Has your organization proposed a contribution for ITU-T standards/ Recommendation(s) or Supplement?

48
Yes

16
No

If no, why? [Choose all that apply]

5 — No awareness and skills of the rules and procedures to propose the contributions

3 — No knowledge about the SG mandates, Recommendations inter alia.

6 — No support from the organization/ country.

3 — No good idea for contribution

2 — Lack of support from ITU

2 — Lack of self-confidence

5 — Time constrains in preparations for the meeting/travel

12 — Others

What are the main challenges to participate in ITU-T standardization activities? [Choose all that apply]

15 — No skills and capacity to participate the ITU-T study groups and other events.

30 — No resources and funds supported from the organization/countries.

27 — No priorities given by the organization/countries.

1 — No timely invitation letters from ITU to process the administrations (e.g., approval, visa etc.).

4 — Too complicated rules for registration (via organization's Focal Point).

2 — Note enough means/tools/training to use remote participation facilities.

9 — No fellowships offered.
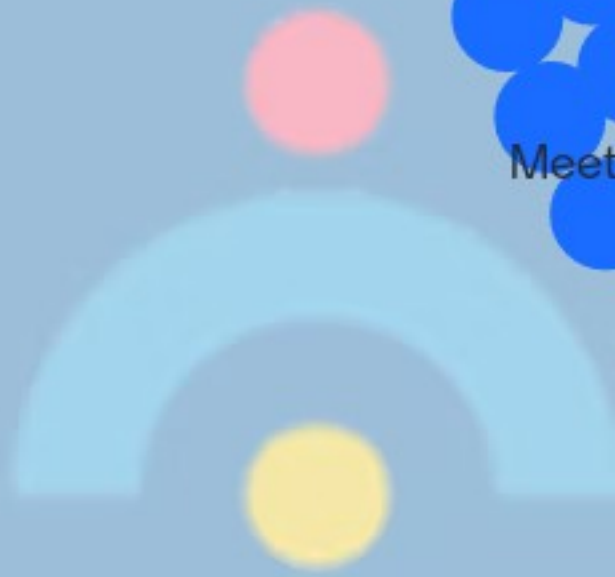

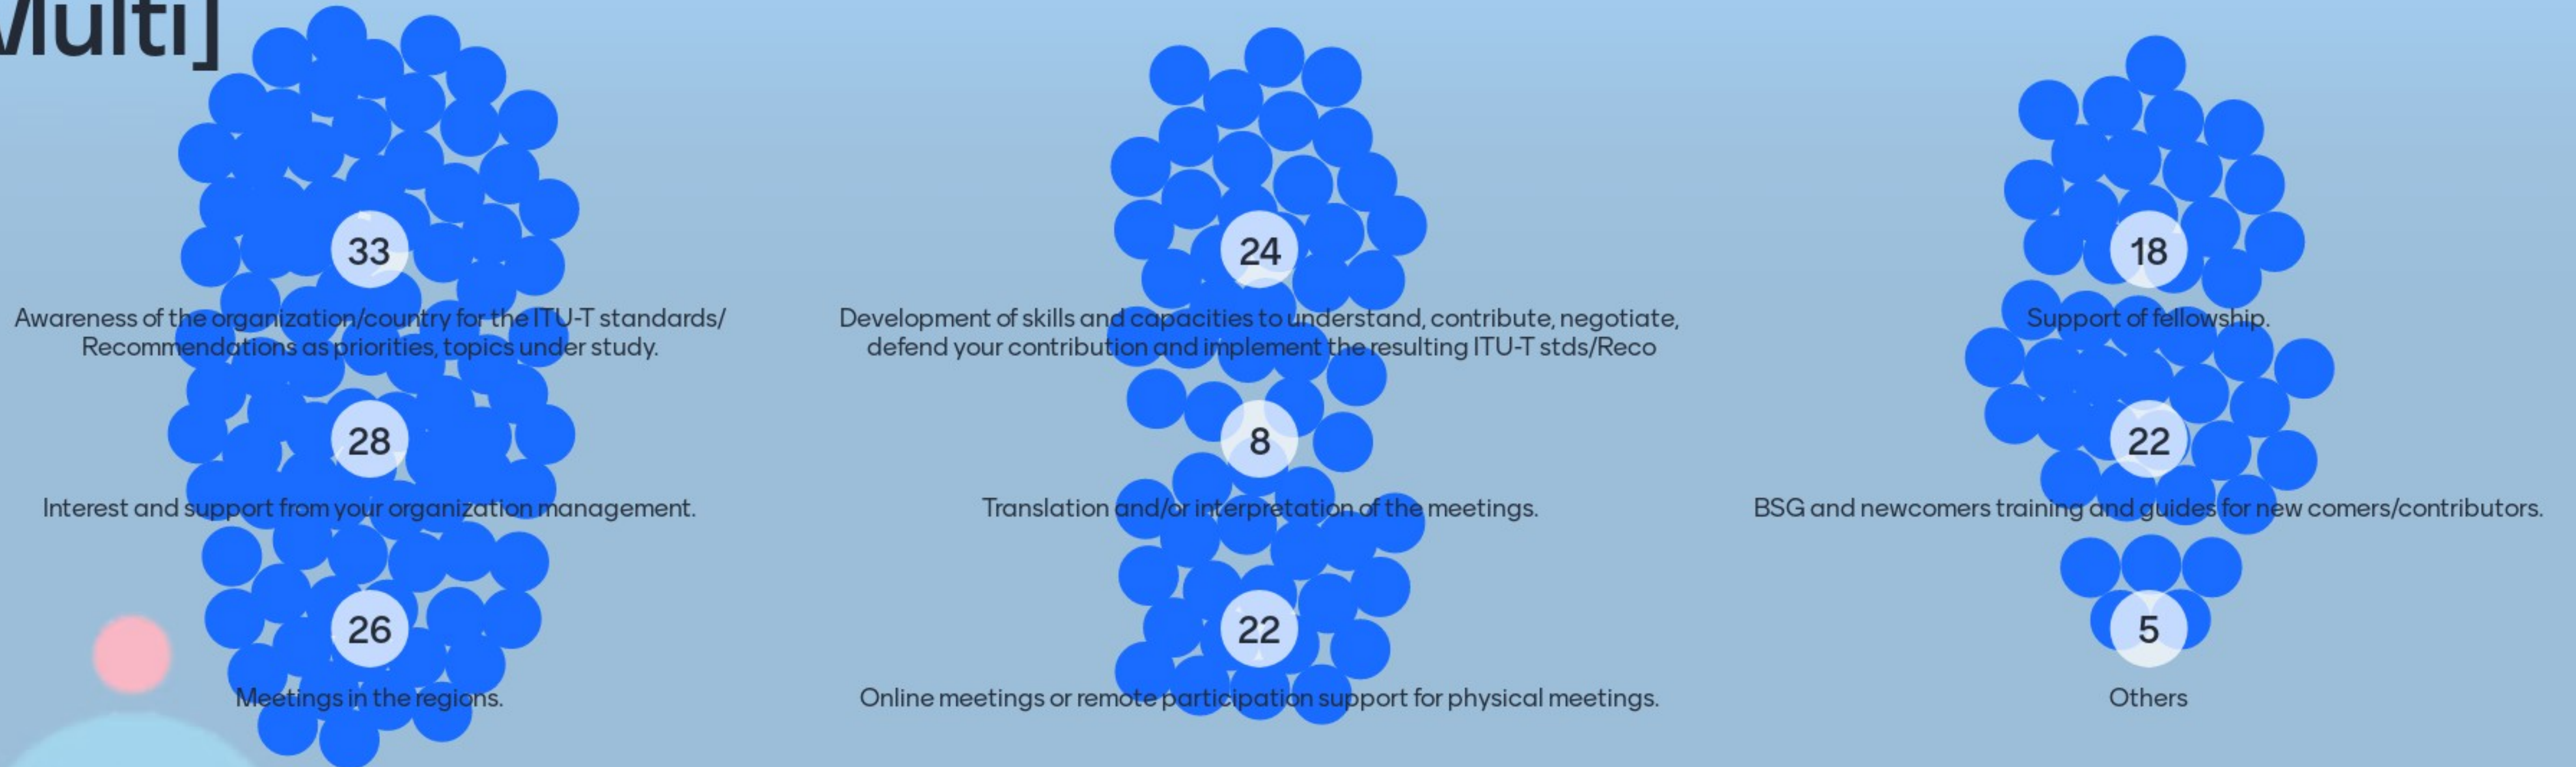

11 — Others

What possible measures can enhance the participation of your organization/country to develop and implement ITU-T standards more effectively? [Multi]
