Assignment of Signalling Area/Network Codes (SANC) (ITU-T Recommendation Q.708 (03/99))

Note from the TSB

At the request of the Administration of Australia, the Director of the TSB has assigned the following signalling area/network code (SANC) for use in the international part of the signalling system No. 7 network of this country/geographical area, in accordance with ITU-T Recommendation Q.708 (03/99):

<i>Country/geographical area or signalling network</i>	<i>SANC</i>
Australia	5-116

SANC: Signalling Area Network Code.
Code de zone/réseau sémaphore (CZRS).
Código de zona/red de señalización (CZRS).

International Public Telecommunication Numbering Plan (ITU-T Recommendation E.164 (05/97))

Note from the TSB

– Identification Codes for Global Mobile Satellite Systems (GMSS)

Associated with shared country code 881, the following one-digit identification codes, previously assigned for Iridium, have now been assigned for the following GMSS network:*

<i>Network</i>	<i>Country Code and Identification Code</i>
Iridium Satellite LLC	+881 6 and +881 7

* See page 23 of the present Operational Bulletin.

Access codes/numbers for mobile networks (According to ITU-T Recommendation E.164)

Note from the TSB

Several requests have been received in ITU, asking that a distinction should be made between the fixed telephone numbers and mobile numbers. A List of access codes/numbers for mobile networks has been prepared from the information received on the telephone service for publication in the ITU Operational Bulletin. Administrations/ROAs are requested to verify the information in this List and to inform ITU of any modifications that they wish to make.

The following information is an Amendment to the List No. 1 published in Operational Bulletin No. 726 of 15.X.2000, pages 4 to 11.

NANP – North American Numbering Plan

– Communication of 1.III.2001:*

The *North American Numbering Plan Administration* (NANPA) announces that the NPA (Numbering Plan Area) for Michigan has been geographically split between the existing NPA 810 and the newly assigned NPA 586. NANPA has assigned 586 as the new NPA which will serve the eleven rate centres that approximate Macomb County. Among the communities that will be served by the new NPA are Mount Clemens, Roseville, Warren and Utica.

The split of the NPA 810, and the beginning of the permissive dialling period, will take place at 1201 hours (time of US East Coast), on 22 September 2001. During the permissive period, either the NPA 810 or NPA 586 code will be acceptable in a dialled number terminating in the new NPA 586. After the permissive period, ending 23 March 2002, all calls dialled with the incorrect NPA code will be routed to a recorded announcement.

For more detailed information, see NANPA website: www.nanpa.com

– Communication of 14.III.2001:*

The *North American Numbering Plan Administration* (NANPA) announces that the NPA (Numbering Plan Area) 667 has been assigned to Maryland as an all-services distributed overlay for the NPAs 410 and 443 that serve Eastern Maryland.

All network preparation for the implementation of the NPA 667 should be completed by 1 September 2001 at 1201 hours (local time). Ten-digit dialling is already mandatory in the area served by these codes, so no permissive dialling period is required in preparation for this overlay. The in-service date for the NPA 667, and the earliest code activation date for central office codes assigned in the NPA 667, will be the date of exhaustion of the NPAs 410 and 443. That date is currently anticipated to be 1 December 2001. The date certain is to be set three months before exhaustion.

The current Maryland dialling plan will not change with the activation of the NPA 667.

- All local calls within, and between the NPAs 410, 443 and 667 may be dialled as ten (10) digits (NPA+NXX+XXXX) or, permissively, as one (1) + ten (10) digits.
- All toll calls within and between NPAs 410, 443 and 667 must be dialled as one (1) + ten (10) digits (1+NPA+NXX+XXXX).
- All calls to NPAs other than 410, 443 and 667 must be dialled as one (1) + (ten) 10 digits (1+NPA+NXX+XXXX).
- Operator assisted, third party, and credit card calls must be dialled as zero (0) + (ten) 10 digits (0+NPA+NXX+XXXX).

Verizon has volunteered to provide a telephone number in the NPA 667 for testing purposes. Beginning 1 August 2001, test calls to verify routing can be made by dialling +1 667 999 8378. The test number will be available until two months after the activation of the NPA 667. A recorded announcement will indicate successful completion of the call. Additionally, all international and domestic carriers should ensure that the new NPA 667 can be translated throughout their networks prior to 1 August 2001.

For more detailed information, see NANPA web site: www.nanpa.com

Nigeria

Communication of 21.II.2001:

The *Ministry of Communications*, Abuja, announces that the GSM mobile network will be introduced in Nigeria (country code +234) as from 13 May 2001.

The national destination code for the GSM mobile network is 80 and it will be implemented by NITEL Plc.

The international dialling format will be thirteen (13) digits in length: +234 80X XXX XXXX

The GSM network in Nigeria shall be implemented by three (3) GSM operators, including NITEL Plc. The dialling format for these operators shall be:

+234 802 XXX XXXX for operator 1

+234 803 XXX XXXX for operator 2

+234 804 XXX XXXX for operator 3

Dialled numbers for subsequent operators in the future, when they are licensed, shall be:

+234 805 XXX XXXX

+234 806 XXX XXXX, etc.

It is also planned to increase in the future the international numbering plan of other networks from eleven (11) to thirteen (13) digits, in order to ensure uniform numbering for the entire telephone network of Nigeria.

(POSITION ON 1 APRIL 2001)

List of Signalling Area/Network Codes (SANC)

Note by the TSB

1. This List of Signalling Area/Network Codes (SANC) replaces the previous one published as Annex to the ITU Operational Bulletin No. 711 of 1.III.2000. Since then, various new assignments have been made and they have been published separately in various issues of the ITU Operational Bulletin. The present List contains all the amendments that have been published up to Operational Bulletin No. 737 of 1.IV.2001.

2. The present List includes:

- a list of SANC codes in numerical order
- a list of SANC codes in alphabetical order of names of countries/geographical areas.

3. ITU-T Recommendation Q.708 (03/99) states that the assignment of signalling area/network codes (SANC) is to be administered by the TSB. The assignment/withdrawal of international signalling point codes (ISPC) will be made by each country who will then notify the TSB.

4. A request for a SANC is to be made by the Administration in writing to the Director of the TSB. In order to request an additional SANC an Administration must provide the Director of the TSB notification of the current assignment of ISPCs by that Administration. Assignment of an additional SANC code requires assignment of 75 percent of the ISPC codes in all SANC codes previously assigned to the Administration concerned.

5. For information, this List will be updated by numbered series of amendments published in the ITU Operational Bulletin. Furthermore, the information contained in this Annex is also available on the ITU home page (<http://www.itu.int/itu-t/bulletin>), and can be consulted by subscribers by remote access.

6. Countries who wish to take part in the international signalling network or require an additional signalling area/network code (SANC) should ask the Director of the TSB for the assignment of an available SANC code. In their request they may indicate the available SANC code preferred. Please address any comments to the Director of the TSB:
