Privilege Telecommunication

CTITU B08 of 8.XII.1999:

Withdrawal of ITU franking privileges for privilege telecommunications at ITU conferences and meetings in Geneva from the year 2000 onwards and for service telecommunications

Because of the new competitive environment in telecommunications, the Administration of Switzerland regrets that it must end the special arrangements enjoyed by ITU Headquarters in Geneva and traditionally by delegates and participants at conferences and meetings held in Geneva under ITU auspices. From 1 January 2000, therefore, franking privileges will no longer apply to “privilege telecommunications” and “service telecommunications” as defined in the provisions of Article 2, Nos. 17 to 20, and Appendix 3 of the International Telecommunication Regulations (Melbourne, 1988).

Communication of 30.XI.1999:

Teleglobe Canada Inc. continues to exist, but has ceased to provide the international link to AT&T Canada to and from overseas.

Teleglobe Canada Inc. ceased providing the international link on 1 October 1999.

The two-letter destination indicator “CA” (with CAMX) should continue to be used for the routing of telegram traffic and should be transferred to AT&T EasyLink Services.

The full postal address of AT&T EasyLink Services is:

Correspondence concerning the exchange and settlement of accounts for the telegram service for traffic to and from Canada should be sent to AT&T EasyLink Services.

Persons in Canada will have to send their telegrams by dialling a toll-free number, 1-88-TELEGRAM (1-888-353-4726), and dictating their message over the telephone.

All telegrams for delivery within Canada will be delivered via the Canadian Postal System. Delivery will take 3 to 5 days. The hours of operation for telegram delivery will be 24 hours per day all the days of the year.

Note: The information published in ITU Operational Bulletins Nos. 698 and 699 was accurate at the time. Teleglobe, which provided the international link to AT&T Canada, transferred that responsibility to AT&T EasyLink Services, while AT&T Canada continued to ensure the delivery of telegrams to Canada.
