and delegates) – Increased number of platforms/systems facilitating the digital transformation of the organization – Business continuity and disaster recovery in place

All	Safety and security services	Ensuring a safe and secure working environment for ITU staff and delegates	<ul style="list-style-type: none"> – Overall safety and security of the organization's premises and assets worldwide – Reduced work-related injuries or incidents – Staff preparedness for missions
All	Human resources management services (including payroll, staff administration, staff well-being, organization design and recruitment, planning and development)	– Ensuring efficient use of human resources, in a work-conducive environment	<ul style="list-style-type: none"> – Develop and implement the HR framework fostering a sustainable and satisfied workforce, including the elements of career development and training – Workforce adapted to the evolving environment and the evolving needs of the organization – Expeditious recruitment processes – Gender parity among ITU employees / gender parity in ITU statutory committees

All	Financial resources management services (including budget and financial analysis, accounts, procurement, travel)	<ul style="list-style-type: none"> – Ensuring efficient planning and use of financial and capital resources 	<ul style="list-style-type: none"> – IPSAS compliance and unqualified annual audit of accounts – Procurement and travel services: ITU guidelines and UN good practices in place – No overspend in budget implementation – Cost savings from efficiency measures implemented
All	Legal services	<ul style="list-style-type: none"> – Provision of legal advice – Ensuring adherence to rules and procedures 	<ul style="list-style-type: none"> – Interests, integrity and reputation of the Union protected – Rules and regulations applied
All	Internal audit	<ul style="list-style-type: none"> – Ensuring efficient and effective governance and management controls 	<ul style="list-style-type: none"> – Internal audit recommendations being implemented
All	Ethics office	<ul style="list-style-type: none"> – Promoting the highest standards of ethical behaviour 	<ul style="list-style-type: none"> – Adherence to the Standards of Conduct for the International Civil Service and the ITU Code of Ethics

All	Engagement with the membership/Membership support services	<ul style="list-style-type: none"> – Ensuring efficient membership-related services 	<ul style="list-style-type: none"> – Increased number of members – Increased membership satisfaction – Increased revenue from Sector Members, Associates and Academia
All	Communication services	<ul style="list-style-type: none"> – Ensuring effective communication services 	<ul style="list-style-type: none"> – Increased regular engagement of key stakeholders on ITU digital platforms – Improved media coverage of ITU – Improved perception of the work of ITU – Improved traffic on ITU multimedia channels (Flickr, YouTube, etc.) – Increase in ITU news traffic and engagement – Increase in social media engagement and referrals
All	Protocol services	<ul style="list-style-type: none"> – Ensuring efficient management of protocol services 	<ul style="list-style-type: none"> – Increased satisfaction of delegates and visitors

All	Facilitation of the work of governing bodies (Plenipotentiary Conference, Council, CWGs)	– Supporting and facilitating the decision-making processes of the governing bodies	– Improved efficiency of the governing bodies meetings
All	Facilities management services	– Ensuring efficient management of ITU premises	– Efficient management of the process of developing the new ITU building – Cost savings in managing ITU facilities – ITU to remain a carbon-neutral organization
All	Content development and management services/Corporate strategic management and planning	– Ensuring efficient planning – Strategic advice to senior management	– Approval of the ITU planning instruments by the membership – Support to the development of strategic initiatives

Inter-Sectoral objectives I.1, I.2	Coordination and cooperation in promoting telecommunications/ICTs that contribute to the WSIS action lines and the 2030 Agenda for Sustainable Development	<ul style="list-style-type: none"> – Increased synergies, collaboration, transparency and internal communication on the partnerships developed and the activities undertaken on international cooperation for the promotion of ICT for SDGs – Better coordination of the organization of ITU events and meetings – Increased consistency for planning participation in conferences and forums – New and improved measures and mechanisms with a view to increasing the efficiency and effectiveness of the organization – Coordinated ITU work and contribution to the WSIS action lines and the 2030 Agenda for Sustainable Development
---------------------------------------	--	---

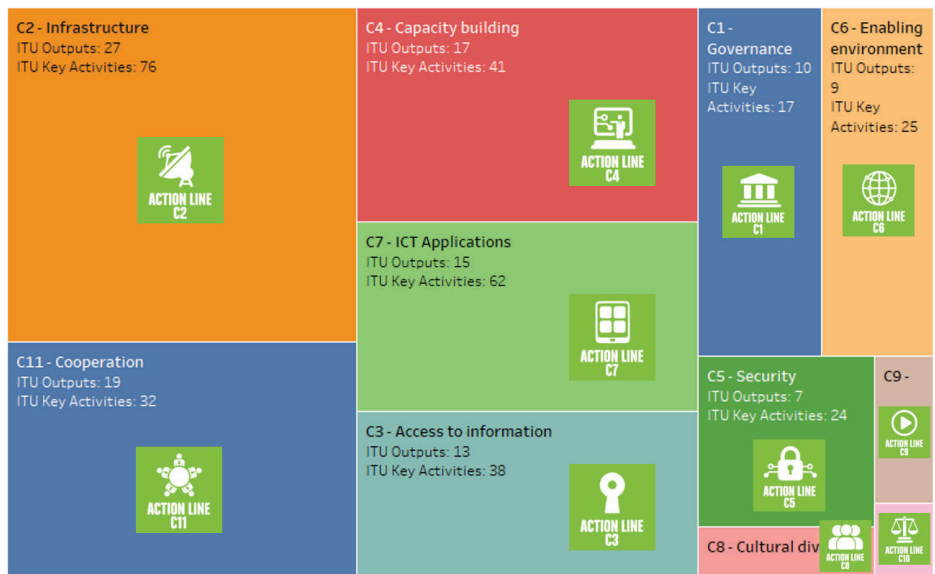

- | | | | |
|--|--|---|---|
| Inter-Sectoral objectives I.3, I.4, I.5, I.6 | Coordination and cooperation in areas of mutual interest (including accessibility, gender, environmental sustainability) | <ul style="list-style-type: none"> – Coordinated work in areas of mutual interest, promoting synergies and introducing efficiencies and savings in the use of ITU resources – Increased consistency for planning participation in conferences and forums – Increased internal communication on the activities undertaken on all thematic areas – Better coordination of the organization of ITU events and meetings | <ul style="list-style-type: none"> – Implementation of the consolidated annual work plan for each thematic area – New and improved measures and mechanisms with a view to increasing the efficiency and effectiveness of the organization |
|--|--|---|---|

3 Linkage with the WSIS action lines and the 2030 Agenda for Sustainable Development

Linkage with the WSIS action lines

ITU has a leading role in the WSIS process where, as a lead facilitator, along with UNESCO and UNDP, it coordinates the multistakeholder implementation of the Geneva Plan of Action. Notably, ITU is the sole facilitator for three different WSIS action lines: **C2** (Information and communication infrastructure); **C5** (Building confidence and security in the use of ICTs); and **C6** (Enabling environment).

Mapping ITU outputs and key activities to WSIS action lines (based on information from the ITU SDG mapping tool)

Linkage with the Sustainable Development Goals

With the adoption of the United Nations General Assembly resolution on transforming our world: the 2030 Agenda for Sustainable Development, ITU, along with the rest of the UN family, needs to support Member States and contribute to the worldwide efforts to achieve the SDGs. The associated 17 SDGs and 169 related targets offer a holistic vision for the UN system.

The role of ICTs as essential catalysts to fast-forward achievement of the SDGs is clearly highlighted in the 2030 Agenda: "the spread of information and communications technology and global interconnectedness has great potential to accelerate human progress, to bridge the digital divide, and to develop knowledge societies". The Union, as the UN specialized agency for ICTs and global connectivity, has a key role to play in promoting prosperity in our digital world.

