

# ★ **Future of *ID*entity in the Information Society**

---

## A FP6 Network of Excellence

ISOIEC ITU-T FIDIS Work Shop on Identity  
Management Standards  
Luzern, Schwiez (30th September 2007)

**Hans Hedbom**  
Karlstad University  
[www.fidis.net](http://www.fidis.net)

# The initial challenge: “Identity” is changing

- IT puts more HighTech on ID cards
  - Biometrics to bind them closer to a human being
  - Chips to add services (such as a PKI)
- Profiles may make the „traditional“ ID concept obsolete
  - People are represented not by numbers or ID keys any more but by data sets.
  - Identities become “a fuzzy thing”.
- New IDs and ID management systems are coming up
  - Mobile communication (GSM) has introduced a globally interoperable „ID token“: the Subscriber Identity Module
  - Ebay lets people trade using Pseudonyms.
- Europe (the EU) consider joint ID and ID management systems
  - European countries have different traditions on identity card use
  - Compatibility of ID systems is not trivial

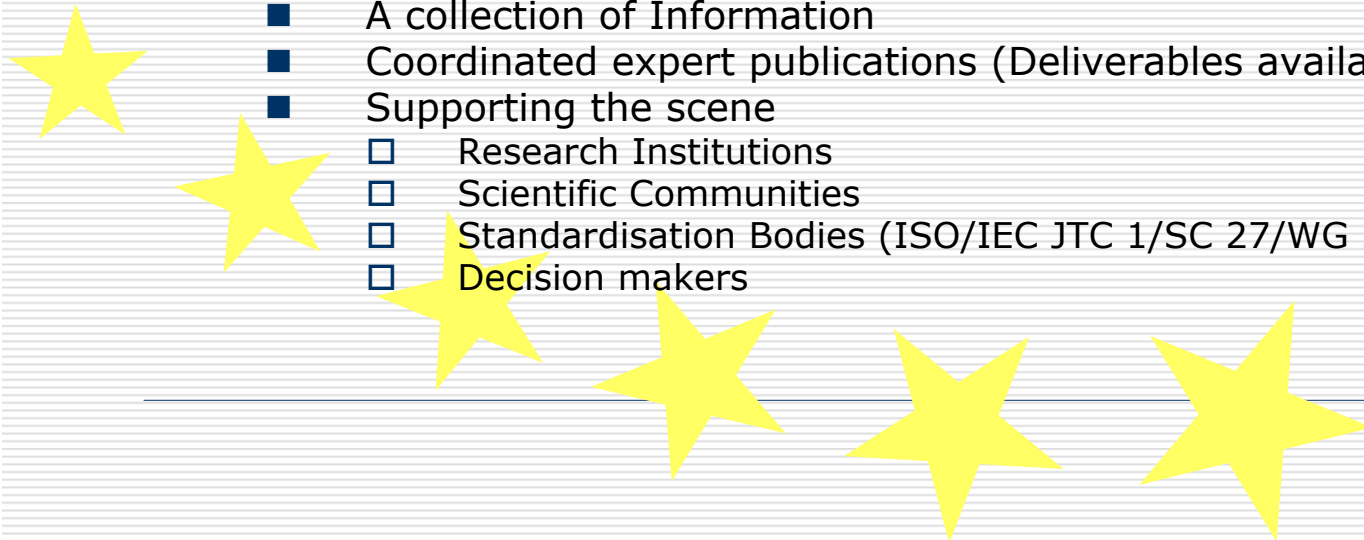

...

