RE: Patent Licensing Policy

Siemens Aktiengesellschaft hereby declares that in the event that it has existing patents or may in the future obtain patents, which are essential for manufacturing and selling implementations of the proposed recommendation ITU-T G.729 Annex B "Coding of Speech at 8 kBit/s using CS-ACELP with Voice Activity Decision (VAD), Discontinuous Transmission (DTX), and Comfort Noise Generation (CNG)", licences for such implementations under these patents will be made available to any applicant.

We hereby also declare that we are aware of the rules according to the inclusion of patented items in ITU-T Recommendations, as described in the ITU-T "Code of Practice" regarding intellectual property rights, and in particular that we are willing to grant a licence to an unlimited number of patents and patent applications throughout the world under reasonable terms and conditions that are demonstrably free of any unfair competition. Such license will provide that a similar grant under any licensee's patent within the scope of the license granted to the licensee is made available to Siemens Aktiengesellschaft and its subsidiaries on request.

Yours sincerely,
Siemens Aktiengesellschaft