In order to maximize its contribution to the 2030 Agenda, ITU's primary focus is in addressing **SDG 9** (Industry, innovation and infrastructure) and target 9.c aiming to significantly increase access to ICTs and provide universal and affordable access to the Internet. Indeed, the infrastructure that powers our world and forms the backbone of the new digital economy is vital. It is essential to so many of the technological applications and potential solutions to the SDGs, and is crucial for making them both global and scalable.

Since **SDG 17** (Partnership for the Goals) highlights ICTs as a means of implementation, with cross-cutting transformative potential, it is imperative that ITU leverage this broad impact. Notable SDGs where ITU has a particularly strong impact include **SDG 11** (Sustainable cities and communities), **SDG 10** (Reduced inequalities), **SDG 8** (Decent work and economic growth), **SDG 1** (No poverty), **SDG 3** (Good health and well-being), **SDG 4** (Quality education) and **SDG 5** (Gender equality).

It is, therefore, through infrastructure and connectivity and in partnership with all stakeholders that ITU will contribute the most towards achieving the remaining SDGs.

Mapping ITU outputs and key activities to SDGs (as per the ITU SDG mapping tool³)

³ ITU SDG mapping tool: <https://www.itu.int/sdgmappingtool>.

ITU is also the custodian of five SDG indicators (4.4.1, 5.b.1, 9.c.1, 17.6.2 and 17.8.1) contributing to UNSTAT's monitoring of the SDGs.

The following table provides a linkage between the five ITU strategic goals for 2020-2023 and the SDGs. SDG indicators with a reference to ICTs are highlighted in bold.

Goal 1 – Growth
SDG target (indicator(s)): 1.4 (1.4.1), 2.4 (2.4.1), 4.1 (4.1.1), 4.2 (4.2.2), 4.3 (4.3.1), 4.4 (4.4.1), 4.A (4.A.1), 5.5 (5.5.1 , 5.5.2), 5.B (5.B.1), 6.1, 6.4 (6.4.1), 7.3 (7.3.1), 8.2 (8.2.1), 8.10 (8.10.2), 9.1, 9.2, 9.3 (9.3.1, 9.3.2), 9.4 (9.4.1), 9.5, 9.C (9.C.1), 11.3 (11.3.2), 11.5 (11.5.2), 11.B (11.B.1, 11.B.2), 13.1 (13.1.2), 13.3 (13.3.2), 17.6 (17.6.1, 17.6.2)
Goal 2 – Inclusiveness
SDG targets (indicator(s)): 1.4 (1.4.1), 1.5 (1.5.3), 2.C (2.C.1), 3.D (3.D.1), 4.1 (4.1.1), 4.2 (4.2.2), 4.3 (4.3.1), 4.4 (4.4.1), 4.5 (4.5.1), 4.6 (4.6.1), 4.7 (4.7.1), 4.A (4.A.1), 4.B (4.B.1), 4.C (4.C.1), 5.1, 5.2 (5.2.1, 5.2.2), 5.3, 5.5 (5.5.1 , 5.5.2), 5.6 (5.6.1, 5.6.2), 5.A (5.A.1, 5.A.2), 5.B (5.B.1), 5.C, 6.1, 6.4 (6.4.1), 7.1 (7.1.1, 7.1.2), 7.B (7.B.1), 8.3 (8.3.1), 8.4 (8.4.2), 8.5 (8.5.1), 8.10 (8.10.2), 9.1, 9.2, 9.3 (9.3.1, 9.3.2), 9.4 (9.4.1), 9.5, 9.A (9.A.1), 9.B (9.B.1), 9.C (9.C.1), 10.2 (10.2.1), 10.6, 10.7 (10.7.1), 10.B (10.B.1), 10.C (10.C.1), 11.1 (11.1.1), 11.2, 11.3 (11.3.2), 11.5 (11.5.2), 11.A, 11.B (11.B.1, 11.B.2), 12.1 (12.1.1), 12.A (12.A.1), 13.1 (13.1.2), 13.3 (13.3.2), 13.A (13.A.1), 13.B (13.B.1), 14.A (14.A.1), 16.2 (16.2.2), 16.8 (16.8.1), 17.3 (17.3.2), 17.6 (17.6.1, 17.6.2), 17.7, 17.8 (17.8.1), 17.9 (17.9.1), 17.18
Goal 3 – Sustainability
SDG targets (indicator(s)): 1.5 (1.5.3), 2.4 (2.4.1), 8.4 (8.4.2), 8.5 (8.5.1), 8.10 (8.10.2), 9.1, 9.2, 9.4 (9.4.1), 9.5, 9.A (9.A.1), 11.6 (11.6.1, 11.6.2), 11.A, 11.B (11.B.1, 11.B.2), 12.1 (12.1.1), 12.2 (12.2.1, 12.2.2), 12.4 (12.4.1, 12.4.2), 12.5 (12.5.1), 12.6 (12.6.1), 12.7 (12.7.1), 12.8 (12.8.1), 12.A (12.A.1), 16.2 (16.2.2), 16.4, 17.7
Goal 4 – Innovation
SDG targets (indicator(s)): 2.4 (2.4.1), 2.C (2.C.1), 3.6 (3.6.1), 3.D (3.D.1), 4.3 (4.3.1), 4.4 (4.4.1), 4.5 (4.5.1), 4.6 (4.6.1), 4.7 (4.7.1), 4.A (4.A.1), 4.B (4.B.1), 5.A (5.A.1, 5.A.2), 6.1, 6.4 (6.4.1), 7.1 (7.1.1, 7.1.2), 7.2 (7.2.1), 7.3 (7.3.1), 8.2 (8.2.1), 8.3 (8.3.1), 8.10 (8.10.2), 9.1, 9.2, 9.3 (9.3.1, 9.3.2), 9.4 (9.4.1), 9.5, 9.A (9.A.1), 9.B (9.B.1), 9.C (9.C.1), 10.5 (10.5.1), 10.C (10.C.1), 11.2, 11.3 (11.3.2), 11.4, 11.5 (11.5.2), 11.6 (11.6.1, 11.6.2), 11.B (11.B.1, 11.B.2), 12.3, 12.5 (12.5.1), 12.A (12.A.1), 12.B (12.B.1), 13.1 (13.1.2), 14.4 (14.4.1), 14.A (14.A.1), 16.3, 16.4, 16.10 (16.10.2), 17.7
Goal 5 – Partnership
SDG targets (indicator(s)): 3.D (3.D.1), 4.4 (4.4.1), 4.7 (4.7.1), 4.A (4.A.1), 4.B (4.B.1), 4.C (4.C.1), 5.1, 5.2 (5.2.1, 5.2.2), 5.3, 5.5 (5.5.1 , 5.5.2), 5.6 (5.6.1, 5.6.2), 5.A (5.A.1, 5.A.2), 5.B (5.B.1), 5.C, 7.B (7.B.1), 8.3 (8.3.1), 8.4 (8.4.2), 9.1, 9.2, 9.3 (9.3.1, 9.3.2), 9.4 (9.4.1), 9.5, 9.A (9.A.1), 9.B (9.B.1), 9.C (9.C.1), 10.5 (10.5.1), 10.6, 10.B (10.B.1), 10.C (10.C.1), 11.1 (11.1.1), 11.2, 11.3 (11.3.2), 11.5 (11.5.2), 11.B (11.B.1, 11.B.2), 12.3, 12.6 (12.6.1), 12.7 (12.7.1), 12.8 (12.8.1), 12.A (12.A.1), 12.B (12.B.1), 13.1 (13.1.2), 13.3 (13.3.2), 16.2 (16.2.2), 16.3, 16.4, 16.8 (16.8.1), 16.10, (16.10.2), 17.6 (17.6.1, 17.6.2), 17.7, 17.8 (17.8.1), 17.9 (17.9.1), 17.18

4 Implementation and evaluation of the strategic plan

The strong and coherent linkage between the Union's strategic, operational and financial planning is ensured by implementing the ITU results-based management (RBM) framework in accordance with Resolutions 71 and 151 (Rev. Dubai, 2018) of the Plenipotentiary Conference.

