# GENERAL INFORMATION

## Lists annexed to the ITU Operational Bulletin

### Note from TSB

A. The following Lists have been published by TSB or BR as Annexes to the ITU Operational Bulletin (OB):  
OB No.

- 1060 List of ITU Carrier Codes (According to ITU-T Recommendation M.1400 (03/2013) (Position on 15 September 2014)
- 1056 Mobile Network Codes (MNC) for the international identification plan for public networks and subscriptions (According to ITU-T Recommendation E.212 (05/2008)) (Position on 15 July 2014)
- 1055 Status of Radiocommunications between Amateur Stations of Different Countries (In accordance with optional provision No. 25.1 of the Radio Regulations) and Form of Call Signs assigned by each Administration to its Amateur and Experimental Stations (Position on 1 July 2014)
- 1049 Legal time 2014
- 1040 List of Issuer Identifier Numbers for the International Telecommunication Charge Card (In accordance with ITU-T Recommendation E.118 (05/2006)) (Position on 15 November 2013)
- 1033 List of International Signalling Point Codes (ISPC) (According to ITU-T Recommendation Q.708 (03/99)) (Position on 1 August 2013)
- 1028 List of Signalling Area/Network Codes (SANC) (Complement to ITU-T Recommendation Q.708 (03/99)) (Position on 15 May 2013)
- 1015 Access codes/numbers for mobile networks (According to ITU-T Recommendation E.164 (11/2010)) (Position on 1 November 2012)
- 1005 List of mobile country or geographical area codes (Complement to ITU-T Recommendation E.212 (05/2008)) (Position on 1 June 2012).
- 1002 List of Country or Geographical Area Codes for non-standard facilities in telematic services (Complement to ITU-T Recommendation T.35 (02/2000)) (Position on 15 April 2012)
- 1001 List of the national authorities designated to assign ITU-T Recommendation T.35 terminal provider codes (Position on 1 April 2012)
- 1000 Service Restrictions (Recapitulatory list of service restrictions in force relating to telecommunications operation) (Position on 15 March 2012)
- 994 Dialling Procedures (International prefix, national (trunk) prefix and national (significant) number) (In accordance with ITU-T Recommendation E.164 (11/2010)) (Position on 15 December 2011)
- 991 List of ITU-T Recommendation E.164 assigned country codes (Complement to ITU-T Recommendation E.164 (11/2010)) (Position on 1 November 2011)
- 991 Call-Back and alternative calling procedures (Res. 21.PP-2006)
- 980 List of Telegram Destination Indicators (In accordance with ITU-T Recommendation F.32 (10/1995)) (Position on 15 May 2011)
- 978 List of Telex Destination Codes (TDC) and Telex Network Identification Codes (TNIC) (Complement to ITU-T Recommendations F.69 (06/1994) and F.68 (11/1988)) (Position on 15 April 2011)
- 977 List of Data Network Identification Codes (DNIC) (According to ITU-T Recommendation X.121 (10/2000)) (Position on 1 April 2011)
- 976 List of Data Country or Geographical Area Codes (Complement to ITU-T Recommendation X.121 (10/2000)) (Position on 15 March 2011)
- 974 List of Names of Administration Management Domains (ADMD) (In accordance with ITU-T F.400 and X.400 series Recommendations) (Position on 15 February 2011)
- 972 List of terrestrial trunk radio mobile country codes (Complement to ITU-T Recommendation E.218 (05/2004)) (Position on 15 January 2011)
- 955 Various tones used in national networks (According to ITU-T Recommendation E.180 (03/98)) (Position on 1 May 2010)
- 669 Five-letter Code Groups for the use of the International Public Telegram Service (According to ITU-T Recommendation F.1 (03/1998))

B. The following Lists are available online from the ITU-T website:

## Approval of ITU-T Recommendations

By AAP-41, it was announced that the following ITU-T Recommendations were approved, in accordance with the procedures outlined in Recommendation ITU-T A.8:

- ITU-T K.81 (08/2014): High-power electromagnetic immunity guide for telecommunication systems
- ITU-T K.98 (08/2014): Overvoltage protection guide for telecommunications equipment installed in customer premises
- ITU-T K.99 (08/2014): Surge protective component application guide - Gas discharge tubes
- ITU-T K.102 (08/2014): Parameters of fixed-voltage thyristor overvoltage protector components used for the protection of telecommunications installations
- ITU-T L.1310 (08/2014): Energy efficiency metrics and measurement methods for telecommunication equipment
- ITU-T Q.3232 (08/2014): Signalling Requirements and Protocol at the Nc interface between the transport location management physical entity and the transport authentication and authorization physical entity
- ITU-T Q.3913 (08/2014): Set of parameters of devices for monitoring
- ITU-T Q.3931.3 (08/2014): Performance benchmark for the PSTN/ISDN emulation subsystem of an IP multimedia system – Part 3: Traffic Sets and Traffic Profiles
- ITU-T Q.3946.1 (08/2014): Conformance Tests Specification for the session initiation protocol - Part 1: Protocol Implementation Conformance Statement (PICS) proforma
- ITU-T Q.3946.3 (08/2014): Conformance Tests Specification for the session initiation protocol - Part 3: Abstract Test Suite (ATS) and partial Protocol Implementation eXtra Information for Testing (PIXIT) proforma
- ITU-T X.696 (08/2014): Specification of octet encoding rules (OER)
- ITU-T Y.2083 (08/2014): Multimedia telephony over Distributed Service Networking
- ITU-T Y.2302 (08/2014): Functional Architecture for Network Intelligence Capability Enhancement (NICE)
- ITU-T Y.2616 (08/2014): Interworking mechanisms in public packet telecom data network (PTDN)
- ITU-T Y.3013 (08/2014): Socio-economic Assessment of Future Networks by Tussle Analysis
- ITU-T Y.3320 (08/2014): Requirements for applying formal methods to software-defined networking
- ITU-T Y.3512 (08/2014): Cloud computing - Functional requirements of Network as a Service
- ITU-T Y.3513 (08/2014): Cloud computing – Functional requirements of Infrastructure as a Service

