Telephone Service

Lithuania (country code +370)

Communication of 1.VIII.2001:

AB Lietuvos Telekomas, Vilnius, announces that the Lithuanian National Numbering Plan will be modified in line with the objectives to maximize the numbering capacity of fixed and mobile telephony in Lithuania. In addition, new services will be made more easily available in view of the upcoming deregulation of the telecommunications market in Lithuania.

The new National Numbering Plan of Lithuania will expand the national (significant) number from seven to eight digits so as to guarantee sufficient numbering capacity. The expansion will be performed by extending the area codes of the fixed network and the mobile operator access codes.

The implementation of the new National Numbering Plan change will start on 1 September 2001 by introducing the following new mobile network access codes, in addition to the existing mobile access codes:

<i>Mobile operator</i>	<i>New mobile code</i>	<i>Test number</i>
Omnitel	610	+370 610 22555
	611	+370 611 22555
Bite GSM	650	+370 650 70001
	651	+370 651 70001
TELE2	670	+370 670 22029
	671	+370 671 22029

International dialling format is : +370 6YY XXXXX, where:

+370 is the country code for Lithuania

6YY is the new mobile access code

XXXXX is the subscriber number

It should be noted that the national (significant) numbers including the newly implemented mobile access codes will be eight digits in length, whereas the national (significant) numbers including the existing mobile access codes (mobile network) or existing area codes (fixed network) will remain seven digits in length.

Administrations are requested to ensure that these new codes are programmed in their international switching centers.
