Title : Position of the French
patents.

Source : France

The usual strategy of CNET is it can, the adoption of internationalistic and effective, and as well to commercial outlets for the work which has

Although there is no property statement in this matter as far as is concerned, CNET could grant on non exclusive basis and on non unreasonable terms for those of its patents "essential" for the implementation of the px64 kbps picture coding for videoconferencing finally approved by the CCITT.

The commitment to grant "user" as previously stated is subject to the "user" is willing to grant licences to any party who would wish to satisfy the registration for any "essential patent" on the "standard" on the same conditions.

By "user" is meant any body which would wish either to produce equipment with the said recommendation, or to sell the

By "essential patent" is meant any patent which has been filed prior to the adoption of the standard, any patent from which this standard and also any patent the infringement would be avoided for the implementation of the standard.