Results will be the main focus of strategy, planning and budgeting in the ITU RBM framework. Performance monitoring and evaluation, together with risk management, will ensure that the strategic, operational and financial planning processes are based on informed decision-making and appropriate resource allocation.

The ITU performance monitoring and evaluation framework will be further developed according to the strategic framework outlined in the strategic plan for 2020-2023, to measure progress towards achievement of the ITU objectives and outcomes, strategic goals and targets set out therein, evaluating performance and detecting issues that need to be addressed.

The ITU risk-management framework will be further developed, to ensure an integrated approach to the ITU RBM framework set out in the strategic plan for the Union for 2020-2023.

Implementation criteria

Implementation criteria set the framework to enable proper identification of appropriate activities of the Union, so that the objectives, outcomes and strategic goals of the Union are achieved in the most effective and efficient manner. They define the criteria for establishing priorities for the resource-allocation process within the biennial budget of the Union.

The implementation criteria set for the Union's strategy for 2020-2023 are:

- **Adherence to ITU values:** The core values of ITU shall drive priorities and provide the basis for decision-making.
- **Following results-based management principles,** including:
 - **Performance monitoring and evaluation:** Performance in the achievement of the goals/objectives shall be monitored and evaluated in accordance with the operational plans, as approved by the Council, and opportunities for improvement shall be identified, in order to support the decision-making process.
 - **Risk identification, assessment and treatment:** An integrated process to manage uncertain events that may have an impact on the achievement of objectives and goals shall be in place, to enhance informed decision-making.
 - **Results-based budgeting principles:** The budgeting process shall allocate resources on the basis of the goals and objectives to be achieved, as defined within this strategic plan.
 - **Impact-oriented reporting:** Progress towards the achievement of ITU's strategic goals shall be clearly reported, focusing on the impact of the activities of the Union.

- **Implementing efficiently:** Efficiency has become an overarching imperative for the Union. ITU shall assess whether its stakeholders obtain maximum benefit from the services ITU provides, according to the resources available (value for money).
- **Aiming to mainstream United Nations recommendations and apply harmonized business practices,** since ITU is part of the UN system as a UN specialized agency.
- **Working as One ITU:** The Sectors shall work cohesively for the implementation of the strategic plan. The secretariat shall support coordinated operational planning, avoiding redundancies and duplication and maximizing synergies across the Sectors, the Bureaux and the General Secretariat.
- **Long-term development of the organization to sustain performance and relevance of expertise:** Aspiring to the concept of the learning organization, the organization shall continue operating in an interconnected way and to invest further in staff so as to sustainably deliver most value.
- **Prioritization:** It is important to define specific criteria for prioritizing among different activities and initiatives that the Union is willing to undertake. The factors to be considered are the following:
 - **Added value:**
 - Prioritize based on unique value contribution by ITU (outcomes that cannot be achieved otherwise)
 - Be involved where and to the extent that ITU adds significant value
 - Not prioritize activities that other stakeholders can undertake
 - Prioritize based on ITU's available expertise for implementation.
 - **Impact and focus:**
 - Focus on maximum impact for the wider constituency, while considering inclusiveness

- Undertake fewer activities with greater impact, rather than many activities with diluted impact
 - Be consistent and undertake activities that clearly contribute to the big picture as determined by the ITU strategic framework
 - Give priority to activities yielding tangible results.
- **Membership needs:**
 - Prioritize membership demands, by following a customer-oriented approach
 - Give priority to activities that Member States cannot implement without the support of the organization.

ANNEX 2 TO RESOLUTION 71 (REV. DUBAI, 2018)

Situational analysis

1 Background: Governing bodies and Sectors

Pursuant to the ITU Constitution and Convention, the Union comprises: a) the Plenipotentiary Conference, which is the supreme organ of the Union; b) the ITU Council, which acts on behalf of the Plenipotentiary Conference during the four years between plenipotentiary conferences; c) world conferences on international telecommunications; d) the Radiocommunication Sector (ITU-R), including world and regional radiocommunication conferences, radiocommunication assemblies and the Radio Regulations Board; e) the Telecommunication Standardization Sector (ITU-T), including world telecommunication standardization assemblies; f) the Telecommunication Development Sector (ITU-D), including world and regional telecommunication development conferences; and g) the General Secretariat. The three Bureaux serve as the secretariat to each respective Sector (the Radiocommunication Bureau – BR for ITU-R; the Telecommunication Standardization Bureau – TSB for ITU-T; and the Telecommunication Development Bureau – BDT for ITU-D).

2 Situational analysis

2.a Strategic situational analysis

ITU as a part of the United Nations system

ITU is the United Nations specialized agency for telecommunications/ICTs. It allocates global radio spectrum and satellite orbits, develops the technical standards that ensure networks and technologies seamlessly interconnect, and strives to improve access to telecommunications/ICTs for underserved communities worldwide. The Union is committed to connecting all the world's people – wherever they live and whatever their means. ITU's work aims to protect and support everyone's fundamental right to communicate.

Lessons learnt from the ITU strategic plan for 2016-2019

The strategic plan for the Union for 2016-2019, adopted by the ITU Member States at the Plenipotentiary Conference in 2014, became the basis for the adoption of the Connect 2020 Agenda for Global Telecommunication/ICT Development, setting out the shared vision, goals and targets that Member States committed to achieve by 2020, in collaboration with all stakeholders across the ICT ecosystem. The 2016-2019 strategic plan outlined the work of the Union towards implementing its four strategic goals: Growth, Inclusiveness, Sustainability and Innovation and partnership.

In the strategic plan for 2016-2019, each strategic goal aimed to reinforce the other: in growing ICT access, the ITU membership aimed to foster growth in the use of ICTs and create a positive impact on short- and long-term socio-economic development. By including everyone, the benefits of ICTs were to be extended to all – towards bridging the digital divide between the developed and developing worlds, but also reaching marginalized and vulnerable populations within all countries. The ability to sustain the tremendous benefits from ICTs required recognition that growth also brings challenges and risks that need to be managed. By innovating and advancing partnerships, the evolving ICT ecosystem could ensure its adaptation to the rapidly changing technological, economic and social environment.

The overall results of the implementation of the strategic plan and the Connect 2020 Agenda have been impressive, even though much more needs to be done. Member States are expected to achieve many of the Connect 2020 targets set on connectivity before the year 2020. For example, target 1.2 aiming to ensure that 60% of individuals worldwide are using the Internet, i.e. bringing an additional 1.5 billion people online from 2014 to 2020, is on track to be achieved, particularly due to the strong growth in developing countries and least developed countries (LDCs). Targets 2.2.A and 2.2.B aiming to ensure that 50% of individuals are connected in developing countries, and 20% in LDCs, are therefore also set to be achieved before 2020. Household connectivity targets are also expected to be achieved by 2020: target 1.1 aiming to achieve a rate of 55% of households connected worldwide, as well as, under Goal 2, a target of 50% and 15% of households connected in developing countries (2.1.A) and in LDCs (2.1.B).

