Dear Mr. Bigi:

Mr. Spiros Dimolitsas has informed me that you are now handling questions related to ITU-T Recommendation G.728.

VoiceCraft, Inc. holds title to U.S. Patent # 4,969,192 and has patents pending in Europe, Canada, and Japan. These patents contain claims that cover part of the G.728 algorithm.

We wish to inform companies that may be developing products based on G.728 about our patent rights and request your assistance with this matter.

Would you be able to provide us with a list of companies, names, and addresses, which have requested test vectors for G.728? (Mr. Dimolitsas has been kind enough to do this before he turned over responsibility to you for such matters.) Furthermore, if you receive inquiries about patent rights regarding G.728, we would be pleased if you would include information about VoiceCraft in your response.

VoiceCraft is currently engaged in arranging reasonable and nondiscriminatory licensing terms with several companies.

If I may provide you with additional information, please let me know.

Thank you for your cooperation on this matter.

Sincerely,

Allen Gersho,
President