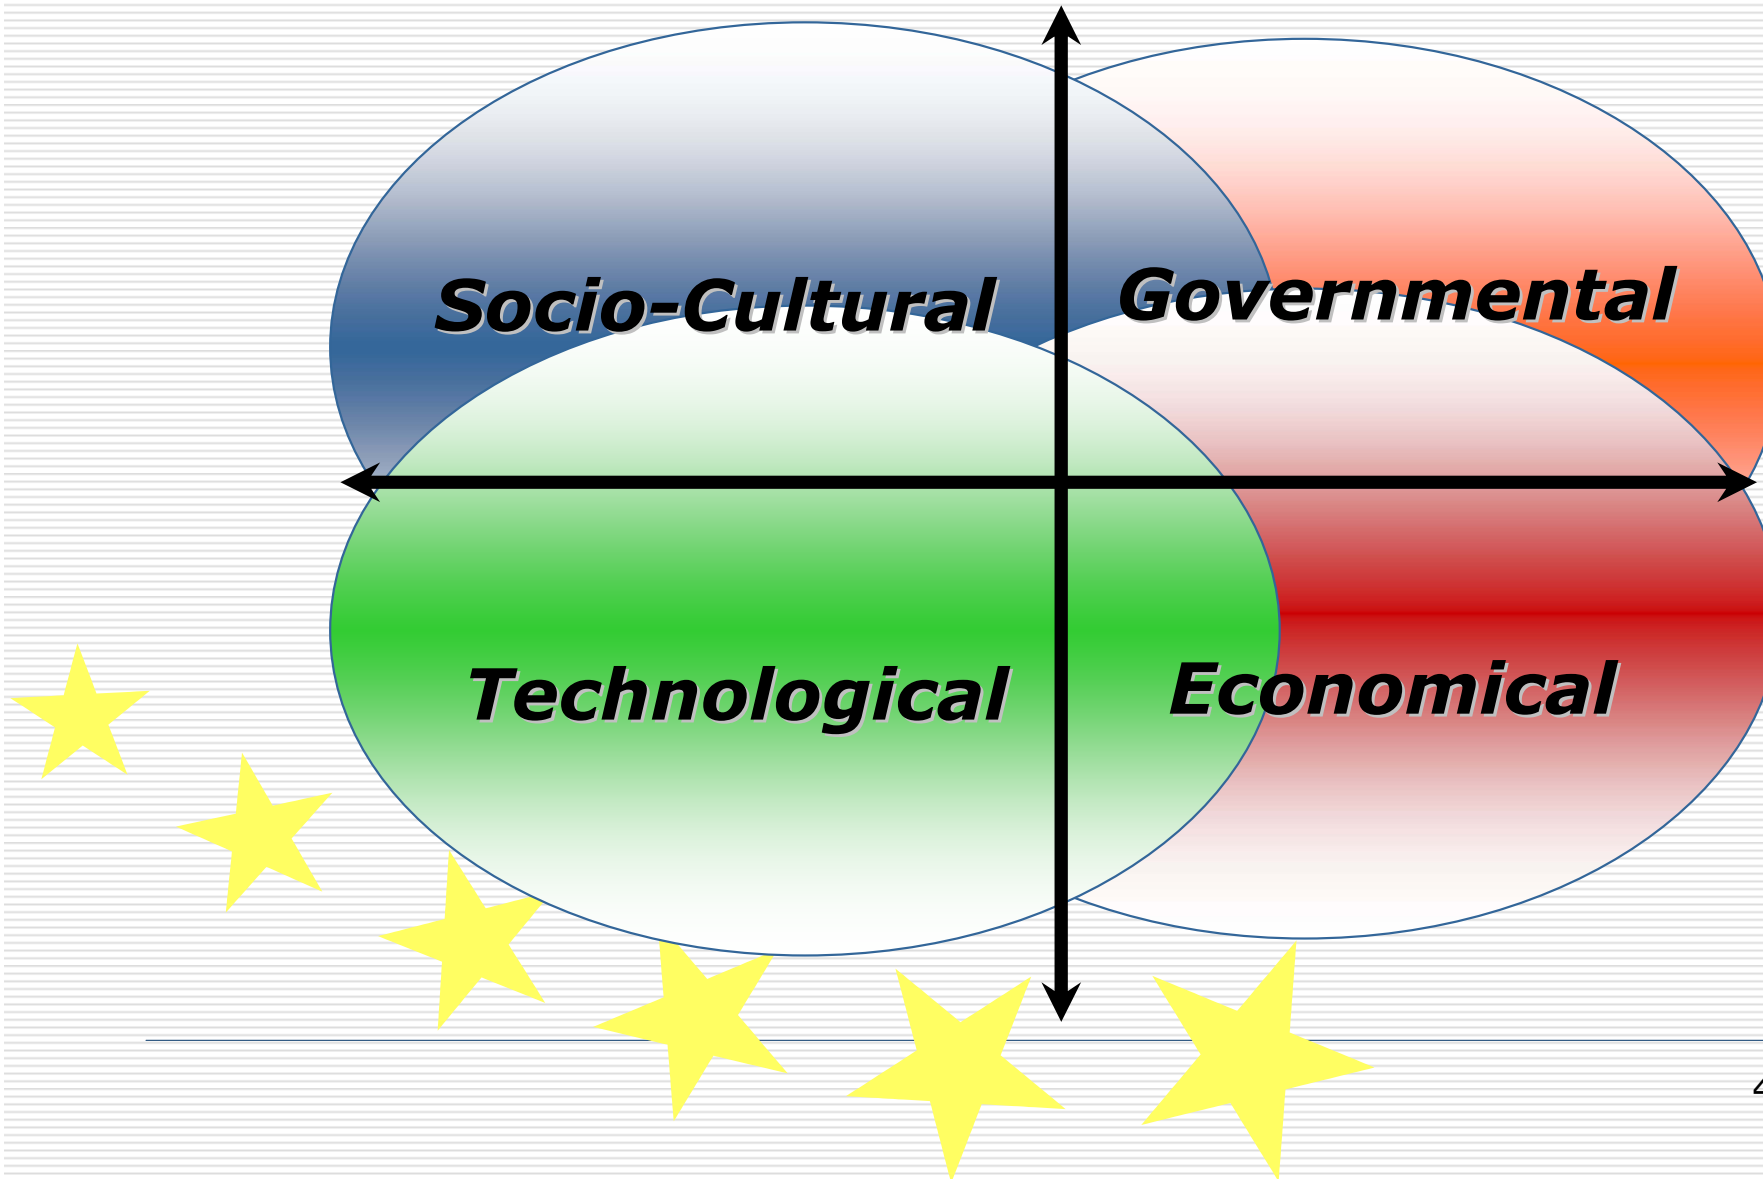

# Future of Identity in the Information Society (FIDIS)

- **Vision:** Europe will develop a deeper understanding of how appropriate identification and ID management can progress the way to a fairer European information society.
  
- **Why an EU FP 6 Network of Excellence?**
  - Consequences of “new” IDs are unclear
  - “Change” Trends come from different fields and disciplines
  - Joint work will promote the European Information Society
  
- **What can FIDIS offer?**
  - A collection of Information
  - Coordinated expert publications (Deliverables available at [www.fidis.net](http://www.fidis.net))
  - Supporting the scene
    - Research Institutions
    - Scientific Communities
    - Standardisation Bodies (ISO/IEC JTC 1/SC 27/WG 5, ETSI, ITU-T,... )
    - Decision makers

# Interdisciplinary aspects of Identity Management (and of IT Security and Privacy)

# Identity Management Types of IdM (Systems)

Type 1

Type 2

Type 3

Account Management:

*assigned* identity  
(= Tier 2)

Profiling:

*derived* identity  
*abstracted* identity  
(= Tier 3)

Management of

*own* identities:  
*chosen* identity  
(= Tier 1)