However, 3.9 billion people are still estimated to be offline; the digital gender gap also persists; and although the costs of Internet access are falling, the goals set by the Connect 2020 Agenda to reduce the affordability gap between developed and developing countries may not be attained.

The ITU strategic plan for 2016-2019 also introduced significant improvements internally for the organization, by strengthening the concept of working as "One ITU". The common vision, mission and strategic goals for the whole organization aimed for all the Sectors to work cohesively on the implementation of the strategic plan, and for the secretariat to support - in a coordinated fashion - the implementation of the operational plans, seeking to avoid redundancies and duplication, and maximizing synergies across the Sectors, the Bureaux and the General Secretariat.

The plan introduced a strengthened results-based management approach for the organization, and a clearer linkage between the strategic, operational and financial plans, with a transparent allocation of resources to strategic goals and objectives (of the Sectors and the inter-Sectoral objectives). The new form of reporting on the implementation of the strategic plan, presenting the agreed key performance indicators for the outcomes of the work of the Sectors, and the support services provided by the secretariat – around 150 indicators in total, enabled the membership to better evaluate the results and the progress achieved.⁴

⁴ Reports available also online at: <https://www.itu.int/annual-report-2016>.

Developments since the ITU Plenipotentiary Conference (Busan, 2014)

This section introduces some of the key developments since the adoption of the previous strategic plan at the ITU Plenipotentiary Conference held in Busan, Republic of Korea, in October 2014, to be considered for the elaboration of the new strategic plan for 2020-2023.

In September 2015, all Member States of the United Nations agreed on United Nations General Assembly Resolution 70/1, on transforming our world: the 2030 Agenda for Sustainable Development, for all countries and all stakeholders to act in collaborative partnership and implement this plan for sustainable development. The 17 Sustainable Development Goals (SDGs) and 169 targets agreed upon demonstrate the scale and ambition of this new universal agenda.

Member States recognize in the 2030 Agenda that "the spread of information and communications technology and global interconnectedness has great potential to accelerate human progress, to bridge the digital divide, and to develop knowledge societies". ICTs have enormous potential to fast-forward progress on all the SDGs and improve people's lives in fundamental ways.

Notable references include, **SDG 9** (Industry, innovation and infrastructure) and in particular target 9.c to "significantly increase access to ICT and strive to provide universal and affordable access to Internet in the least developed countries by 2020", which introduces a clear notion that without the digital infrastructure the world would not be able to deliver scalable solutions to the SDGs. ICTs are specifically mentioned as a means of implementation under **SDG 17** (Partnership for the Goals, target 17.8), highlighting their cross-cutting transformative potential. ICTs are also highlighted as the enabling technology to promote the empowerment of women under **SDG 5** (Gender equality, target 5.b), while the importance of ICT skills is also recognized under **SDG 4** (Quality education, target 4.b).

ITU, as part of the United Nations system, needs to support Member States and to contribute towards the worldwide efforts to achieve the SDGs. All Member States agreed (and expressed in UNGA Resolution 70/1) that global engagement is required in support of implementation of all the Goals and targets, "bringing together Governments, the private sector, civil society, the United Nations system and other actors and mobilizing all available resources".

In addition, all Member States called for close alignment between the World Summit on the Information Society (WSIS) process and the 2030 Agenda for Sustainable Development, by adopting UNGA Resolution 70/125, on the overall review of the implementation of the WSIS outcomes. In that resolution, a request is made to the United Nations entities facilitating the WSIS action lines to review their reporting and work plans to support implementation of the 2030 Agenda.

In parallel, advances in the field of science, technology and engineering, including new and emerging trends, are driving substantial transformation not only for the telecommunication/ICT ecosystem, but for different industries, and need also to be taken into account for the development of the strategic plan of the Union for 2020-2023. Such advances and trends relate to digital transformation and include, *inter alia*, Internet of Things (IoT), 5G, IMT-2020, artificial intelligence (AI), big data, cloud computing, the so called "4th industrial revolution", smart cities, distributed ledger technologies, software-defined networking and network-function-virtualization, intelligent transport systems (ITS), and open source.

The role of the digital economy and digital transformation is being widely recognized as a significant enabler and booster of sustainable development, as also highlighted by the G20 Digital Economy Ministerial Declaration: "Shaping Digitalization for an Interconnected World", agreed in Düsseldorf, Germany in April 2017. The common vision to seize the opportunities and tackle the evolving challenges of the digital economy was also reaffirmed in the G7 ICT and Industry Ministers' Declaration⁵ in Torino, Italy in September 2017, while the need for advancement and development of the digital economy was also highlighted in the Buenos Aires Declaration⁶ adopted at the World Telecommunication Development Conference in Buenos Aires, Argentina in October 2017.

Digitalization alters society and the economy: it means the comprehensive penetration, networking and change of almost all areas of life and work by ICTs. It stands for the ability to collect and analyse information. As never before, processing steps are now increasingly taking place in parallel – in real time. This permits enormous leaps in productivity, but also increases the speed of change. Products and services increasingly contain digital added value and are getting "smart" through incorporation into intelligent and networked systems.

Technologies, smart applications and other innovations in the digital economy can improve services and help address policy challenges in a wide range of areas⁷, including, *inter alia*, healthcare, agriculture, public governance, tax, transport, education and the environment. ICTs contribute not just to innovation in products, but also to innovation in processes and organizational arrangements. While being a catalyst for growth, digital technologies may also be disruptive, with effects on employment and well-being. While new technologies create opportunities for businesses (especially SMEs), and for workers and citizens to engage in economic activity, these technologies are also likely to displace workers doing specific tasks and may further increase existing gaps in access and use, resulting in new digital divides and greater inequality.

⁵ [G7 ICT and Industry Ministers' Declaration](#): Making the next production revolution inclusive, open And secure.

⁶ ITU WTDC-17 – [Buenos Aires Declaration](#).

⁷ [Source](#): Key issues for digital transformation in the G20, G20 German Presidency/OECD.

Opportunities and threats for the Union

The impact of the digital transformation and the growth of the digital economy creates new markets and new key players that have emerged in the telecommunication/ICT ecosystem. This creates new opportunities for ITU to engage with new members and partners, and discuss emerging challenges to digitalization, which may need to be managed through appropriate international cooperation, for example by sharing of best practices.

Member States from the developing world are increasingly engaging in the multilateral system, which encourages all types of partnerships to be built, in order to overcome the obstacles to digitalization, and enable the exchange of resources, technology and knowledge in the global digital economy.

ICTs are transforming society as well. In an era where everyone can create, access, utilize and share information and knowledge, this enables individuals, societies and people to achieve their full potential in promoting their sustainable development and improving their quality of life. The impact of ICTs can be catalytic on the implementation of the SDGs, from their impact on medical and social care to education, from enabling economic growth to reducing inequalities and empowering women and girls. ITU could be promoting this catalytic role.

On the other hand, digital divides still exist, underscoring the importance of the Union achieving its connectivity objectives. More than half of the world's population is still offline (an estimated 3.9 billion people based on 2017 data), while in Africa almost three out of four people are non-Internet users. The digital gender gap also persists, whereby the proportion of men using the Internet is higher than the proportion of women using the Internet in two-thirds of all countries. In the least developed countries, only one in seven women is using the Internet, compared with one in five men. Mobile broadband costs more than 5 per cent of GNI per capita in most LDCs and is therefore unaffordable for the vast majority of the population.

With regard to the industry, new business models have emerged for digital service providers, and increased competition is being observed. This brings into question the types of regulations required, contrasting the regulatory environment for online services with the environment for traditional telecommunication services.