## Assignment of Signalling Area/Network Codes (SANC) (ITU-T Recommendation Q.708 (03/99))

### Note from TSB

At the request of the Administration of Croatia, the Director of TSB has assigned the following signalling area/network code (SANC) for use in the international part of the signalling system No. 7 network of this country/geographical area, in accordance with ITU-T Recommendation Q.708 (03/99):

| <i>Country/geographical area or signalling network</i> | <i>SANC</i> |
|--|-------------|
| Croatia (Republic of)                                  | 7-215       |

SANC: Signalling Area/Network Code.  
Code de zone/réseau sémaphore (CZRS).  
Código de zona/red de señalización (CZRS).

### Costa Rica (country code +506)

Communication of 18.VIII.2014

The *Superintendencia de Telecomunicaciones (SUTEL)* San José, which under Decree N°35187-MINAET (National Numbering Plan) is in charge of the control and administration of Numbering resources in Costa Rica, acting in accordance with the provisions of Recommendation ITU-T E.129, presents the:

Modification to the E.164 National Numbering Plan (NNP) of Costa Rica for country code +506

Table 1 – Description of numbering change in the ITU-T E.164 National Numbering Plan  
for country code +506

| <i>NDC (National Destination Code) or leading digits of N(S)N (National (Significant) Number)</i> | <i>N(S)N number length</i> |                       | <i>Usage of E.164 Number</i>          | <i>Date and time of introduction</i> |
|---|----------------------------|-----------------------|---------------------------------------|--------------------------------------|
|   | <i>Maximum length</i>      | <i>Minimum length</i> |                                       |                                      |
| 4060-0000 to 4060-4999  | 8 digits                   | 8 digits              | IP RACSA Telephone Service            | 2014 – 08 – 18 – 00 :00              |

**Suriname (country code +597)**

Communication of 1.IX.2014:

The *Telecommunicatie Autoriteit Suriname (TAS)*, Paramaribo, announces the following updated numbering plan in Suriname as of the 15<sup>th</sup> of September, 2014.

Presentation of E.164 National numbering for country code +597

## a) Overview:

The minimum number length (excluding the country code) is: six (6) digits

The maximum number length (excluding the country code) is: seven (7) digits

## b) Detail of numbering scheme:

International dialling format:

Mobile: + 597 XXXXXXX

Fixed: + 597 XXXXXX

VoIP: + 597 XXXXXX(X) (6 digits and 7 digits)

International prefix code : 00 (+)

National prefix code: 0

| NDC (National Destination Code) or leading digits of N(S)N (National (Significant) Number)) | N(S)N number length |                | Usage of E.164 Number                       | Additional information |
|---|---------------------|----------------|---|------------------------|
|   | Maximum length      | Minimum length |   |                        |
| 1XX   | 4                   | 3              | Non-geographic                              | Abbreviated numbers    |
| 21 0000 – 21 9999   | 6                   | 6              | Geographic number West Suriname             | Telesur                |
| 22 0000 – 22 9999   | 6                   | 6              | Geographic number West Suriname             | <b>Telesur</b>         |
| 23 0000 – 23 9999   | 6                   | 6              | Geographic number West Suriname             | <b>Telesur</b>         |
| 30 0000 – 30 9999   | 6                   | 6              | Geographic number Mid and East Suriname     | Telesur                |

## National Numbering Plan (According to ITU-T Recommendation E.129 (01/2013))

Web: [www.itu.int/itu-t/inr/nnp/index.html](http://www.itu.int/itu-t/inr/nnp/index.html)

Administrations are requested to notify ITU about their national numbering plan changes, or to give an explanation on their webpage concerning the national numbering plan as well as their contact points, so that the information, which will be made available freely to all administrations/ROAs and service providers, can be posted on the ITU-T website.

For their numbering website, or when sending their information to ITU/TSB (e-mail: [tsbtson@itu.int](mailto:tsbtson@itu.int)), administrations are kindly requested to use the format as explained in Recommendation ITU-T E.129. They are reminded that they will be responsible for the timely update of this information.

