Telephone service

Kenya (country code +254)

Communication of 12.VIII.2002:

New Telecommunications Numbering Plan for Kenya

The *Communications Commission of Kenya (CCK)*, Nairobi, announces a few amendments in the implementation schedule of the New Telecommunications Numbering Plan, which was unveiled earlier this year. The changes have been occasioned by the need to introduce a period of parallel running of the old and the new area codes in response to suggestions from network operators and others interested parties. As indicated in tables 1 and 2 below, the cutover date for parallel running of the area codes has now been deferred to 7 December 2002, with a commencement date of 7 September 2002. The period of parallel running will, therefore, last three months.

The introduction of a new numbering plan was necessitated by the liberalization of the telecommunications sector in Kenya, which resulted in an unprecedented growth of telecommunications services in the country. The growth has created a huge demand on the telecommunications numbering resource.

The expectation of more entrants in the market also created a compelling need to revise the previous numbering plan. Entry of other operators in the market is expected to lead to the realization of the Government's objective of ensuring that rural and other less economically lucrative areas are adequately served. Incumbent operators, future entrants and end users require equal and non-discriminatory access to telephone numbers.

Highlights of the New Numbering Plan

The highlights of the new numbering plan are as follows:

- The country has been divided into areas, and each area has been assigned a unique two-digit area code.
- The access codes for mobile networks have been standardized to three digits. The cellular mobile subscriber number, however, remains at six digits.
- The subscriber number for fixed networks, which currently varies in length between four, five and six digits, will be standardized to seven digits.
- In anticipation of a telecommunications multi-carrier environment, short codes in the range of 1XX have been introduced to facilitate the selection of the preferred carriers by the subscribers.
- Short codes for essential services are in the range of 9XX.
- All international calls destined for Kenya shall be standardized to twelve digits.

The new telecommunications numbering plan is as follows:

Country code	+254
National trunk dialling prefix	0
Regional access code – Uganda – Tanzania	006 007
International dialling prefix	000
Area codes for the public switched telephone networks (PSTN)	As given in Table 1
Fixed network subscriber numbers	As given in Tables 1 and 2
Mobile services	(0)7XX
Special tariff services (free phone etc.)	(0)8XX
Premium rate services	(0)9XX
Enquiry services	991 992
Emergency services	999
Time (Kiswahili)	993
Time (English)	994
Faults test services	998
Fault reporting	997
Operator assistance	900

1. Dialling Format

1.1 Incoming calls

- Callers calling Kenya from any country outside East Africa will dial +254 NN XXX XXXX (a maximum of twelve decimal digits).
- Callers calling Kenya from Uganda and Tanzania will dial 005 NN XXX XXXX.
- Callers within Kenya making calls from one area code to another will dial 0NN XXX XXXX.

- Callers within Kenya making calls within the same area code will dial XXX XXXX.
Where:
+ is the international prefix of the respective country,
254 is the country code for Kenya,
NN is the national destination code (area code),
XXX XXXX is the subscriber number,
0 is the national prefix,
005 is the access code to Kenya within the East Africa (i.e. from Uganda and Tanzania)

1.2 Outgoing calls

Callers in Kenya making outgoing calls either to the East African countries or to other international destinations shall continue calling using the existing dialling formats and prefixes.

2. Implementation schedule

The new telecommunications numbering plan will be implemented in three phases as indicated below:

2.1 Phase 1: Changeover date: 30th June 2002

The Mobile National Destination Code (MNDC) of Safaricom Limited changed from 072 to 0722 from March 2002. However the existing numbers on 072 co-existed in parallel with new numbers on the new MNDC 0722 up to 30 June 2002. Voice announcement replaced the co-existence until 30 September 2002.

2.2 Phase 2: Change over date: 7th December 2002

The National Destination Codes (area codes) will be standardised to two digits. Details of the new area codes and the affected subscriber numbers are given in Table 1 hereafter.

2.3 Phase 3: Changeover date: 30th July 2003

The subscriber number length shall be standardized to seven-digits in Nairobi and Mombasa. Details of the new subscriber numbers are given in Table 2 hereafter.

The rest of the country shall gradually change subscriber number length in existing exchanges to seven digits during modernization and expansion of switches. The affected subscribers will be advised accordingly. New exchanges shall be assigned telephone numbers from the new numbering plan.

Czech Rep. (country code+420)

Communication of 5.VIII.2002*:

ČESKÝ TELECOM, a.s., Praha, the major telecommunications operator in the Czech Republic, announces that under the decision of the regulatory body – the *Czech Telecommunications Office (CTO)* – all telephone numbers in the country will be changed during the night of 21 to 22 September 2002.

The new numbering plan will be closed – the area code will be the part of the national number. Within this re-numbering, the quantity of telephone node areas will be reduced and many numbers will consequently be changed.

The leading "0" (zero) for long distance calls will no longer be used.

This number change concerns all telecommunication operators in the Czech Republic, including mobile operators.

All national numbers used by subscribers will have nine digits; these new numbers will have to be used for each domestic (either local or long distance) call. For outgoing international calls from the Czech Republic, the same procedure will be applied before and after this change (the usage of "00" as the international prefix remains the same).

When dialling from abroad to the Czech Republic, after the international access code (international prefix) and the country code of the Czech Republic (+420), the new national subscribers' number (consisting of these nine digits) will follow.

As from 22 September 2002 at 0100 hours UTC, national (significant) numbers will comprise a trunk code (TC).

- Mobile telephony, non-geographic and non-mobile numbers

The numbering plan uses the principle of closed numbering for fixed, mobile and also non-geographic and non-mobile numbers. The national prefix code "0" (zero) to destination networks and also to access codes for other services (SACs) will not be used in the closed numbering (after 22.IX.2002 0100 hours UTC). Calling from abroad to mobile networks in the Czech Republic is unchanged.

- Supplementary telephone services

Supplementary telephone services in the Czech Republic are accessible by means of shortened numbers. The first digit has the value "1". Supplementary services are generally not geographically differentiated numbers. Shortened numbers are three to six digits in length. Not all supplementary services are available from abroad.

Examples: 1240 Car assistance service
1180 Information on national telephone subscriber numbers.
