(*)Title Recommendation ITU-T X.509   ISO/IEC 9594-8					

The Pate	ng declaration: ent Holder believes that it holds granted and/or pending applications for Patents, the use of which would red to implement the above document and hereby declares, in accordance with the Common Patent Policy -T/ITU-R/ISO/IEC, that (check one box only):		
	1. The Patent Holder is prepared to grant a <u>Free of Charge</u> license to an unrestricted number of applicants on a worldwide, non-discriminatory basis and under other reasonable terms and conditions to make, use, and sell implementations of the above document.  Negotiations are left to the parties concerned and are performed outside the ITU-T, ITU-R, ISO or IEC.  Also mark hereif the Patent Holder's willingness to license is conditioned on <u>Reciprocity for the</u>		
	above document.  Also mark here if the Patent Holder reserves the right to license on reasonable terms and conditions (but not <u>Free of Charge</u> ) to applicants who are only willing to license their Patent, whose use would be required to implement the above document, on reasonable terms and conditions (but not <u>Free of Charge</u> ).		
X	2. The Patent Holder is prepared to grant a license to an unrestricted number of applicants on a worldwide, non-discriminatory basis and on reasonable terms and conditions to make, use and sell implementations of the above document. Negotiations are left to the parties concerned and are performed outside the ITU-T, ITU-R, ISO, or IEC.		
	Also mark here $\underline{X}$ if the Patent Holder's willingness to license is conditioned on Reciprocity for the above document.		
	3. The Patent Holder is unwilling to grant licenses in accordance with provisions of either 1 or 2 above.  In this case, the following information must be provided to ITU, and is strongly desired by ISO and ITC.		
	<ul> <li>IEC, as part of this declaration:</li> <li>granted patent number or patent application number (if pending);</li> <li>an indication of which portions of the above document are affected;</li> <li>a description of the Patents covering the above document.</li> </ul>		
Free of	Charge: The words "Free of Charge" do not mean that the Patent Holder is waiving all of its rights with		

Free of Charge: The words "Free of Charge" do not mean that the Patent Holder is waiving all of its rights with respect to the Patent. Rather, "Free of Charge" refers to the issue of monetary compensation; i.e., that the Patent Holder will not seek any monetary compensation as part of the licensing arrangement (whether such compensation is called a royalty, a one-time licensing fee, etc.). However, while the Patent Holder in this situation is committing to not charging any monetary amount, the Patent Holder is still entitled to require that the implementer of the same above document sign a license agreement that contains other reasonable terms and conditions such as those relating to governing law, field of use, warranties, etc.

<u>Reciprocity</u>: The word "Reciprocity" means that the Patent Holder shall only be required to license any prospective licensee if such prospective licensee will commit to license its Patent(s) for implementation of the same above document Free of Charge or under reasonable terms and conditions.

<u>Patent</u>: The word "Patent" means those claims contained in and identified by patents, utility models and other similar statutory rights based on inventions (including applications for any of these) solely to the extent that any such claims are essential to the implementation of the same above document. Essential patents are patents that would be required to implement a specific Recommendation | Deliverable.

Assignment/transfer of Patent rights: Licensing declarations made pursuant to Clause 2.1 or 2.2 of the Common Patent Policy for ITU-T/ITU-R/ISO/IEC shall be interpreted as encumbrances that bind all successors-in-interest as to the transferred Patents. Recognizing that this interpretation may not apply in all jurisdictions, any Patent Holder who has submitted a licensing declaration according to the Common Patent Policy - be it selected as option 1 or 2 on the Patent Declaration form - who transfers ownership of a Patent that is subject to such licensing declaration shall include appropriate provisions in the relevant transfer documents to ensure that, as to such transferred Patent, the licensing declaration is binding on the transferee and that the transferee will similarly include appropriate provisions in the event of future transfers with the goal of binding all successors-in-interest.

Pate	Patent Information (desired but not required for options 1 and 2; required in ITU for option 3 (NOTE))
