Re: Patent Statement for Draft Recommendations: G.992.1, G.992.2, G.994.1, G.995.1, G.996.1, G.997.1, H.225.0, Annex G, H.245 version 5, H.323 Annex E, H.323 Annex F, H.341, H.450.4, H.450.5, H.450.6, H.450.7, T.136 ("the Proposed Recommendations")

Dear Mr. Zhao;

This letter sets forth Intel Corporation's ("Intel") policy regarding patents and patent applications that Intel owns directed to and essential for the practice of the Proposed Recommendations (such patents and applications collectively "IPR"). Intel is not willing to waive its rights in its IPR. However, provided that the Proposed Recommendations is adopted by the ITU without any substantive changes or additions to the current "determined" version of the Proposed Recommendations, Intel is willing to negotiate licenses under its IPR in accordance with the ITU's policy contained in paragraph I.2.2 of Appendix I, *Statement on TSB Patent Policy*, to Section 8 of Resolution 1, *Rules of Procedure of the ITU Telecommunication Standardization Sector (ITU-T)*.

In particular, Intel is willing to negotiate nonexclusive, worldwide licenses under its IPR that permit the manufacture, use, sale, offer for sale and importation of the portions of any product that implement and are compliant with all relevant portions of the Proposed Recommendations; provided that these licenses may not extend to any part or function of a product that is not required to implement or comply with the Proposed Recommendations. Intel will grant these licenses on reasonable and non-discriminatory terms after the current "determined" version of the Proposed Recommendations have been formally adopted by the ITU without any substantive changes or additions. Also, Intel's license grant may be conditioned upon the licensee's grant of a reciprocal license under the licensee's IPR and IPR owned by parties with which licensee is affiliated.

In assessing what terms are reasonable, Intel may refer to the royalty rates that a potential licensee has set for its own IPR and IPR of parties with which it may be affiliated. Intel also reserves the right to grant licenses to its IPR as part of a cross-license with any other party.

Please contact the Office of the General Counsel at Intel Corporation, +1 (408) 765-1125 concerning any licensing matters.

Very truly,

A handwritten signature in dark ink, appearing to read "S. Stewart", is written over a horizontal line.