Finally, the rapid growth of ICTs and the increasingly digital world create particular challenges and increasing concerns that the Union may address, within the mandate given by the membership, such as the environmental impact; impacts on consumers; digital divides; issues affecting confidence and security in the use of ICTs in accordance with WSIS Action Line C5.

The elements of a SWOT analysis to be considered in developing the strategy, presenting ITU's strengths and weaknesses as well as the opportunities and threats facing the organization, are introduced in the table below.

Table 1: SWOT analysis

Strengths	Weaknesses
1 The UN specialized agency for ICTs with 150 years of history/tradition	1 Length of the governing bodies decision-making process
2 Leading role in organizing the use of ICT resources globally, through regulations and standards of universal applicability	2 Federal structure requires coordination and clarification of the roles of each Sector to avoid duplication/conflict
3 Unique membership composition – governments, private sector and academia participate in the activities of the organization	3 Elements of organizational culture are conservative and risk averse
4 Dual role of a normative organization combined with experience in implementing developmental initiatives	4 Difficulty to decide on diversifying sources of income
5 Prominent position to foster the enabling role of ICTs to accelerate implementation of the SDGs	
6 A global, neutral, inclusive platform – strong brand with good reputation	
7 Partnerships with key stakeholders and established collaborations	
8 Federal structure – provides more focus on specific fields	
9 Legitimacy and capacity to organize major international conferences and events	
10 Knowledge and skills of the ITU membership and staff in technical (e.g. radiocommunications, standardization), policy and regulatory matters, statistics, and development ('crowdsourcing' of skills)	

Opportunities	Threats
1 Creation of new markets and entrance of new key players creates new membership opportunities	1 Increasing divisions (e.g. digital divide, gender, geographical)
2 Member States from the developing world increasingly engage in the multilateral system	2 Difficulty of the global economy to regain a trajectory of strong, balanced and sustained growth
3 Increased relevance of ICT in society , data seen as the new oil	3 Issues affecting confidence and security in the use of ICTs in accordance with WSIS Action Line C5, impacts on customers
4 Catalytic impact of ICTs on the implementation of SDGs (impact on medical and social care, education, social identity, etc.)	4 The sustainability of the growth of the ICTs
5 Digital transformation of the industry and public services	5 The impact on the environment of increasing networks, data, connected devices
6 New emerging technologies, systems and players benefit from an enabling policy and regulatory environment that fosters innovation	6 Pressure from different stakeholders to implement unproven approaches
7 New environmentally-friendly technologies/markets leading to new opportunities for partnerships	
8 Support from some media and advocacy organizations	
9 Strengthening coordination and collaboration with other relevant regional and international organizations/associations	

2.b General review of the targets of the strategic plan for 2016-2019

The strategic plan for 2016-2019 sets out four Goals: Growth, Inclusiveness, Sustainability, and Innovation and partnership, and, underlying each goal, several strategic targets (comprising the Connect 2020 Agenda targets).

Target 1.1 aims to achieve a rate of 55% of households connected worldwide, and under Goal 2 there are corresponding targets of rates of 50% and 15% connected households in developing countries (2.1.A) and LDCs (2.1.B), respectively. All of these targets for households are expected to be achieved by the year 2020.

Targets 1.2, 2.2.A and 2.2.B set aims in terms of the number of connected individuals worldwide (60%), in developing countries (50%) and in LDCs (20%), respectively. All of these targets are also currently set to be achieved in time for the 2020 deadline.

Target 1.3 aims to make telecommunications/ICT 40% more affordable by 2020 in relation to the 2014 baseline. At the current rate, it is expected that the reduction in costs by 2020 will be about 32% on average, with a similar value for the drop in the affordability gap between developed and developing countries (target 2.3.A). Target 2.3.B aims to get the cost of Internet access to below 5% of GNI per capita, which is currently the case in 120 out of 160 countries for which data is available. It is expected that this number will increase by 2020, but that the target will not be achieved for all countries.

Target 2.4 aims to ensure that 90% of the world's rural population will be covered by broadband services by 2020. Whether this target will be met or not depends to a large extent on how quickly 2G coverage will be replaced by 3G coverage. Currently, 2G covers well over 90% of the rural population, so with sufficient upgrades this target could be met.

Gender equality in terms of Internet access is included as target 2.5.A. In recent years, the rapid growth in developing countries was paired with increasing gender inequality; however, the latest ITU data show that the gender gap is now decreasing, narrowing from 12.2% in 2016 to 11.6% in 2017.

Having a strategy on ensuring accessibility for persons with disabilities is included as target 2.5.B. Currently, 48 out of 64 reporting countries have a strategy that covers this aspect.

Under target 3.1, cybersecurity readiness should be improved by 2020. Since 2016, ITU has been measuring this using the Global Cybersecurity Index, which will be used to assess this improvement in 2020.

Target 4.1 aims to ensure a telecommunication/ICT environment that is conducive to innovation. Recent years have witnessed a rapid increase in the number of countries with a national innovation strategy to ensure this.

ANNEX 3 TO RESOLUTION 71 (REV. DUBAI, 2018)

Glossary of terms

Term	Working version
Activities	Activities are various actions/services for transforming resources (inputs) into outputs ⁸ .
Financial plan	<p>The financial plan covers a four-year period and sets the financial basis from which biennial budgets are elaborated.</p> <p>The financial plan is elaborated within the context of Decision 5 (Revenue and expenses for the Union) which reflects, inter alia, the amount of the contributory unit approved by the Plenipotentiary Conference. It is linked to the strategic plan, in accordance with Resolution 71, by the allocation of financial resources to the strategic goals of the Union.</p>
Inputs	Inputs are resources, such as financial, human, material and technological resources, used by activities to produce outputs.
Mission	Mission refers to the main overall purposes of the Union, as per the basic instruments of ITU.
Objectives	Objectives refer to the specific aims of the Sectoral and inter-Sectoral activities in a given period.
Operational plan	The operational plan is prepared on a yearly basis by each Bureau, in consultation with the relevant advisory group, and by the General Secretariat, in accordance with the strategic and financial plans. It contains the detailed plan for the subsequent year and a forecast for the following three-year period for each Sector and the General Secretariat. The Council reviews and approves the four-year rolling operational plans.
Outcomes	Outcomes provide an indication as to whether the objective is being achieved. Outcomes are usually partly, but not entirely, within the organization's control.

⁸ The activities and outputs are defined in detail in the operational planning process, thereby ensuring a strong linkage between strategic and operational planning.

Term	Working version
Outputs	Outputs are the final tangible results, deliverables, products and services achieved by the Union in the implementation of the operational plans. Outputs are cost objects and are represented in the applicable cost-accounting system by internal orders.
Performance indicators	Performance indicators are the criteria used to measure the achievement of outputs or outcomes. These indicators may be qualitative or quantitative.
Processes	Set of consistent activities intended to meet an intended objective/goal.
Results-based budgeting (RBB)	Results-based budgeting (RBB) is the programme budget process in which: a) the programme is formulated in order to meet a set of predefined objectives and outcomes; b) the outcomes justify resource requirements, which are derived from and linked to outputs produced to achieve the outcomes; and c) actual performance in achieving outcomes is measured by outcome indicators.
Results-based management (RBM)	Results-based management is a management approach that directs organizational processes, resources, products and services towards the achievement of measurable results. It provides the management frameworks and tools for strategic planning, risk management, performance monitoring and evaluation and financing activities based on targeted results.
Results framework	A results framework is the strategic management tool used to plan, monitor, evaluate and report within the RBM methodology. It provides the necessary sequence to achieve desired results (results chain) – beginning with inputs, moving through activities and outputs, to outcomes – at the level of Sectoral and inter-Sectoral objectives, and desired impact – at the level of ITU-wide strategic goals and targets. It explains how results are to be achieved, including causal relationships and underlying assumptions and risks. The results framework reflects strategic level thinking across the entire organization.
Strategic goals	Strategic goals refer to the Union's high-level targets to which the objectives contribute, directly or indirectly. These relate to the whole of ITU.

