Title: Support decentralization, with some flexibility

ABSTRACT

In order to make it more effective and efficiency and also accommodate the GTO, UNHCS has recommend the decentralized of GTO operational locations to fulfill the member's flexible necessity.

Introduction

As we know that most of GTO members were located out of Geneva and if the operational was located out of Geneva it will give more benefit, such as: accommodating of member's aspiration, to make a decision exactly, efficiency of fee and time, and to increase country's economics growth and to motivate the develop country.

Benefit

- Accommodate all of member's aspiration, so the member will understand about all of the problem.
- Make an optimal decision, because everyone who come will give the problem solution as a their contribution.
- Efficiency of fee and time
- To increase the economics growth of district country because the Industry will develop.
- Enhanced the participation of developing countries in standards development process.
- Maximization of the developing countries' profit from access to new technology development.
- Assurance that the specific requirements of developing countries considered in the development of standards and for interoperability issues

Conclusion

Because of these benefits, I Proposed that GTO should open branch office outside Geneva. So, GTO will play more relevant and more active in develop the ICT for each region and at the same time will promote the growth of developing country.
