**Available information regarding the identification of national authorities for the assignment of ITU-T Recommendation T.35 terminal provider codes**

**Note from TSB**

ITU-T Recommendation T.35 provides a mechanism for the inclusion of non-standard facilities, which are used in several protocols defined in ITU-T Recommendations. This mechanism uses three types of codes: (a) a country code, (b) a terminal provider code (also known as manufacturer code), and (c) a terminal provider oriented code. The ITU-T Recommendation T.35 country codes are defined within this Recommendation and the terminal provider oriented codes are defined by the manufacturer. However, for the manufacturer code, ITU-T Recommendation T.35 states: "An Administration, or a national body designated by an Administration, has the responsibility for the allocation and management of the terminal provider code".

In order to provide a centralized list of national authorities for the assignment of ITU-T T.35 terminal provider codes, and to assist manufacturers in obtaining such codes, ITU-T Recommendation T.35 further states: "When an Administration designates a national body, its address and name should be sent to the Director of TSB."

A list of national authorities for the assignment of ITU-T Recommendation T.35 terminal provider codes has been set up, derived from the responses received to TSB Circular 184 of 12 September 2003 and its Addendum 1 of 30 July 2004.

Any new or updated information on the identity of the current national authority designated by each Administration for the assignment of the ITU-T Recommendation T.35 terminal provider codes should be communicated to TSB (preferably electronically, or on paper), to the ITU-T Study Group 16 Secretariat (E-mail: tsbsg16@itu.int, fax: +41 22 730 5853) using the Notification Form.

Notes:

1. For local and national calls

The numbers are planned for closed dialling. Except for emergency and special numbers, which are three-digit numbers, every local subscriber must dial a ten-digit number (i.e., including the area code) for every local and national call, whether it is from a fixed or mobile phone.

General format of the dialling plan: 0YXABCXXXX

2. For international calls

Incoming calls: international dialling format is +251YXABCXXXX. The national trunk dialling prefix "0" will not be dialled in this case.

Outgoing calls: outgoing international calls are made by dialling the international dialling prefix "00" before the country code of the number to be called.

Administrations/ROAs are requested to update their exchange data and inform all interested customers.

### **Luxembourg (country code +352) CORRIGENDUM\***

Communication of 13.IX.2005:

The *Institut Luxembourgeois de Régulation (ILR)*, Luxembourg, announces that the communication of 26.IV.2005 from Luxembourg (country code +352), published in ITU Operational Bulletin No. 836 of 15.V.2005, is modified as follows:

As from 1 September 2006, all mobile telephone numbers in the ranges +352 021, +352 028, +352 061, +352 068, +352 091 and +352 098, will be reassigned to the "6" range of the National Numbering Plan (NNP). (Thus the problems encountered in international communications in the past with mobile numbers commencing with the digit "0" will no longer occur.)

The existing mobile numbers will be reassigned by simply replacing the digit "0" by digit "6". All new mobile numbers will commence with digit "6" and will be nine (9) digits long.

During a transitional phase of six months from 1 September 2006 until 1 March 2007, the new mobile numbers will function in parallel with the existing numbers.

As from 1 March 2007, calls to the old mobile numbers will trigger a recorded message inviting the caller to redial the number, replacing the "0" by "6".

The old numbers will go out of service as from 1 September 2007.

# List of International Signalling Point Codes (ISPC)

## ***Note from the TSB***

1. This List of International Signalling Point Codes (ISPC) replaces the previous one published as Annex to the ITU Operational Bulletin No. 823 of 1.XI.2004. Since then, a number of notifications have been received at TSB and they have been published separately in various issues of the ITU Operational Bulletin. The present list recapitulates all the different amendments that have been published up to Operational Bulletin No. 845 of 1.X.2005.

2. Recommendation Q.708 states that the assignment of signalling area/network codes (SANC) is to be administered by TSB. Each country will then be responsible for the assignment of international signalling point codes (ISPC) that will then be notified to TSB.

3. The numbering plan of Recommendation Q.708 contains 2 048 SANCs providing for 16 384 international signalling points. From these, currently 1 536 SANCs are available for assignment allowing for 12 288 international points. At present 721 SANCs are assigned; the reported utilisation is 3 731 international signalling points.

4. In order to keep the list up to date, Administrations are, therefore, requested to notify the TSB, by using the attached notification form, as soon as an ISPC assignment or withdrawal is made, <http://itu.int/itu-t/inr/forms/ispc.html> .

5. This List will be updated by numbered series of amendments published in ITU Operational Bulletin. Furthermore, the information contained in this Annex is also available on the ITU home page <http://www.itu.int/itu-t/bulletin>, and can be consulted by subscribers by remote access.

6. Please address any comments or any modifications concerning this List to the Director of TSB:
