List of International Signalling Point Codes (ISPC)

Note from the TSB

1. This List of International Signalling Point Codes (ISPC) replaces the previous one published as Annex to the ITU Operational Bulletin No. 667 of 1.V.1998. Since then, a number of notifications have been received at TSB and they have been published separately in various issues of the ITU Operational Bulletin. The present list recapitulates all the different amendments that have been published up to Operational Bulletin No. 686 of 15.II.1999. The data are listed in the order of the French designations.
2. Recommendation Q.708 states that the assignment of signalling area/network codes (SANC) is to be administered by the TSB. The assignment of international signalling point codes (ISPC) will be made by each country who will then notify the TSB.
3. The numbering plan of Recommendation Q.708 contains 2 048 SANCs providing for 16 384 international signalling points. From these, currently 1 536 SANCs are available for assignment allowing for 12 288 international points. At present 464 SANCs are assigned; the reported utilisation is 1 456 international signalling points.
4. In order to keep the list up to date, Administrations are, therefore, requested to notify the TSB as soon as an ISPC is introduced by using the attached notification Form.
5. This list will be updated by numbered series of amendments published in the ITU Operational Bulletin. Furthermore, the information contained in this Annex is also available on the ITU home page www.itu.int/itudoc/itu-t/ob-lists, and can be consulted by subscribers by remote access.
6. Please address any comments or any modifications concerning this List to the Director of the TSB:
