GENERAL INFORMATION

Lists annexed to the ITU Operational Bulletin

Note from TSB

- A. The following Lists have been published by TSB or BR as Annexes to the ITU Operational Bulletin (OB):

OB No.

- 827 Dialling Procedures (International prefix, national (trunk) prefix and national (significant) number) (In accordance with ITU-T Recommendation E.164 (05/97)) (Position on 1st January 2005)
- 825 List of Signalling Area/Network Codes (SANC) (Complement to ITU-T Recommendation Q.708 (03/99)) (Position on 1 December 2004)
- 823 List of International Signalling Point Codes (ISPC) (According to ITU-T Recommendation Q.708 (03/99)) (Position on 1 November 2004)
- 818 List of Data Network Identification Codes (DNIC) (According to ITU-T Recommendation X.121 (10/00)) (Position on 15 August 2004)
- 817 List of Data Country or Geographical Area Codes (Complement to ITU-T Recommendation X.121) (Position on 1 August 2004)
- 816 Access codes/numbers for mobile networks (According to ITU-T Recommendation E.164) (Position on 15 July 2004)
- 815 List of terrestrial trunk radio mobile country codes (Complement to ITU-T Recommendation E.218 (05/04)) (Position on 1 July 2004)
- 805 List of ITU-T Recommendation E.164 assigned country codes (Complement to ITU-T Recommendation E.164 (05/97)) (Position on 1 February 2004)
- 803 List of Mobile Country or Geographical Area Codes (Complement to ITU-T Recommendation E.212 (11/98)) (Position on 1 January 2004)
- 801 Mobile Network Code (MNC) for the international identification plan for mobile terminals and mobile users (According to ITU-T Recommendation E.212 (11/98)) (Position on 1 December 2003)
- 785 List of Issuer Identifier Numbers for the International Telecommunication Charge Card (in accordance with ITU-T Recommendation E.118) (Position on 1 April 2003)
- 781 Various tones used in national networks (According to ITU-T Recommendation E.180 (03/98)) (Position on 1 February 2003)
- 767 Status of Radiocommunications between Amateur Stations of different Countries (In accordance with optional provision No. 25.1 of the Radio Regulations) and Form of Call Signs assigned by each Administration to its Amateur and Experimental Stations (Position on 1 July 2002)
- 766 List of Country or Geographical Area Codes for non-standard facilities in telematic services (Complement to ITU-T Recommendation T.35) (Position on 15 June 2002)
- 764 List of Telegram Destination Indicators (In accordance with ITU-T Recommendation F.32) (Position on 15 May 2002)
- 725 List of Names of Administration Management Domains (ADMD) (In accordance with ITU-T F.400 and X.400 series Recommendations) (Position on 30 September 2000)
- 693 List of Telex Destination Codes (TDC) and Telex Network Identification Codes (TNIC) (Complement to ITU-T Recommendations F.69 and F.68) (Position on 31 May 1999)
- 691 Service Restrictions (Recapitulatory list of service restrictions in force relating to telecommunications operation) (Position on 1 May 1999)
- 669 Five-letter Code Groups for the use of the International Public Telegram Service (According to ITU-T Recommendation F.1 (03/98))

- B. The following Lists are now available online from the ITU-T website:

List of ITU Carriers Codes

Approval of ITU-T Recommendations

A.1 By TSB Circular 13 of 16 December 2004, it was announced that the following new ITU-T Recommendation was approved, in accordance with the procedures outlined in § 6.2 of ITU-T Recommendation A.8 (WTSA-04):

- ITU-T Recommendation Q.1980.1 (10/12/2004): The Narrowband Signalling Syntax (NSS) – Syntax definition

Assignment of Signalling Area/Network Codes (SANC) (ITU-T Recommendation Q.708 (03/99))

Note from TSB

At the request of the Administration of Bangladesh, the Director of TSB has assigned the following signalling area/network code (SANC) for use in the international part of the signalling system No. 7 network of this country/geographical area, in accordance with ITU-T Recommendation Q.708 (03/99):

<i>Country/geographical area or signalling network</i>	SANC
Bangladesh (People's Republic of)	4-141

SANC: Signalling Area/Network Code.
Code de zone/réseau sémaphore (CZRS).
Código de zona/red de señalización (CZRS)

Telephone Service

Angola (country code +244)

Communication of 2.XII.2004:

Angolan Institute of Communications (INACOM), Luanda, announces the following modification in the National Numbering Plan (NNP) of Angola:

(1) <i>Communicated time and date of change</i>	(2) <i>N(S)N (National (Significant) Number)</i>		(3) <i>Usage of E.164 Number</i>	(4) <i>Parallel running</i>		(5) <i>Operator</i>	(6) <i>Proposed wording of announcement</i>
	<i>Old number</i>	<i>New number</i>		<i>Begins</i>	<i>Ends</i>		
15.I.2005 0000 hours	91 XXX XXX	91 ZXXX XXX	Mobile number			MOVICEL	Movicel numbers have changed. Please redial, inserting digit Z after 91
15.I.2005 0000 hours	92 XXX XXX	92 3XXX XXX	Mobile number			UNITEL	Unitel numbers have changed. Please redial, inserting digit 3 after 92

In a second phase, INACOM will implement modifications in all geographic numbers. These changes will be communicated later.

Armenia (country code +374)

– Communication of 26.XI.2004:

The *Ministry of Transport and Communications*, Yerevan, announces that a new numbering resource has been assigned for the usage of mobile GSM services and will shortly be introduced in the Republic of Armenia.

Description of introduction of new resource for National Numbering Plan (NNP) for country code +374 presented according to ITU-T Recommendation E.129:

(1) <i>NDC (National Destination Code) or leading digits of N(S)N (National (Significant) Number)</i>	(2) <i>N(S)N Number Length</i>		(3) <i>Usage of E.164 Number</i>	(4) <i>Time and Date of Introduction</i>
	<i>Maximum Length</i>	<i>Minimum Length</i>		
93 (NDC)	11	11	Non-geographic number Mobile telephony – assigned to K-Telecom	00:00:01 hours 1 February 2005
94 (NDC)	11	11	Non-geographic number Mobile telephony – assigned to K-Telecom	00:00:01 hours 1 February 2005

– Communication of 9.XII.2004:

The *Ministry of Transport and Communications*, Yerevan, announces that a new exchange has been installed in the Aparan town of Aragatsotn Marz, Republic of Armenia, and the numbering has changed from four to five digits. The new dialling plan for Aparan is as follows:

+374 52 2XXXX, where: Country code: +374
Area code for Aparan: 52
Subscriber number: 2XXXX

Inmarsat (country code +870)

Communication of 10.XII.2004:

Inmarsat, London, announces an additional range for customer numbers with the initial digits '78' to be used by the new BGAN, UMTS compatible system.

As previously notified in the ITU Operational Bulletin, Inmarsat is committed to its agreement with the ITU to move all its services to the E.164 country code +870 and for the other four E.164 country codes to be returned to spare status.

To this end the new Inmarsat system BGAN to be introduced in 3rd quarter of 2005 will operate with the E.164 country code +870 and the initial digits of its customer/terminal numbers will be '77' and '78'.

All Administrations and operators are requested to make the necessary arrangements for their users of the international telephone service to be able to select numbers commencing by '77' and '78' behind the E.164 country code of +870.

Operators should note that this numbering range will require different routing arrangements compared with the other Inmarsat systems and numbering ranges. Further information will be made available with regard to the routing requirements for +870 77 and +870 78 traffic in due course.

Israel (country code +972)

Communication of 8.XII.2004:

The *Ministry of Communications (MOC)*, Tel Aviv, announces the following National Numbering Plan (NNP) for Israel:

Presentation of E.164 National Numbering for country code +972 (Israel):

(a) Overview:

- Minimum number length (excluding the country code): 8 digits
- Maximum number length (excluding the country code): 9 digits

(b) Detail of numbering plan:

(1) <i>NDC (National Destination Code) or leading digits of N(S)N (National (Significant) Number)</i>	(2) <i>N(S)N Number Length</i>		(3) <i>Usage of E.164 Number</i>	(4) <i>Additional Information</i>
	<i>Maximum Length</i>	<i>Minimum Length</i>		
2 (NDC)	8	8	Geographic number for fixed telephony services (Area code)	Area code for Jerusalem Region
3 (NDC)	8	8	Geographic number for fixed telephony services (Area code)	Area code for Tel Aviv Region
4 (NDC)	8	8	Geographic number for fixed telephony services (Area code)	Area code for Haifa and North Regions
50 (NDC)	9	9	Non-geographic number for mobile telephony services	Assigned to Pelephone
51 (NDC)	9	9	Non-geographic number for mobile telephony services	Reserved
52 (NDC)	9	9	Non-geographic number for mobile telephony services	Assigned to Cellcom
53 (NDC)	9	9	Non-geographic number for mobile telephony services	Reserved
54 (NDC)	9	9	Non-geographic number for mobile telephony services	Assigned to Partner
55 (NDC)	9	9	Non-geographic number for mobile telephony services	Reserved
56 (NDC)	9	9	Non-geographic number for mobile telephony services	Reserved
57 (NDC)	9	9	Non-geographic number for mobile telephony services	Assigned to Mirs
58 (NDC)	9	9	Non-geographic number for mobile telephony services	Reserved
59 (NDC)	9	8*	Non-geographic number for mobile telephony services	Assigned to Jawall
6 (NDC)	9	9	Reserved	
77 (NDC)	9	9	Non geographic number for VOIP telephony services	Assigned to HOT Telecom
7X (NDC) X = 2,3,4,5,6,8,9	9	9	Reserved – Non geographic number for fixed telephony services	
8 (NDC)	8	8	Geographic number for fixed telephony services (Area code)	Area code for Hashfela and South Regions
9 (NDC)	8	8	Geographic number for fixed telephony services (Area code)	Area code for Hasharon Region

* Will be 9 digits in the future.

Telespazio S.p.A. (country code +882 13)

Communication of 12.XII.2004:

Telespazio S.p.A. wishes to inform all concerned parties that numbers under the code +882 13 are to be used only for the identification of Emsat satellite network subscribers belonging to the Emsat System Network, for the provision of satellite communication services. Such numbers are not to be used for any other application differing from the services offered within the Emsat Network utilization. In particular, the use of Emsat numbering for services associated with 'web diallers' is not permitted.

Telespazio S.p.A. counts on the collaboration of other operators and of the ITU itself, for assistance in monitoring any potential use that is not in conformity with the rules, thus helping Telespazio S.p.A. to protect its name and image against any misuse of the Emsat Network.

Other Communications

ITU Headquarters

The following days will be considered as holidays in 2005 (day, month) at ITU Headquarters in Geneva (Switzerland):

3.01*	New Year
25.03	Good Friday
28.03	Easter Monday
5.05	Ascension Day
26, 27, 28**, 29*** and 30.12****	Christmas – New Year

* Monday 3 January 2005 replacing Saturday 1st January 2005.

** Wednesday 28 December 2005 replacing Sunday 25 December 2005.

*** Thursday 29 December 2005 replacing Sunday 2 January 2005.

**** Friday 30 December 2005 replacing Thursday 8 September 2005 (Jeûne genevois).

Service Restrictions

Hungary

Communication of 26.XI.2004:

There is no reduced rate for telephone calls exchanged during light traffic period.

Pakistan

Communication of 25.XI.2004:

The telecommunication service with Israel is suspended.

Sudan

Communication of 28.XI.2004:

The telecommunication service with Israel is suspended.

Note from TSB

See the recapitulatory List of service restrictions still in force published as an annex to Operational Bulletin (OB) No. 691 of 1.V.1999 and the following subsequent communications concerning new, modified or deleted service restrictions:

Call-Back and alternative calling procedures (Res. 21 Rev. PP-2002)

Note from TSB

Countries/geographical areas for which information regarding "Call-Back and certain alternative calling procedures not in accordance with the relevant regulations" has been published in the ITU Operational Bulletin (No.):

Algeria (621), Netherlands Antilles (627), Saudi Arabia (629), Azerbaijan (663), Bahrain (611), Belarus (616), Bosnia and Herzegovina (772), Bulgaria (665), Burkina Faso (631), Burundi (607), Cameroon (671), China (599), Cyprus (626), Colombia (602), Cook Islands (681), Cuba (632), Djibouti (614), Egypt (599, 690), United Arab Emirates (627), Ecuador (619), Ethiopia (657), Gabon (631), Guinea (681), Honduras (613), India (627), Jamaica (648), Japan (649), Jordan (652), Kazakhstan (619), Kenya (605), Kyrgyzstan (616), Kuwait (610), Latvia (617), Lebanon (642), Madagascar (639), Malaysia (603), Malta (688), Morocco (619), Mexico (697), Monaco (749), Niger (618), Nigeria (647), Uganda (603), Qatar (593), Dem. Rep. of the Congo (672), Seychelles (631), Sudan (686), South Africa (655), Tanzania (624), Thailand (611), Turkey (612), Viet Nam (619), Wallis and Futuna (649), Yemen (622).

In addition, the following countries/geographical areas stated that the practice of "Call-back" is prohibited on their territory:

Albania, Armenia, Bahamas, Belize, Benin, Brazil, Brunei Darussalam, Cambodia, Central African Rep., Comoros, Korea (Rep. of), Costa Rica, Côte d'Ivoire, Dominica, Eritrea, Fiji, Gambia, Ghana, Greece, Guyana, Haiti, Hungary, Indonesia, Iran (Islamic Republic of), Ireland, Israel, Kiribati, Lesotho, The Former Yugoslav Republic of Macedonia, Macao (China), Malawi, Mali, Mauritius, Mauritania, Moldova, Mozambique, New Caledonia, Nicaragua, Oman, Pakistan, Panama, Papua New Guinea, Paraguay, Peru, Philippines, Poland, Romania, San Marino, Samoa, Serbia and Montenegro, Slovakia, Sri Lanka, Suriname, Syria, Chad, Tonga, Trinidad and Tobago, Tunisia, Tuvalu, Vanuatu, Venezuela, Zambia, Zimbabwe.

This information is the result of a survey made by ITU-T Study Group 3 in accordance with Resolution 21 (Rev. Marrakesh, 2002) of the Plenipotentiary Conference (Marrakesh, 2002) and Resolution 29 of the World Telecommunication Standardization Assembly, WTSA-2000 (Montreal, 2000).

All the countries/geographical areas which prohibit or allow the practice of "Call-Back" are listed on the ITU Website at the following address:

<http://www.itu.int/itu-t/special-projects/callback/index.html>

**National Numbering Plan
(According to ITU-T Recommendation E.129 (09/02))**

Electronic version: <http://itu.int/itu-t/inr/nnp/>

Administrations are requested to notify ITU about their national numbering plan changes, or to give an explanation on their web page concerning the national numbering plan as well as their contact points, so that the information, which will be available freely to all Administrations/ROAs and service providers, can be posted on ITU-T website.

For their numbering website, or when sending their information to ITU/TSB (e-mail: tsbtson@itu.int), Administrations are kindly requested to use the format as explained in ITU-T Recommendation E.129. They are reminded that they will be responsible for the timely update of this information.

From 1.XII.2004 to 15.XII.2004, the following country has updated or provided its national numbering plan:

Lebanon (country code +961)

INTERNATIONAL TELECOMMUNICATION UNION

**TSB
TELECOMMUNICATION
STANDARDIZATION BUREAU
OF ITU**

**DIALLING PROCEDURES (INTERNATIONAL
PREFIX, NATIONAL (TRUNK) PREFIX AND
NATIONAL (SIGNIFICANT) NUMBER) (IN
ACCORDANCE WITH ITU-T
RECOMMENDATION E.164 (05/97))**

(POSITION ON 1 JANUARY 2005)

Geneva, 2005

Note from TSB

1. This List of "Dialling Procedures" replaces the previous one published as Annex to ITU Operational Bulletin No. 787 of 1.V.2003. The present list recapitulates all the different amendments that have been published up to ITU Operational Bulletin No. 827 of 1.I.2005.

2. This List of "Dialling Procedures" contains the national (trunk) prefix, the international prefix, the country code and the national (significant) number in accordance with ITU-T Recommendation E.164 (05/97).

3. The national (trunk) prefix is the digit, or combination of digits, which must be dialled before an area (city) code when dialling a call to a subscriber from inside his own country but outside his own numbering area. It provides access to the automatic outgoing trunk equipment. If the entry in this column is blank for a particular country, it means that the country has a single nation wide numbering plan that does not use area codes, and all calls to anywhere in the country are dialled by using the entire local number.

