Ref: IPRs statement for the future Annexes C, D and E of Recommendation G729

Dear sir,

As requested in the letter sent by the chairman of WP3/16, we are very pleased to confirm to ITU that France Télécom / CNET is willing to license its Intellectual Property Rights (IPRs) relating to the C code of G729 Annex C, D and E under reasonable and non discriminatory terms and conditions for use by purchasers of the related Recommendations.

As you are probably aware, France Télécom is a member of the Consortium G729 created on March 10, 1998 with NTT and Université de Sherbrooke. Our IPRs related to G729 and Annex A are now available through the Licensing Agent (Sipro Lab Telecom) of the Consortium G729 and next Annexes will be available as soon as possible through SLT : www.sipro.com / sales mail : Sales@sipro.com.

Please, do not hesitate to contact me if you have any further questions.

Sincerely,

Eric Cozanet