Term	Working version
Strategic plan	The strategic plan defines the strategy of the Union for a four-year period in order to fulfil its mission. It defines strategic goals and objectives and represents the plan of the Union within that period. It is the main instrument embodying the Union's strategic vision. The strategic plan should be implemented within the context of the financial limits established by the Plenipotentiary Conference.
Strategic risks	Strategic risks refer to the uncertainties and untapped opportunities that affect an organization's strategy and strategy execution.
Strategic risk management (SRM)	Strategic risk management is a management practice that identifies and focuses action on uncertainties and untapped opportunities that affect an organization's ability to deliver on its mission.
Strategic target	Strategic targets are the expected results during the period of the strategic plan; they provide an indication as to whether the goal is being achieved. Targets may not always be achieved, for reasons that may be beyond the control of the Union.
Strengths, weakness, opportunities and threats (SWOT) analysis	<p>A study done by an organization in order to find its strengths and weaknesses, and what problems or opportunities it should deal with. SWOT is formed from the initial letters of "strengths", "weaknesses", "opportunities" and "threats".</p> <p>Internal factors:</p> <ul style="list-style-type: none"> – <i>Strengths</i> are capabilities that enable the organization to perform well –capabilities that need to be leveraged. – <i>Weaknesses</i> are characteristics that affect the good performance of the organization and need to be addressed. <p>External factors:</p> <ul style="list-style-type: none"> – <i>Opportunities</i> are trends, forces, events and ideas that the organization can capitalize on. – <i>Threats</i> are possible events or forces outside of the control of the organization that the organization needs to mitigate.
Values	ITU's shared and common beliefs that drive its priorities and guide all decision-making processes.
Vision	The better world ITU wants to see.

RESOLUTION 151 (REV. DUBAI, 2018)

Improvement of results-based management in ITU

The Plenipotentiary Conference of the International Telecommunication Union (Dubai, 2018),

considering

a) Decision 5 (Rev. Dubai, 2018) of this conference, which indicates the resource limitations for the period 2020-2023 and specifies goals and objectives in regard to improving the efficiency of ITU activities;

b) Resolution 48 (Rev. Dubai, 2018) of this conference, which resolves that human resources management and development in ITU should continue to be compatible with the goals and activities of the Union and the United Nations common system;

c) Resolution 71 (Rev. Dubai, 2018) of this conference, which sets out strategic goals and objectives of the Union and Sectors in a results-based management (RBM) framework;

d) Resolution 72 (Rev. Busan, 2014) of the Plenipotentiary Conference, which noted the need to link strategic, financial and operational planning through relationships between the corresponding documents and the information they contain;

e) Resolution 151 (Rev. Busan, 2014) of the Plenipotentiary Conference, which further instructed the Secretary-General to continue to improve methodologies associated with the full implementation of RBM, including the presentation of biennial budgets based on the concept of results-based budgeting (RBB),

noting

a) that ITU must, using accumulated experience, identify the most efficient management methods in the new and constantly changing conditions in society;

b) that RBM includes the development of indicators to monitor and assess progress and achievement of expected results as well as to increase transparency and accountability of the Union as a whole,

recognizing

a) that continued implementation of RBB and RBM at ITU entails further culture change and staff involvement at all levels to integrate the concepts and terms of RBM into programme planning, management and reporting;

b) that RBM requires a comprehensive strategy aimed at changing the way United Nations system agencies operate, with improving performance (achieving specific results) as the central orientation;

c) that improvements in the RBM system require a constant process of planning, programming, RBB, contract management, monitoring and evaluation; delegation of authority and accountability; and staff performance;

d) that linkage of the strategic, financial and operational plans of the Union is an integral part of RBM and that effective monitoring mechanisms are needed to ensure that the ITU Council can monitor progress in this area,

recognizing further

the need to implement the United Nations Joint Inspection Unit (JIU) recommendations contained in Document JIU/REP/2016/1: Review of management and administration in ITU taking into account the value of RBM in the United Nations system,

emphasizing

that the purpose of RBM and RBB is to ensure that high-priority activities are adequately resourced in order to efficiently achieve planned results,

resolves to instruct the Secretary-General and the Directors of the three Bureaux

1 to continue to improve processes and methodologies associated with the full implementation of RBM and RBB at the levels of processing and implementation, including improvements in the presentation of the biennial budgets on an ongoing basis;

2 to continue to develop a comprehensive ITU results framework to support implementation of the strategic, financial and operational plans and budget and increase the capability of the Union's membership to assess progress in the achievement of ITU goals, and for this purpose to:

- i) set out the activities of the Union, the objectives of those activities and the associated resources and results;
- ii) monitor implementation of the interlinked plans using a comprehensive performance monitoring framework to enable ITU to evaluate progress;
- iii) continually improve the efficiency of all activities by eliminating duplication, taking into account complementarity between the activities of ITU and those of other relevant international and regional telecommunication organizations in accordance with the mandate of ITU;
- iv) ensure transparency of reporting by publishing detailed information, including all costs incurred in the use or deployment of financial and human resources (external or internal);
- v) further develop the risk-management system at the ITU level, in the context of RBM, to ensure that contributions from the ITU membership and other financial resources are used to best advantage;

3 to prepare their coordinated and consolidated operational plans reflecting their linkages with the strategic and financial plans of the Union as set out, respectively, in Resolution 71 (Rev. Dubai, 2018) and Decision 5 (Rev. Dubai, 2018), for annual review by the Sector advisory groups and approval by the Council;

4 to provide to conferences and assemblies the necessary information from the full range of new financial and planning mechanisms available so as to enable them to estimate the financial implications of their decisions, and to assist Member States in preparing cost "estimates" for any proposals to all conferences and assemblies of the Union, taking into account the provisions of Article 34 of the ITU Convention;

5 to make steady progress in increasing the capacity, skill level and participation of ITU staff in RBM in accordance with Resolution 48 (Rev. Dubai, 2018), and reflect the relevant results in the report on staff issues;

6 to make appropriate proposals relating to RBM and RBB for consideration by the Council, with a view to introducing changes in the Financial Regulations and Financial Rules of the Union, taking into account the views of Member States and the recommendations of the Sector advisory groups, as well as of the internal and external auditors and the Independent Management Advisory Committee (IMAC);

7 to ensure, as part of the Coordination Committee's standing activities, coherence and avoidance of duplication among the operational plans and biennial budgets, for review by the Council, while identifying particular measures and elements to be included;

8 to monitor on a yearly basis implementation of resolutions of the Plenipotentiary Conference following the 2018 plenipotentiary conference and to prepare an annual report to the Council, within the framework of the annual report on implementation of the strategic plan and activities of the Union (ITU Annual Progress Report),

instructs the Secretary-General

to report annually to the Council on the implementation of this resolution,

instructs the ITU Council

- 1 to continue to take appropriate action to ensure further development and appropriate implementation of RBM and RBB at ITU;
- 2 to monitor the implementation of this resolution at each subsequent session of the Council and to report to the next plenipotentiary conference,

encourages Member States

to liaise with the secretariat at an early stage in developing proposals that have financial implications so that the work plan and associated resource requirements can be identified and, to the greatest extent practicable, included in such proposals.