Accordingly, in the international service the trunk prefix of the country of destination must not be dialled. ITU-T recommends that the Administrations of countries which have not yet adopted a trunk prefix or are revising the prefix for access to their national trunk network should adopt a prefix composed of a single digit, preferably "0".

4. The international prefix is the digit, or combination of digits, which must be dialled before a country code when dialling a call to a country other than the one from which the call is being placed. If the entry in this column is blank for a particular country, it means that the country does not have direct dialling facilities to other countries (in other words, international calls must be placed through the assistance of an operator).

ITU-T recommends that the Administrations of countries which have not yet introduced automatic international operation or are, for various reasons, revising their numbering plans, should adopt an international prefix (a code for access to the international automatic network) composed of the two digits "00".

5. The country code is composed of one digit or is the combination of two or three digits, characterizing the called country which is used to route calls to the required country. It is usually dialled after the international prefix. The list of country codes is also published in the "List of ITU-T Recommendation E.164 assigned country codes", as an annex to the ITU Operational Bulletin.

6. The national (significant) number is the number to be dialled following the national (trunk) prefix to obtain a subscriber in the same country but in a different local network or numbering area. The national (significant) number consists of the area code followed by the subscriber number. If the entry in this column is blank for a particular country, it means that the information is missing.

7. For your information, the present list is published as an Annex to the ITU Operational Bulletin. Furthermore, the information it contains is also available on the ITU home page (<http://www.itu.int/itu-t/bulletin/annex.html>) and can be consulted by subscribers by remote access.

8. Every effort has been made to ensure that the information contained in this Annex is accurate. Administrations are requested to notify all modifications or missing information concerning their national (trunk) prefix, international prefix and the length of their national (significant) number by using the attached form.

9. The designations employed and the presentation of material in this List do not imply the expression of any opinion whatsoever on the part of the ITU concerning the legal status of any country or geographical area, or of its authorities.

Dialling Procedures

Notes

- 1 With effect from 1 June 2002 until 31 August 2004, the length of the national (significant) number N(S)N will be open from 8 to 10 digits. With effect from 1 September 2004, the length of N(S)N will be closed with 10 digits.
- 2 The '0' is used on all domestic calls, including in the same city, but is omitted when dialling from other countries.
- 3 When dialling from Ireland to Northern Ireland, the area code used should be '048' instead of '004428'.
- 4 In Comoros Islands, the subscriber numbers begin with digits '3 and 7' and Mayotte digits '2 and 6'.
- 5 When dialling from San Marino to Italy, the complete national subscriber number must be used, without prefixing the number by '0039'.
- 6 When dialling from Italy to San Marino, the subscriber number must be prefixed by '0549' instead of '00378'.
- 7 Subscriber numbers on PSTN and analogue mobile network consist of 8 digits and those on the mobile network consist of 9 digits.
- 8 Including Australia Antarctic Territory Bases and Norfolk Island (international prefix for Norfolk Island is '0101').
- 9 When dialling from Malaysia to Singapore, the subscriber number must be prefixed by '02' instead of '0065'.
- 10 When dialling from Singapore to Malaysia, the area code and subscriber number must be prefixed by '020' instead of '00160'.
- 11 For calls from one Inmarsat terminal to another, the '00' prefix is followed by the country code (871 to 874) and the terminal number followed by '#'.
12 Includes also Cocos-Keeling Islands and Christmas Island.
- 13 Reserved for the Palestinian Authority.
- 14 YZ : long-distance operator code.
- 15 The eleven digit scheme is solely for numbers that attract no charge for the subscriber making the call (800) or for numbers that call for a surcharge for subscriber A (900). All other numbers have a fixed seven digit scheme.
- 16 The country code listed is for future use (Vatican is currently using country code '39').
- 17 Subscriber numbers on the Public Switched Telephone Network (PSTN) consist of 5 digits and those on the mobile network consist of 8 digits.
- 18 Operator code Telecom Malagasy 20.
- 19 When dialling between Kenya, Tanzania and Uganda the national (significant) number must be prefixed by 005 for Kenya, by 006 for Uganda and by 007 for Tanzania..
- 20 11 digits for voice-mail services only.