by organisation

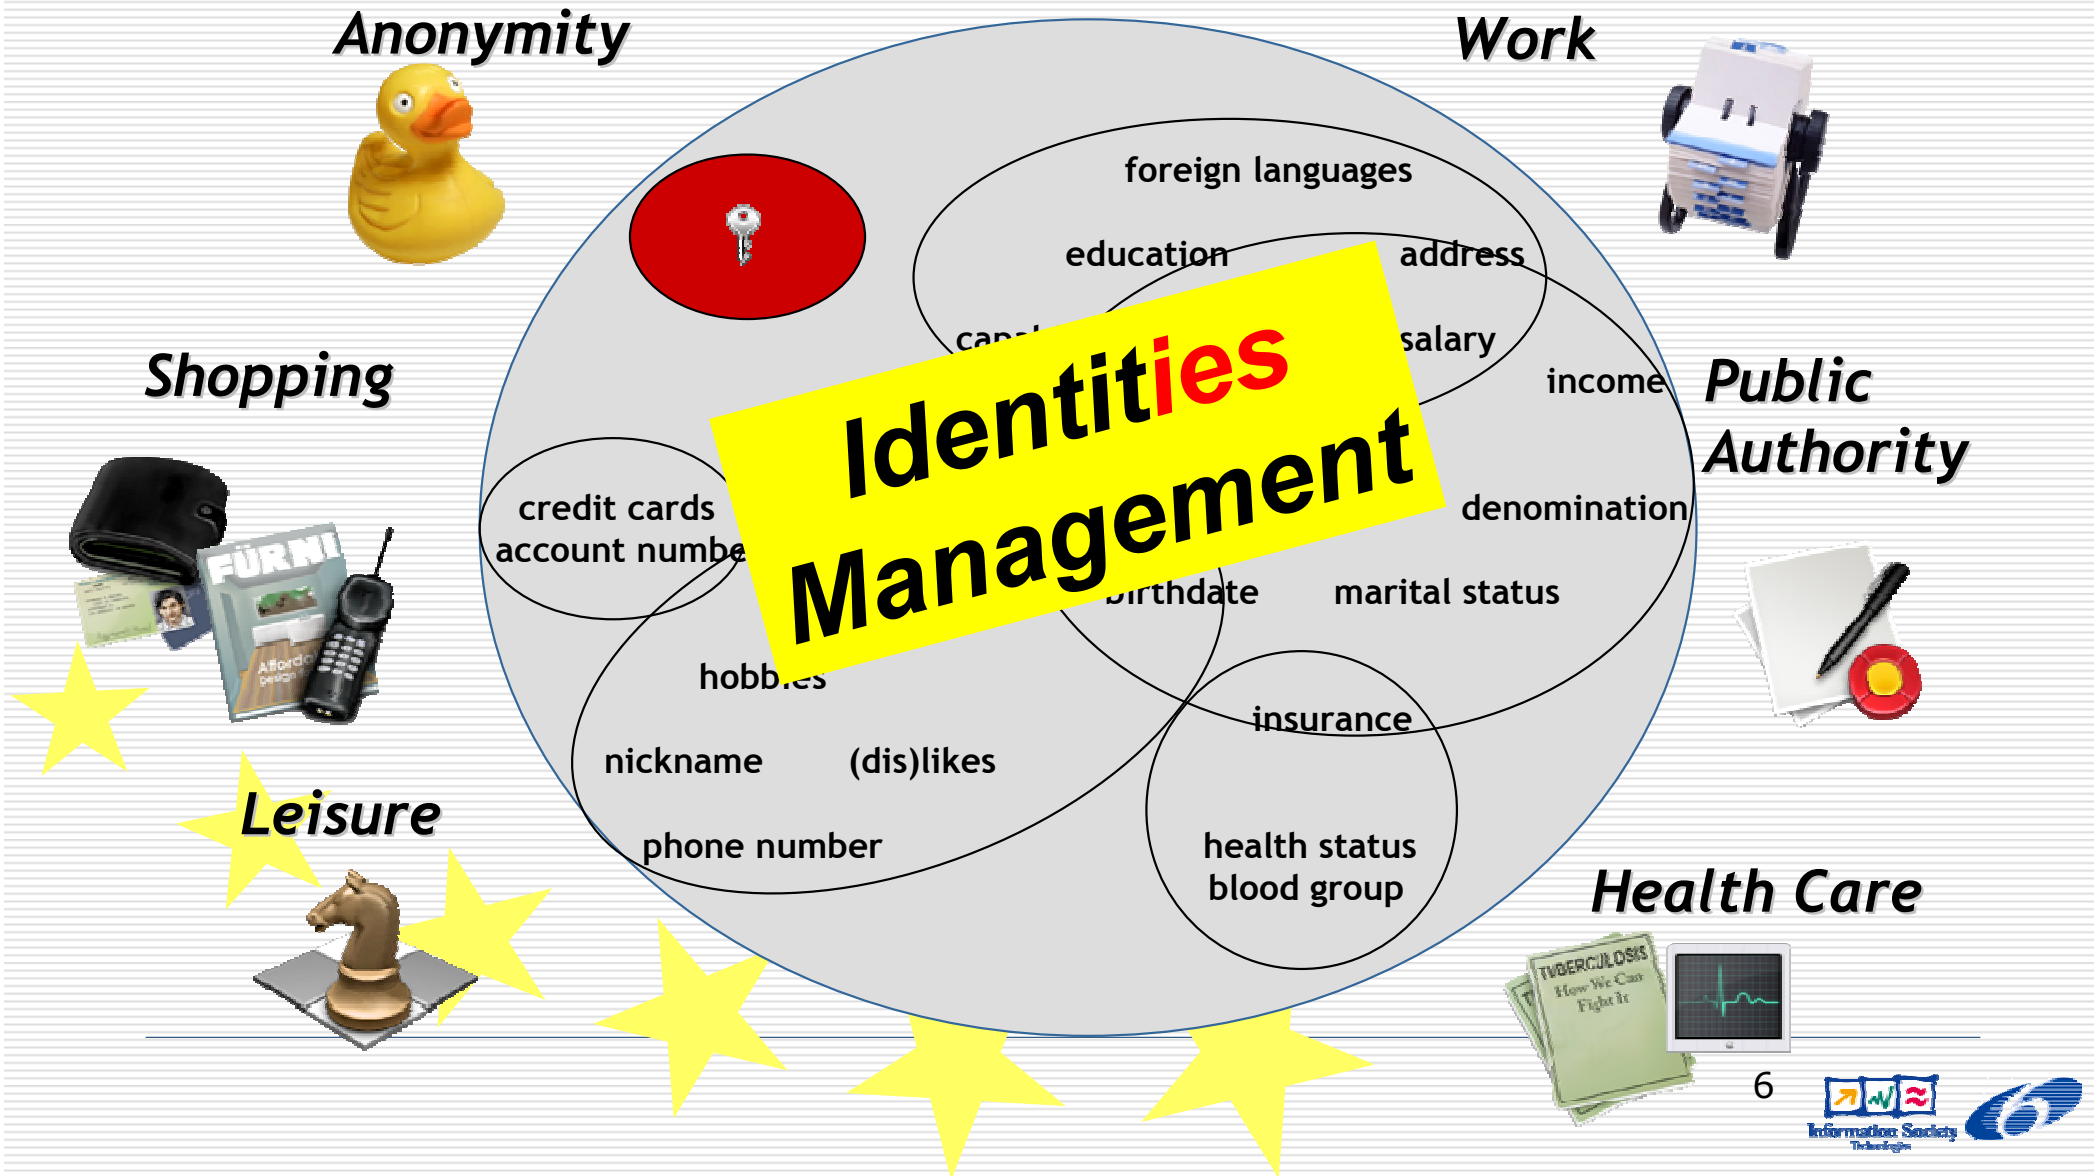

by organisation

by user  
herself/himself  
supported by  
service providers

⇒ There are hybrid systems that combine characteristics

# Identity Concepts

## Partial