Mobile	Roshan	79	Seven digits	079 XXX XXXX	079 XXX XXXX	+93 79 XXX XXXX

*Guidelines on how to utilize the National Numbering Plan (NNP)*

- 1) The numbers between 200 and 999 followed by four digits make a total of close to 8 million telephone numbers in each province, which could be divided among different carriers.
- 2) The CDMA/WLL numbers will have 07X followed by seven digits in the same way as the fixed-line subscribers. Out of the seven digits, two can be used to identify locations and five as the Subscriber Number (SN).

See the Table below.

*Dialling instructions*

- For trunk calls: 0 + Area or Carrier Code + Subscriber Number (SN)
- For international calls: 00 + Country Code (CC) + Area Code + Subscriber Number (SN)

The following Table shows how, in the case of CDMA, the 8 million numbers can be distributed among cities and provinces all over the country.

Numbering Plan CDMA

Country Code: +93, Access Code: 75 and geographical distribution as in table below:

Table 2

<i>First digit of area code</i>	<i>Province</i>	<i>Area code</i>	<i>Subscriber Number (SN)</i>	<i>Local call format</i>	<i>Trunk call format</i>	<i>International call format</i>
