GENERAL INFORMATION

Lists annexed to the Operational Bulletin

Note from TSB

- A. The following Lists have been published by TSB or BR as Annexes to the ITU Operational Bulletin (OB):

OB No.

- 669 Five-letter Code Groups for the use of the International Public Telegram Service (According to ITU-T Recommendation F.1 (03/98))
- 691 Service Restrictions (Recapitulatory list of service restrictions in force relating to telecommunications operation) (Position on 1 May 1999)
- 693 List of Telex Destination Codes (TDC) and Telex Network Identification Codes (TNIC) (Complement to ITU-T Recommendations F.69 and F.68) (Position on 31 May 1999)
- 720 List of Data Country or Geographical Area Codes (Complement to ITU-T Recommendation X.121) (Position on 15 July 2000)
- 725 List of Names of Administration Management Domains (ADMD) (In accordance with ITU-T F.400 and X.400 series Recommendations) (Position on 30 September 2000)
- 761 List of International Signalling Point Codes (ISPC) (According to ITU-T Recommendation Q.708 (03/99)) (Position on 1 April 2002)
- 763 List of ITU-T Recommendation E.164 assigned country codes (Complement to ITU-T Recommendation E.164 (05/1997)) (Position on 1 May 2002)
- 764 List of Telegram Destination Indicators (In accordance with ITU-T Recommendation F.32) (Position on 15 May 2002)
- 765 Access codes/numbers for mobile networks (According to ITU-T Recommendation E.164) (Position on 1 June 2002)
- 766 List of Country or Geographical Area Codes for non-standard facilities in telematic services (Complement to ITU-T Recommendation T.35) (Position on 15 June 2002)
- 767 Status of Radiocommunications between Amateur Stations of different Countries (In accordance with optional provision No. 25.1 of the Radio Regulations) and Form of Call Signs assigned by each Administration to its Amateur and Experimental Stations (Position on 1 July 2002)
- 767 List of Signalling Area/Network Codes (SANC) (Complement to ITU-T Recommendation Q.708 (03/99)) (Position on 1 July 2002)
- 777 List of Data Network Identification Codes (DNIC) (According to ITU-T Recommendation X.121 (10/00)) (Position on 1 December 2002)
- 779 Mobile Network Code (MNC) for the international identification plan for mobile terminals and mobile users (According to ITU-T Recommendation E.212) (11/98) (Position on 1 January 2003)
- 781 Various tones used in national networks (According to ITU-T Recommendation E.180) (03/1998) (Position on 1 February 2003)
- 783 List of Mobile Country or Geographical Area Codes (Complement to ITU-T Recommendation E.212 (11/98)) (Position on 1 March 2003)
- 785 List of Issuer Identifier Numbers for the International Telecommunication Charge Card (in accordance with ITU-T Recommendation E.118) (Position on 1 April 2003)
- 787 Dialling Procedures (International prefix, national (trunk) prefix and national (significant) number) (In accordance with ITU-T Recommendation E.164 (05/97)) (Position on 1 May 2003)

- B. The following Lists are now available online from the ITU-T website:

List of ITU Carriers Codes

(ITU-T Rec. M.1400 (02/2000))

Approval of ITU-T Recommendations

A By TSB AAP-52 of 16 April 2003, it was announced that the following ITU-T Recommendations were approved, in accordance with the procedures outlined in ITU-Recommendation A.8:

- ITU-T Recommendation G.707/Y.1322 (2000): Amendment 3 (13/04/2003)
- ITU-T Recommendation M.2100 (13/04/2003): Performance limits for bringing-into-service and maintenance of international multi-operator PDH paths and connections
- ITU-T Recommendation Y.1720 (6/04/2003): Protection switching for MPLS networks

Assignment of Signalling Area/Network Codes (SANC) (ITU-T Recommendation Q.708 (03/99))

Note from TSB

At the request of the Administration of Bulgaria, the Director of TSB has assigned the following signalling area/network code (SANC) for use in the international part of the signalling system No. 7 network of this country/geographical area, in accordance with ITU-T Recommendation Q.708 (03/99):

<i>Country/geographical area or signalling network</i>	<i>SANC</i>
Bulgaria (Republic of)	6-250

SANC: Signalling Area/Network Code.
Code de zone/réseau sémaphore (CZRS).
Código de zona/red de señalización (CZRS).