(Antalya, 2006) – (Rev. Guadalajara, 2010) – (Rev. Busan, 2014) – (Rev. Dubai, 2018)

RESOLUTION 191 (REV. DUBAI, 2018)

**Strategy for the coordination of efforts among
the three Sectors of the Union**

The Plenipotentiary Conference of the International Telecommunication Union (Dubai, 2018),

noting

a) Resolution ITU-R 6-2 (Rev. Geneva, 2015) of the Radiocommunication Assembly (RA), on liaison and collaboration with the ITU Telecommunication Standardization Sector (ITU-T), and Resolution ITU-R 7-3 (Rev. Geneva, 2015) of the RA, on telecommunication development including liaison and collaboration with the ITU Telecommunication Development Sector (ITU-D);

b) Resolution 45 (Rev. Hammamet, 2016) of the World Telecommunication Standardization Assembly (WTSA), on effective coordination of standardization work across study groups in ITU-T and the role of the Telecommunication Standardization Advisory Group (TSAG);

c) Resolution 18 (Rev. Hammamet, 2016) of WTSA, on principles and procedures for the allocation of work to, and strengthening coordination and cooperation among, the ITU Radiocommunication Sector (ITU-R), ITU-T and ITU-D;

d) Resolution 5 (Rev. Buenos Aires, 2017) of the World Telecommunication Development Conference (WTDC), on enhanced participation by developing countries¹ in the activities of the Union;

e) Resolution 59 (Rev. Buenos Aires, 2017) of WTDC, on strengthening coordination and cooperation among the three ITU Sectors on matters of mutual interest;

¹ These include the least developed countries, small island developing states, landlocked developing countries and countries with economies in transition.

f) the establishment of the Inter-Sector Coordination Team on issues of mutual interest (ISCT), set up under decisions of the Sector advisory groups, and of the Inter-Sectoral Coordination Task Force (ISC-TF), headed by the Deputy Secretary-General, in order to eliminate duplication of effort and optimize the use of resources,

considering

- a) the purposes of the Union listed in Article 1 of the ITU Constitution;
- b) the role assigned to each of the three Sectors and to the General Secretariat to contribute to fulfilling the purposes and achieving the objectives of the Union;
- c) that, pursuant to No. 119 of the Constitution, the activities of ITU-R, ITU-T and ITU-D shall be the subject of close cooperation with regard to matters relating to development, in accordance with the relevant provisions of the Constitution;
- d) that, pursuant to No. 215 of the ITU Convention, ITU-R, ITU-T and ITU-D shall keep the matters under study under continuing review with a view to reaching agreement on the distribution of work, avoiding duplication of effort and improving coordination, and the Sectors shall adopt procedures to conduct such reviews and reach such agreement in a timely and effective manner;
- e) that RA, WTSA and WTDC have also identified common areas where work is to be done and that require the internal coordination within ITU,

recognizing

- a) the growing number of areas for common studies carried out by the three Sectors and the related need for coordination and cooperation among the Sectors, providing an integrated approach within the framework of the "One ITU";
- b) the need for developing countries to acquire tools to strengthen their telecommunication sector;
- c) that, despite efforts made, levels of participation by developing countries in the activities of ITU-R and ITU-T are not sufficient, so that it is increasingly necessary to strengthen ITU-R and ITU-T coordination and cooperation with ITU-D;

d) the catalysing role of ITU-D, which seeks optimal resource use so that capacities can be built in developing countries;

e) the need to achieve better representation of the vision and needs of developing countries in the activities and work carried out in ITU-R and ITU-T;

f) that, given the growing number of issues of mutual interest related to the three Sectors, such as development of telecommunication/ICT systems, international mobile telecommunications (IMT), emergency telecommunications, telecommunications/ICT and climate change, cybersecurity, access to telecommunications/ICT for persons with disabilities and persons with specific needs, conformance and interoperability of telecommunication/ICT equipment and systems, and better use of scarce resources, among others, an integrative approach from the Union is increasingly required;

g) that coordinated and complementary efforts make it possible to reach more Member States, with greater impact, so as to bridge the digital divide and the standardization gap, as well as contributing to better spectrum management,

bearing in mind

a) that the activities of inter-Sector teams facilitates collaboration and coordination of activities within the Union;

b) that the strategic plan for the Union for 2020-2023 includes Inter-Sectoral Objective.6: "Reduce the areas of overlap and duplication and foster closer and more transparent coordination among the General Secretariat and the ITU Sectors, taking into account the Union's budgetary provisions and the expertise and mandate of each Sector";

c) that consultations are under way among the three Sector advisory groups themselves regarding the mechanisms and means needed for better cooperation among them;

d) that these actions should continue to be systematized in a comprehensive strategy whose results are measured and monitored;

e) that this would provide the Union with a tool for correcting deficiencies and building on success;

f) that ISCT and ISC-TF are effective tools contributing to the development of an integrated strategy;

g) that inter-Sector collaboration and coordination should be headed by the General Secretariat, in close collaboration with the Directors of the three Bureaux,

resolves

that the Radiocommunication Advisory Group (RAG), TSAG and the Telecommunication Development Advisory Group (TDAG), including through ISCT, shall continue to consider current and new activities and their distribution among ITU-R, ITU-T and ITU-D for approval by the ITU Member States in accordance with the procedures for approval of new and revised questions,

invites

1 RAG, TSAG and TDAG to continue to assist ISCT in identifying of subjects common to the three Sectors and mechanisms to enhance cooperation and collaboration in all Sectors on matters of mutual interest;

2 the Directors of the Radiocommunication, Telecommunication Standardization and Telecommunication Development Bureaux and ISC-TF to report to ISCT and the respective Sector advisory groups on options for improving cooperation at the secretariat level to ensure that close coordination is maximized,

instructs the Secretary-General

1 to continue enhancing a coordination and cooperation strategy for effective and efficient efforts in areas of mutual interest to the three ITU Sectors and the General Secretariat, in order to avoid duplication of effort and optimize the use of resources of the Union;

- 2 to identify all forms and examples of overlapping functions and activities among ITU Sectors as well as the General Secretariat, and propose solutions to address them;
- 3 to update the list containing the areas of mutual interest to the three Sectors and the General Secretariat pursuant to the mandates of each ITU assembly and conference;
- 4 to submit to the ITU Council and to the Plenipotentiary Conference reports on the coordination activities carried out among the different Sectors and the General Secretariat in each such area, as well as the results obtained;
- 5 to continue ensure close interaction and regular exchange of information between ISCT and ISC-TF;
- 6 to present a report to the next plenipotentiary conference on the implementation of this resolution,

instructs the ITU Council

to include coordination of the work of the three ITU Sectors and the General Secretariat on the agenda of its meetings so as to follow its evolution and take decisions to ensure its implementation,

instructs the Secretary-General and the Directors of the three Bureaux

- 1 to ensure reporting to the Council of the coordination activities carried out among the different Sectors in each area identified as being of mutual interest, as well as the results obtained;
- 2 to identify all forms and examples of overlapping functions and activities between ITU Sectors as well as the General Secretariat, and propose solutions to address them;
- 3 to ensure that the agendas of the respective advisory groups include coordination with the other Sectors, so that strategies and actions are suggested for optimal development of the areas of common interest;
- 4 to provide support to ISCT and to the Sector advisory groups in the inter-Sector coordination activity in areas of mutual interest,

invites Member States and Sector Members

- 1 when preparing proposals submitted to conferences and assemblies of the ITU Sectors, as well as ITU plenipotentiary conferences, to take into account the specifics of the activities of the Sectors and the General Secretariat, the need for coordination of their activities, and the need to avoid duplication of activities of various entities of the Union;
- 2 when making decisions at conferences and assemblies of the Union, to act in accordance with Nos. 92, 115, 142 and 147 of the Constitution;
- 3 to support efforts to improve inter-Sector coordination, including taking an active part in groups established by the Sector advisory groups in respect of coordination activities.