From 15.VIII.2014 the following countries have updated their national numbering plan on our site:

| <i>Country</i>   | <i>Country Code (CC)</i> |
|------------------|--------------------------|
| Egypt            | +20                      |
| French Polynesia | +689                     |
| Israel           | +972                     |

**LIST OF ITU CARRIER CODES**  
**(ACCORDING TO RECOMMENDATION ITU-T**  
**M.1400 (03/2013))**

(POSITION ON 15 SEPTEMBER 2014)

---

## List of ITU Carrier Codes

### Note from TSB

1. As the number of telecom operators in each country is growing rapidly, the number of interconnections between their networks is growing even faster. The standardization of designations of all the network interconnections is therefore of great concern for the operators involved. Only then are they able to do the provisioning and maintenance in a systematic and efficient way.
2. The proper use of Recommendation ITU-T M.1400 requires the identification of the operators sharing the interconnection. To that end an overall list of operators working in a country, with an officially recognized and standardized code for each of them, is of great help. It enables them to identify each other in a comprehensive and unique way. This will eventually result in one integrated database for all connections, in turn improving network operations and administration to the benefit of both providers and clients.
3. Due to liberalization of telecommunications and increased competition in the telecommunications industry, there is a mandatory requirement that telecommunications operators that interoperate be identified. A centralized List of ITU Carrier Codes (ICCs) has been created with the ITU/TSB as the repository. All domestic and international carriers are expected to register with ITU/TSB for a carrier code. Instead of individual operators sending their ICCs to the TSB for registration, the national regulatory authorities are requested to provide the validated codes, and related information concerning international and domestic network operators directly to the TSB by using the ICC notification form available online at: <http://www.itu.int/en/ITU-T/inr/forms/Pages/carrier.aspx>.
4. The ICC list identifies Operators that are recognized by each Member State's Administration. Such a list is provided on the central ITU ICC website at [www.itu.int/ITU-T/inr/icc/index.html](http://www.itu.int/ITU-T/inr/icc/index.html). The ICCs may be used both for electronic commerce between operators and for designation of resources in their networks. Hence, ICCs can be assigned both to network operators and to service providers.
5. This List of ITU Carrier Codes replaces that published as an Annex to the ITU Operational Bulletin No. 981 of 1.VI.2011. Since then, a number of notifications have been received at TSB and they have been published separately in various issues of the ITU Operational Bulletin. The present list recapitulates all the different amendments that have been published up to Operational Bulletin No. 1060 of 15.IX.2014.
6. This List will be updated by numbered series of amendments published in the ITU Operational Bulletin. Furthermore, the information contained in this Annex is also available on the ITU web site [www.itu.int/itu-t/bulletin/annex.html](http://www.itu.int/itu-t/bulletin/annex.html).
7. Please address any comments, suggestions or new assignment concerning this List to the Director of the TSB:  

International Telecommunication Union  
Director of TSB  
Fax: +41 22 730 5853  
E-mail: tsbtson@itu.int
8. The designations employed and the presentation of material in this List do not imply the expression of any opinion whatsoever on the part of the ITU concerning the legal status of any country or geographical area, or of its authorities.

## List of ITU Carrier Codes

**Note:** This information may be used while filling-out layer 2 record as explained in Recommendation ITU-T M.1400 – 8.3, 13.3 and 20.3.

## Notification form for List of ITU Carrier Codes<sup>1</sup>

Since 1 January 2004, it has become mandatory for operators utilizing Recommendation ITU-T M.1400 operator ID or ITU Carrier Code (ICC) in the revised Layer 1 structure, to identify route terminations. An ICC is mandatory for interconnections between operators in different countries and different operators in the same country. This code is used in ITU-T M.1400 Layer 1 records to uniquely identify route terminations. It is also used for the purpose of an operator registering its interconnecting operators.

In order to develop a listing of ICCs that may be used to identify the interconnecting operators in ITU-T M.1400 records, as explained in Recommendation ITU-T M.1400, national regulatory authorities are requested to complete the present Notification Form indicating the validated codes and related information for both international and domestic operators. On completion, this Notification Form should be sent directly to TSB at the following address:

Director of TSB  
International Telecommunication Union  
Place des Nations  
1211 Geneva 20  
Switzerland  
E-mail: tsbtson@itu.int  
Fax: +41 22 730 58 53

1. **Company full name:** .....  
(name of operator) .....

2. **Company Code:**

|  |  |  |  |  |  |
|--|--|--|--|--|--|
|  |  |  |  |  |  |
|--|--|--|--|--|--|

(The code by which the operator wishes to identify itself. This code shall be alphabetic or alphanumeric (A to Z):(0 to 9)), up to six characters and/or digits long, and shall be a unique identifier of a network operator/service provider within each country. This code may be one that is in use today, provided it fits the definition.)

3. **Company official address:** .....  
.....  
.....  
.....

4. **Contact:** .....

Tel: + .....

Fax: +.....

E-mail: .....

Date : .....