Telegram Service Telex Service

Serbia and Montenegro

Communication of 22.IV.2003:

International Telegraph Switching Center in Serbia and Montenegro (ex Yugoslavia)

Telekom Srbija a.d., Beograd, announces that the International Telegraph Switching Center, designation "GENTEX BEOGRAD", is the gateway switching center for the international public telegram service in Serbia and Montenegro, ex Yugoslavia.

The address, answer-back code and service hours of the gateway switching center are as follows:

<i>Gateway switching center</i>	<i>Answer-back code</i>	<i>Monday – Friday</i>	<i>Saturday</i>	<i>Sunday and public holidays</i>
BEOGRAD International Telegraph Switching Center Takovska 2	12919b bgd yu	0700 – 2100 hours (local time)	0700 – 2100 hours (local time)	0700 – 2100 hours (local time)

Furthermore, the International Telegraph Switching Center (GENTEX BEOGRAD) also provides telex assistance operator service and telex directory information service. For both information services, only one telex number can be called: 72914.

For further information, please contact:

**National Numbering Plan
(According to ITU-T Recommendation E.129 (09/02))**

Electronic version: <http://itu.int/itu-t/inr/nnp/>

Administrations are requested to notify ITU about their national numbering plan changes, or to give an explanation of their web page on national numbering plan as well as their contact points, so that the information, which will be available freely to all Administrations/ROAs and service providers, can be posted on ITU-T website.

For their numbering website, or when sending their information to ITU/TSB (e-mail: tsbtson@itu.int), Administrations are kindly requested to use the format as explained in ITU-T Recommendation E.129. They are reminded that they will be responsible for the timely update of this information.

From 15 March to 1 April 2003, the following countries have updated or provided their national numbering plan:

<i>Bangladesh</i>	(country code +880)
<i>Dominica</i>	(country code +1 767)
<i>New Caledonia</i>	(country code +687)

**DIALLING PROCEDURES (INTERNATIONAL
PREFIX, NATIONAL (TRUNK) PREFIX AND
NATIONAL (SIGNIFICANT) NUMBER) (IN
ACCORDANCE WITH ITU-T
RECOMMENDATION E.164 (05/97))**

(POSITION ON 1 MAY 2003)

Geneva, 2003

Note by the TSB

1. This List of "Dialling Procedures" replaces the previous one published as Annex to the ITU Operational Bulletin No. 759 of 1.III.2002. The present list recapitulates all the different amendments that have been published up to Operational Bulletin No. 787 of 1.V.2003.

2. The list of "**Dialling Procedures**" contains the national (trunk) prefix, the international prefix, the country code and the national (significant) number in accordance with ITU-T Recommendation E.164 (05/97).

3. The **national (trunk) prefix** is the digit, or combination of digits, which must be dialled before an area (city) code when dialling a call to a subscriber from inside his own country but outside his own numbering area. It provides access to the automatic outgoing trunk equipment. If the entry in this column is blank for a particular country, it means that the country has a single nation wide numbering plan that does not use area codes, and all calls to anywhere in the country are dialled by using the entire local number.

Accordingly, in the international service the trunk prefix of the country of destination must not be dialled. ITU-T recommends that the Administrations of countries which have not yet adopted a trunk prefix or are revising the prefix for access to their national trunk network should adopt a prefix composed of a single digit, preferably "0".