(Busan, 2014) – (Rev. Dubai, 2018)

RESOLUTION 200 (REV. DUBAI, 2018)

Connect 2030 Agenda for global telecommunication/information and communication technology, including broadband, for sustainable development

The Plenipotentiary Conference of the International Telecommunication Union (Dubai, 2018),

recalling

- a) the purposes of the Union as enshrined in Article 1 of the ITU Constitution;
- b) the commitment by all Member States of the United Nations to achieving the 2030 Agenda for Sustainable Development and the 17 Sustainable Development Goals (SDGs) and related targets, adopted by the United Nations General Assembly (UNGA) in Resolution 70/1;
- c) the call for close alignment between the World Summit on the Information Society (WSIS) process and the 2030 Agenda for Sustainable Development, adopted in UNGA Resolution 70/125;
- d) the targets set by WSIS, which served as global references for improving access to and use of telecommunications/information and communication technology (ICT) in promoting the objectives of the Geneva Plan of Action, and the SDGs in the 2030 Agenda for Sustainable Development, to be achieved by 2030;
- e) § 98 of the Tunis Agenda for the Information Society, which encourages strengthened and continuing cooperation between and among stakeholders and welcomes, in that respect, the ITU-led Connect the World initiative;
- f) the 2025 global broadband targets of the United Nations Broadband Commission for Sustainable Development to support "Connecting the Other Half";

g) the Connect 2020 Agenda for global telecommunication/ICT development agreed by ITU Member States at the 2014 plenipotentiary conference in Busan, Republic of Korea, initially adopted by Resolution 200 (Busan, 2014) of the Plenipotentiary Conference,

considering

a) the Union's dual responsibility as the United Nations specialized agency for telecommunications/ICTs and executing agency for implementing related projects under the United Nations development system;

b) the United Nations system-wide implementation of the 2030 Sustainable Development Agenda and efforts towards achieving the SDGs;

c) the role of ITU as a United Nations specialized agency to support Member States and to contribute towards the worldwide efforts to achieve the SDGs,

noting

that the Busan Declaration on the future role of telecommunications/ICT in achieving sustainable development, adopted by the ministerial meeting held in Busan, Republic of Korea in 2014, endorsed a shared global vision for the development of the telecommunication/ICT sector, under the agenda "Connect 2020",

recognizing

a) the WSIS outcome documents – the Geneva Plan of Action (2003) and the Tunis Agenda (2005);

b) the WSIS+10 statement on the implementation of WSIS outcomes and vision for WSIS beyond 2015, endorsed by the Plenipotentiary Conference (Busan, 2014);

c) the outcomes of the Connect series summits (Connect Africa, Connect CIS, Connect Americas, Connect Arab States and Connect Asia-Pacific) under the Connect the World global multistakeholder initiative set up within the context of WSIS;

d) the Buenos Aires Declaration adopted by the World Telecommunication Development Conference (WTDC-17) and the Buenos Aires Action Plan and relevant WTDC-17 resolutions, including Resolutions 30 and 37 (Rev. Buenos Aires, 2017), as well as Resolutions 135, 139 and 140 (Rev. Dubai, 2018) of this conference;

e) Resolution 71 (Rev. Dubai, 2018) of this conference, which adopted the strategic framework for the Union for 2020-2023 and set the strategic goals, related targets and objectives,

recognizing further

a) that telecommunications/ICT is a key enabler to accelerate social, economic and environmentally sustainable growth and development, while the spread of ICT and global interconnectedness has great potential to accelerate human progress, to bridge the digital divide, and to develop knowledge societies;

b) the need to sustain current achievements and intensify efforts in promoting and financing ICTs for development;

c) the global challenges of the rapidly evolving telecommunication/ICT environment, as identified in Annex 2 to Resolution 71 (Rev. Dubai, 2018);

d) the need for broadband connectivity for sustainable development,

resolves

1 to reaffirm a shared global vision for the development of the telecommunication/ICT sector, under the Connect 2030 Agenda envisaging "an information society, empowered by the interconnected world, where telecommunications/ICTs enable and accelerate social, economic and environmentally sustainable growth and development for everyone";

2 to endorse the high-level strategic goals and targets set out in the strategic plan of the Union and global broadband targets, inspiring and inviting all stakeholders and entities to work together to implement the Connect 2030 Agenda, contributing to the implementation of the 2030 Agenda for Sustainable Development;

3 to call upon Member States to continue leveraging telecommunications/ICT as a key enabler for achieving the 2030 Agenda for Sustainable Development and the SDGs that integrate in a balanced manner the economic, social and environmental dimensions of sustainable development,

instructs the Secretary-General

1 to monitor the progress towards achievement of the Connect 2030 Agenda, leveraging data, among others, from the ITU World Telecommunication/ICT Indicators database and the Partnership on Measuring ICT for Development;

2 to disseminate information and share knowledge and best practices on national, regional and international initiatives contributing to the Connect 2030 Agenda;

3 to further facilitate implementation of the WSIS action lines and achievement of the SDGs assigned to the responsibility of ITU, in accordance with the Connect 2030 Agenda;

4 to present annual consolidated progress reports to the ITU Council and four-year consolidated progress reports to the Plenipotentiary Conference;

5 to bring this resolution to the attention of all interested parties, including, in particular, UNGA, the United Nations Development Programme and the United Nations Economic and Social Council, for cooperation in its implementation;

6 to continue to support Member States, in particular developing countries¹, in their active engagement with regard to *resolves* 3 of this resolution,

¹ These include the least developed countries, small island developing states, landlocked developing countries and countries with economies in transition.

instructs the Directors of the Bureaux

to report on the progress towards achievement of the objectives and outcomes of the work of each Sector, as elaborated in the strategic plan for the Union for 2020-2023 in Annex 1 to Resolution 71 (Rev. Dubai, 2018), that contributes to the Connect 2030 Agenda,

instructs the Director of the Telecommunication Development Bureau

to coordinate the collection, provision and dissemination of indicators and statistics that measure and provide comparative analysis of progress towards achievement of the targets of the ITU strategic plan, and report on the progress through the annual Measuring the Information Society Report,

instructs the ITU Council

- 1 to review the annual progress achieved towards the accomplishment of the Connect 2030 Agenda;
- 2 to present an assessment of the progress towards achieving the Connect 2030 Agenda to the next plenipotentiary conference,

invites the Member States

- 1 to participate actively in the implementation of the Connect 2030 Agenda, and contribute with national, regional and international initiatives;
- 2 to invite all other stakeholders to contribute and work together towards the Connect 2030 Agenda;
- 3 to provide data and statistics, as appropriate, to monitor progress towards the achievement of the Connect 2030 Agenda;
- 4 to report national progress towards the achievement of the Connect 2030 Agenda, and contribute to the database that will collect and disseminate information on national and regional initiatives contributing to the Connect 2030 Agenda;
- 5 to ensure that ICTs are central to the 2030 Agenda for Sustainable Development, by being acknowledged as an important tool to achieve its overall SDGs;

6 to contribute to the work of ITU, as elaborated in the strategic plan for the Union for 2020-2023 in Annex 1 to Resolution 71 (Rev. Dubai, 2018), that contributes to the Connect 2030 Agenda,

invites Sector Members, Associates and Academia

to take an active role towards implementing the Connect 2030 Agenda,

invites all stakeholders

to contribute with their initiatives and their experience, qualifications and expertise to the successful implementation of the Connect 2030 Agenda.

(Busan, 2014) – (Rev. Dubai, 2018)
