Telegram Service

Austria

Communication of 13.VI.2001:

Cessation of telegram service

The Bundesministerium für Verkehr, Innovation und Technologie (Federal Ministry for Transport, Innovation and Technology), Vienna, announces that Telekom Austria AG will no longer provide the international telegram service to and from Austria with effect as from 1 July 2001.

To meet the communication needs of its customers abroad, Telekom Austria AG will use instead more economic and faster services such as automatic telephone, facsimile or e-mail.

Telephone Service

Brazil (country code +55)

Communication of 20.VI.2001*:

Empresa Brasileira de Telecomunicações S.A. (EMBRATEL), Rio de Janeiro, recalls that the Brazilian numbering plan is being updated. The subscriber number format is increasing from seven to eight digits. Changes are scheduled to take place over several months. The general rule for the present changes is described in the table below, and future updates will be communicated as they are introduced.

As from 30 June 2001, in the region of Rio de Janeiro (area code 21), the digit 2 must be added in front of the first digit of the current seven-digit telephone numbers beginning by 2, 4, 5, 6 and 7. There will however be two exceptions to this general rule with regard to number series 460XXXX and 461XXXX. Instead of adding the digit 2, the digit 3 must be added. Example: 460XXXX will change to 3460XXXX and 461XXXX will change to 3461XXXX.

For all other number series, the digit 2 or 3 should be added in front of the old seven-digit telephone numbers beginning with 2, 4, 5, 6 and 7.

Calling format: +55 + area code + subscriber number

Area/access code	Subscriber number update		Type of service	Implementation date
	Current subscriber number	New subscriber number

Thailand (country code +66)

Communication of 13.VI.2001:

The *Post and Telegraph Department*, Bangkok, announces that a new national numbering plan will be introduced for the telephone network of Thailand on 5 July 2001.

The new numbering plan will consist of integrating the existing area code at the beginning of the subscriber number, thus making the national (significant) number (N(S)N):

area code + subscriber number (SN) = eight digits.

Therefore, the national dialling plan for calls in the same area code will be changed from six- or seven-digit subscriber numbers to "0" + eight-digit subscriber numbers. However, the international public telecommunication number, CC (+66) + N(S)N (eight-digit number), will be unchanged.

The list of the international public telecommunication numbers is as follows:

- *Fixed network*
- Metropolitan Area

Country code	Area code	Present seven-digit subscriber number		Country code	New eight-digit subscriber number
+66	2	XXX XXXX		+66	2XXX XXXX

- Provincial Area

Country code	Area code	Present six-digit subscriber number		Country code	New eight-digit subscriber number