4. The **international prefix** is the digit, or combination of digits, which must be dialled before a country code when dialling a call to a country other than the one from which the call is being placed. If the entry in this column is blank for a particular country, it means that the country does not have direct dialling facilities to other countries (in other words, international calls must be placed through the assistance of an operator).

ITU-T recommends that the Administrations of countries which have not yet introduced automatic international operation or are, for various reasons, revising their numbering plans, should adopt an international prefix (a code for access to the international automatic network) composed of the two digits "00".

5. The **country code** is composed of one digit or is the combination of two or three digits, characterizing the called country which is used to route calls to the required country. It is usually dialled after the international prefix. The List of country codes is also published in the "List of ITU-T Recommendation E.164 assigned country codes", as an annex to the Operational Bulletin.

6. The **national (significant) number** is the number to be dialled following the national (trunk) prefix to obtain a subscriber in the same country but in a different local network or numbering area. The national (significant) number consists of the area code followed by the subscriber number. If the entry in this column is blank for a particular country, it means that the information is missing.

7. For your information, the present List is published as an Annex to the ITU Operational Bulletin. Furthermore, the information it contains is also available on the ITU home page <http://www.itu.int/itu-t/bulletin/index.html> and can be consulted by subscribers by remote access.

8. Every effort has been made to ensure that the information contained in the Annex is accurate. Administrations are requested to notify all modifications or missing information concerning their national (trunk) prefix, international prefix and the length of their national (significant) number by using the attached form.

9. The designations employed and the presentation of material in this List do not imply the expression of any opinion whatsoever on the part of the ITU concerning the legal status of any country or geographical area, or of its authorities.

Dialling Procedures

Dialling Procedures

Notes

- 1 With effect from 1 June 2002 until 31 August 2004, the length of the national (significant) number N(S)N will be open from 8 to 10 digits. With effect from 1 September 2004, the length of N(S)N will be closed with 10 digits.
- 2 The '0' is used on all domestic calls, including in the same city, but is omitted when dialling from other countries.
- 3 When dialling from Ireland to Northern Ireland, the area code used should be '048' instead of '004428'.
- 4 In Comoros Islands, the subscriber numbers begin with digit '7' and Mayotte digit '6'.
- 5 When dialling from San Marino to Italy, the complete national subscriber number must be used, without prefixing the number by '0039'.
- 6 When dialling from Italy to San Marino, the subscriber number must be prefixed by '0549' instead of '00378'.
- 7 A few exceptions exist where the maximum length of the national (significant) number is 9 digits.
- 8 Including Australia Antarctic Territory Bases and Norfolk Island (international prefix for Norfolk Island is '0101').
- 9 When dialling from Malaysia to Singapore, the subscriber number must be prefixed by '02' instead of '0065'.
- 10 When dialling from Singapore to Malaysia, the area code and subscriber number must be prefixed by '020' instead of '00160'.
- 11 For calls from one Inmarsat terminal to another, the '00' prefix is followed by the country code (871 to 874) and the terminal number followed by '#'.
- 12 Includes also Cocos-Keeling Islands and Christmas Island.
- 13 Reserved for the Palestinian Authority.
- 14 YZ : long-distance operator code.
- 15 The eleven digit scheme is solely for numbers that attract no charge for the subscriber making the call (800) or for numbers that call for a surcharge for subscriber A (900). All other numbers have a fixed seven digit scheme.
- 16 The country code listed is for future use (Vatican is currently using country code '39').
- 17 Subscriber numbers on the Public Switched Telephone Network (PSTN) consist of 5 digits and those on the mobile network consist of 8 digits.
- 18 Operator code Telecom Malagasy 20.
- 19 When dialling between Kenya, Tanzania and Uganda the national (significant) number must be prefixed by 005 for Kenya, by 006 for Uganda and by 007 for Tanzania..
- 20 11 digits for voice-mail services only.
- 21 Subscriber numbers on PSTN and analogue mobile network consist of 8 digits and those on the mobile network consist of 9 digits.