Identities Illustrated

# Changing borders of (partial) identities

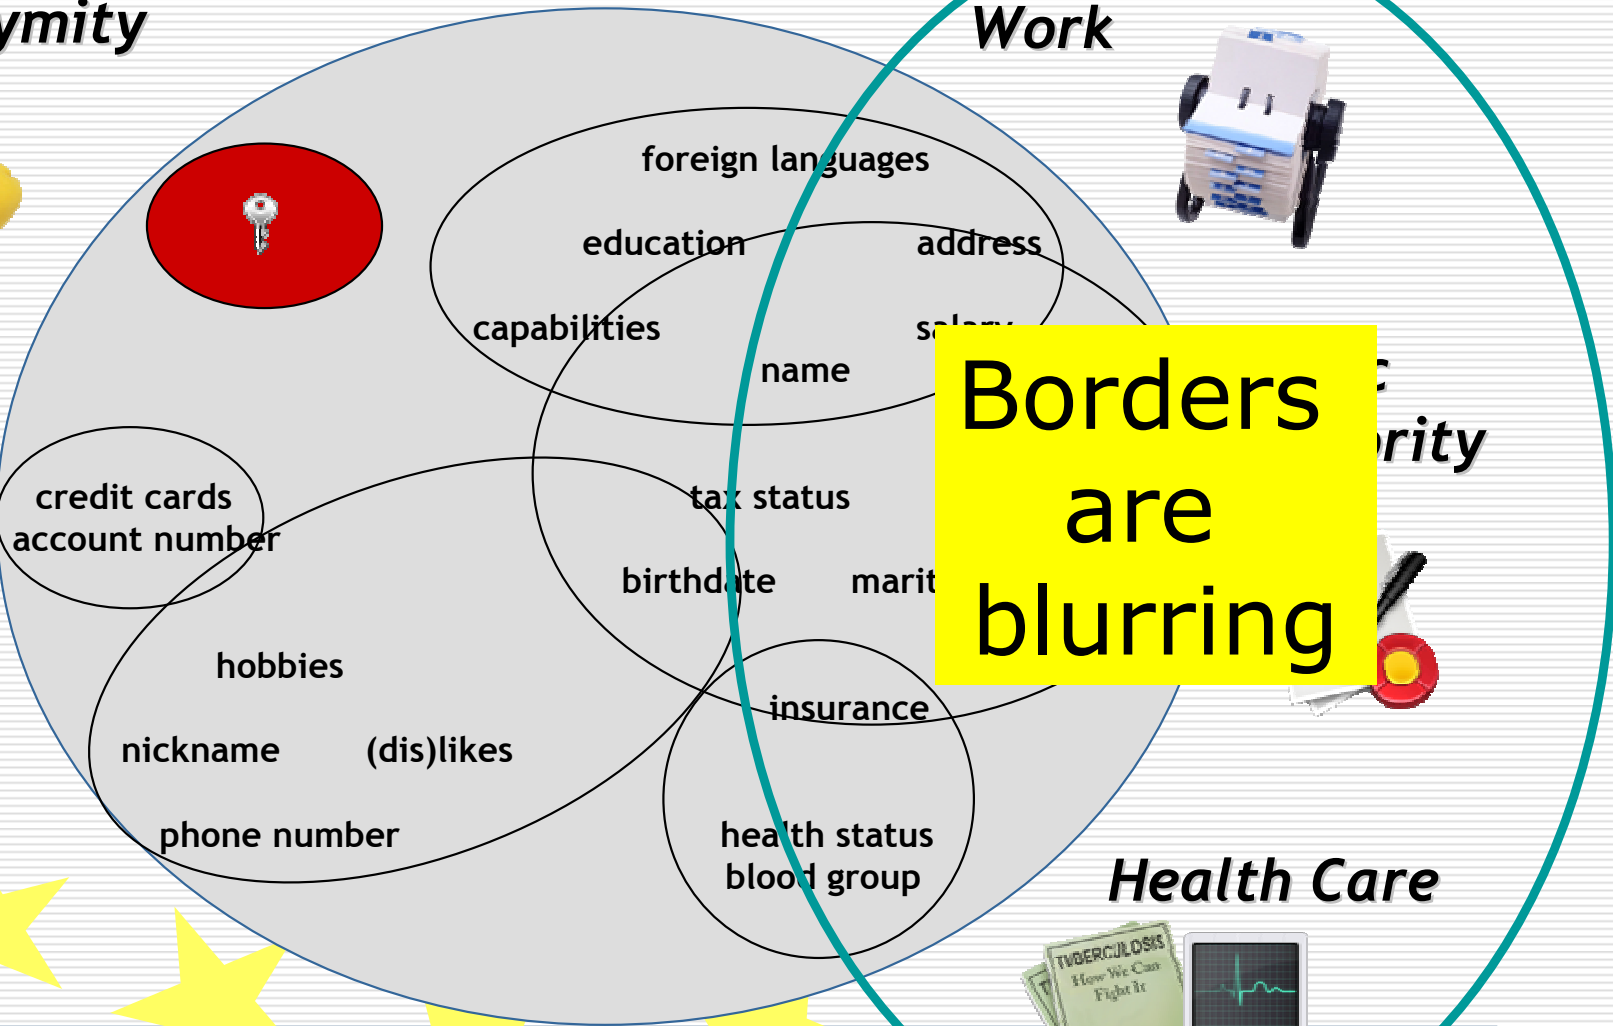

**Anonymity**

**Work**

**Shopping**

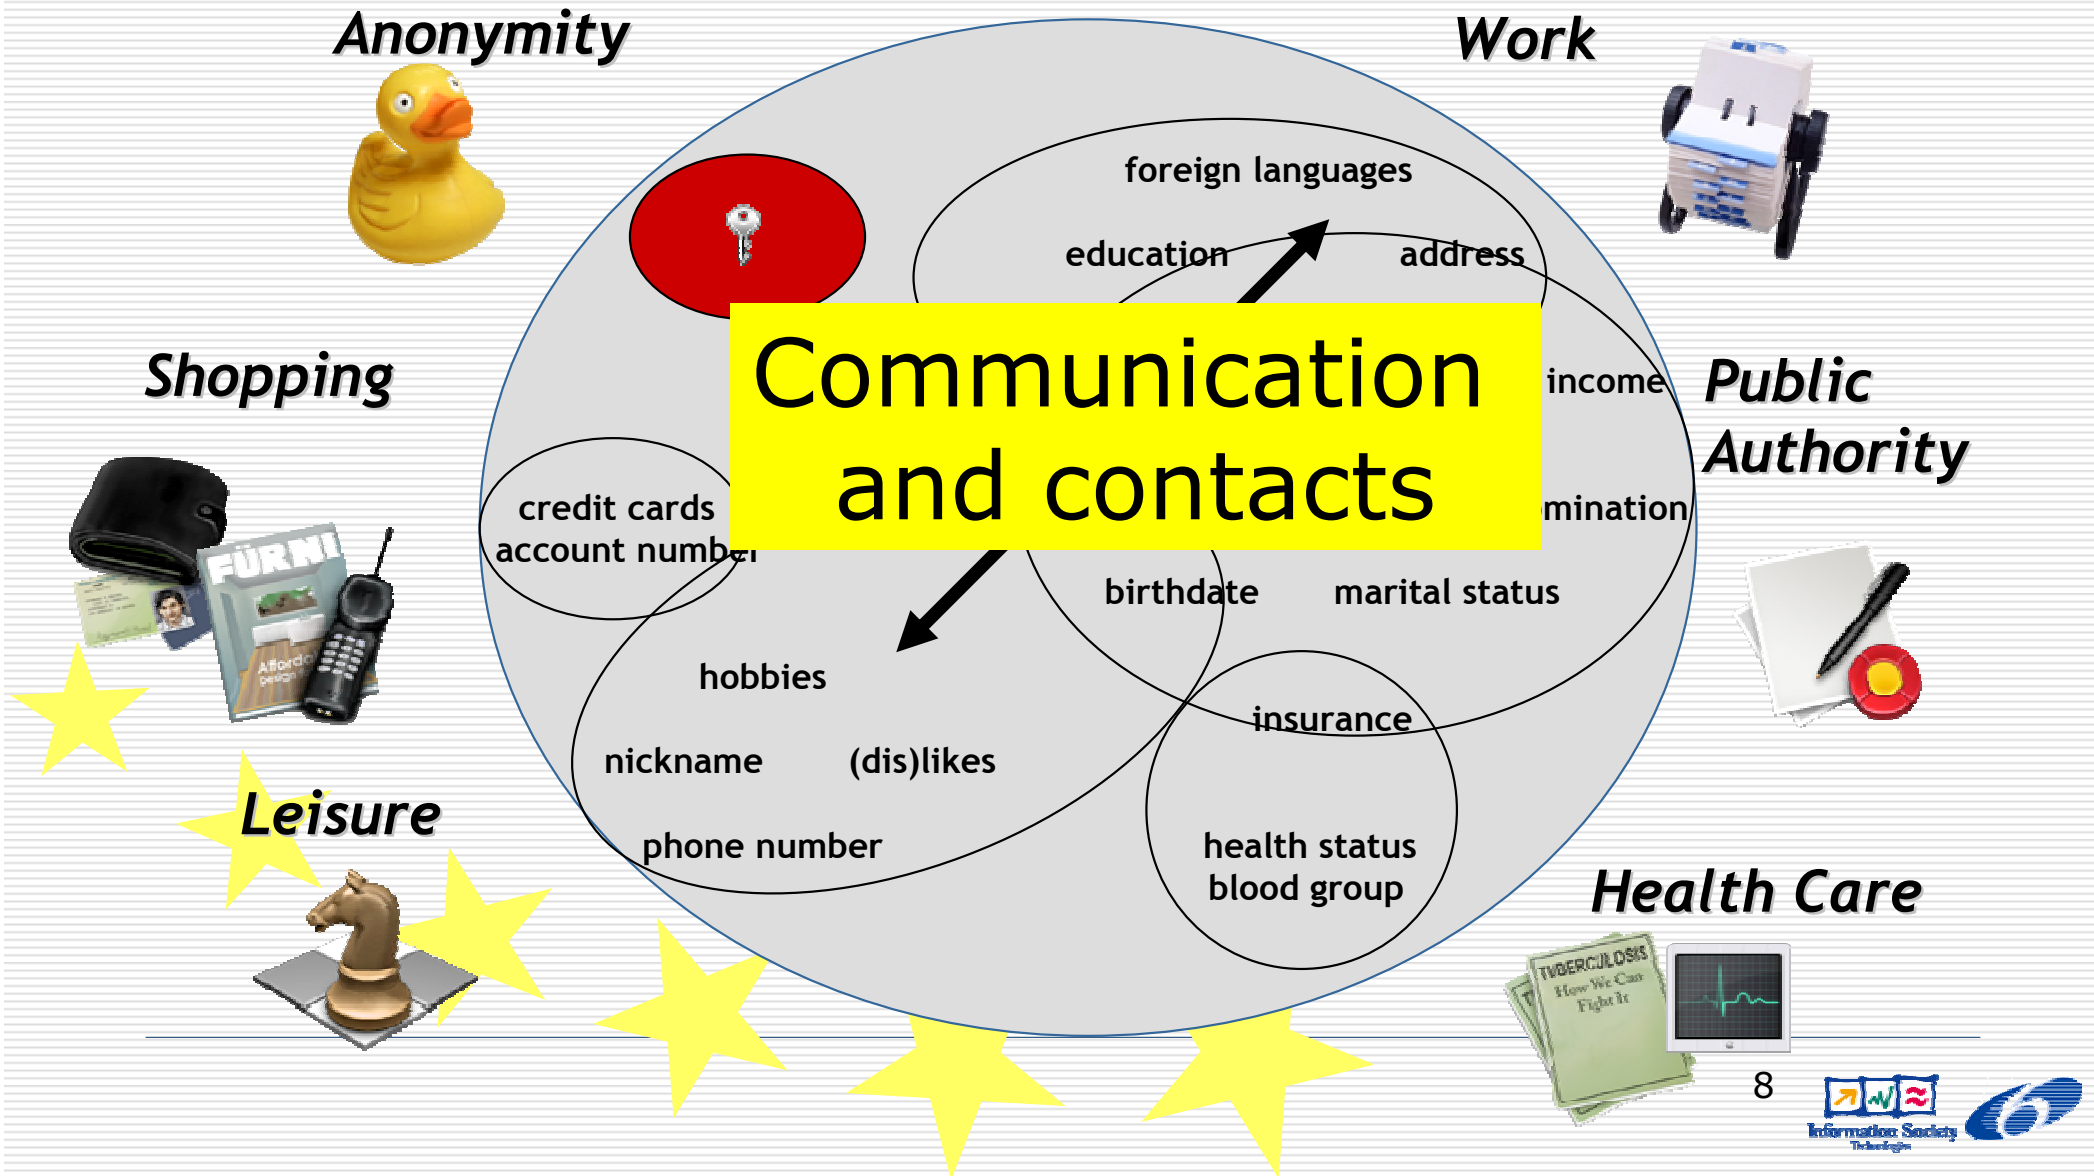

**Leisure**

**Health Care**

# Changing borders of (partial) identities (cont.)

# Joint Research of FIDIS Topics/Activities

---

- „Identity of Identity“
- The HighTechID and emerging technologies
- Interoperability of IDs and ID management systems
- Profiling and AmI Environments
- Forensic Implications
- De-Identification
- Privacy
- Mobility and Identity

# Results for Standardisation

---

- Different identities, roles, and systems exist in parallel.
- Many processes and workflows are affected.
- Integration can raise efficiency, but care needs to be taken.
- Identity Management cannot function and gain trust without Privacy and Data protection

# Questions and Answers

---

Thank you for your attention!  
Any questions?