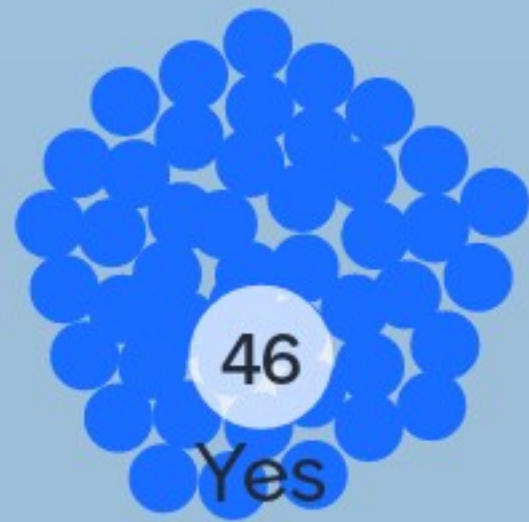

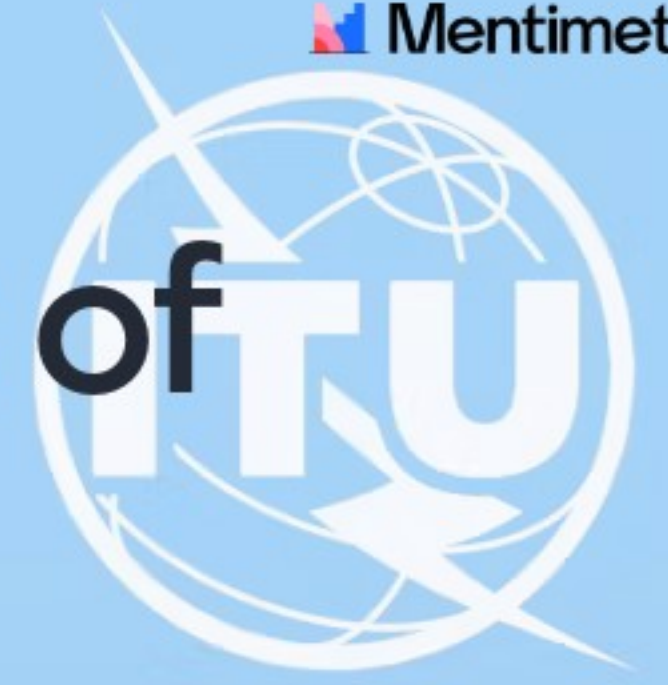

33
Awareness of the organization/country for the ITU-T standards/Recommendations as priorities, topics under study.

28
Interest and support from your organization management.

26
Meetings in the regions.

24
Development of skills and capacities to understand, contribute, negotiate, defend your contribution and implement the resulting ITU-T stds/Reco

8
Translation and/or interpretation of the meetings.

22
Online meetings or remote participation support for physical meetings.

18
Support of fellowship.

22
BSG and newcomers training and guides for new comers/contributors.
